

INDEX OF SUBJECTS

- Aeration, effect on bacterial oxidation of organic matter, 518
- Aerial disinfectant, iodine as an, 354
- Aerosols, action of hypochlorous acid gas on, 1
- Agglutination test, Vi, for detection of typhoid carriers, 31
- Air-carriage of respiratory droplets, 471
- A.L. 63, louse-powder, 294
- Animals, laboratory, feeding and breeding, 491, 501
- Antigen-antibody reaction, quantitative aspects of, 227
- Antigen-antibody reaction, theory of, 227
- Antigen-antibody reaction, theory and experimental results, 237
- Antigen-species, immunization with, 143
- Anti-immunity factor in *Pneumococcus*, 143
- Avian tubercle bacillus, development of pseudo-mycelia in, 256
- Avian tubercle bacillus, initial development of, 158
- Bacillus, Flexner type, non-mannite fermenting, 116
- Bacillus wakefield*, critical examination of, 346
- Bacteria, changes in nuclear structure, 99
- Bacteria, coliform, effects of temperature in tests for, 109
- Bacteria, quantitative sterilization by mercuric compounds, 463
- Bacterial oxidation of organic matter, 508
- Bacteriological analysis and grading of ice-creams, 289
- Bacteriological investigation of diarrhoea in Dublin, 37
- Bacteriophage differentiation of *Str. cremoris* and *Str. lactis*, 264
- Bacteriophage typing in water-borne typhoid outbreak, 120
- Bacteriology of dehydrated fish, 193
- Bacterium coli* and phenol, reaction between, 210, 243
- Bronchopneumonia in infants, etiological factors in, 15
- teens, school, analysis of meals in, 352
- Carcinogenic properties of tars and mineral oils, 362
- Carriers, typhoid, Vi agglutination test for detection of, 31
- Cellular immunity in *Pasteurella pestis* infection, 307
- Chicks, disease due to *Salmonella thompson*, 179
- Coliform bacteria, effect of temperature in tests for, 109
- Confined, recently, Schick reactions in, 437
- Cows, control of mastitis by CTAB, 442
- CTAB in control of mastitis in cows, 442
- Diarrhoea and enteritis in Dublin, investigation of, 37
- Diarrhoea in infants in London, 480
- Diphtheria in Hull, 184
- Diphtheria-antitoxin, natural in horses, 348
- Disinfectant action of hypochlorous acid gas, 1
- Disinfectant, iodine as an aerosol, 359
- Disinfectants, reactions *in vitro*, 442
- Disinfection, dynamics of, 210, 243, 249
- Disinfection processes, significance of volatility and water-solubility, 451
- Droplet nuclei, size and duration of air-carriage, 471
- Droplets, respiratory, size and duration of air-carriage, 471
- Dublin, diarrhoea and enteritis in, 37
- Dynamics of disinfection, 210, 243, 249.
- Dysentery bacillus, a new non-mannite fermenting, 136, 346
- Egg, *Salmonella* food-poisoning transmitted by, 342
- Egypt, enteric fevers in, 284
- Enteric fever, diagnosis in inoculated, 129
- Enteric fevers in Egypt, 284
- Enteritis in infants in London, 480
- Epidemic pellagra in Portugal, 519
- Fabrics, estimation of tropical fitness of, 286
- Fish, dehydrated, bacteriology of, 193
- Flexner type of dysentery bacillus, non-mannite fermenting, 136, 346
- Fluorine alopecia, 276
- Food-poisoning transmitted by a hen's egg, 342
- Horses, natural diphtheria-antitoxin in, 348
- Hull, diphtheria in, 184
- Hypochlorite solution, disinfecting action on bacterial aerosols, 1
- Hypochlorous acid, 1
- Ice-creams, bacteriological analysis and grading of, 289
- Immunity, cellular, in *Pasteurella pestis* infection, 307
- Immunization with a species antigen, 143
- Immunological principles, practical application of, 135
- Infant mortality, 67
- Infants, bronchopneumonia in, 15
- Infants, diarrhoea and enteritis in, 480
- Iodine as an aerial disinfectant, 359
- Laboratory animals, feeding and breeding of, 491, 501
- Louse-powder, A.L. 63, 294
- Mastitis in cows, control by CTAB, 442
- Meals in Surrey school canteens, 352
- Mercuric compounds, quantitative sterilization of bacteria by, 463
- Milk, growth promoted by in vitamin-free diets, 149
- Mineral oils, carcinogenic properties of, 362
- Mortality, infant, 67
- Mumps, the epidemic curve of, 350
- New-born, Schick reaction in, 437
- Nuclear structure of bacteria, changes in, 99
- Oils, mineral, carcinogenic properties of, 362
- Organic matter, bacterial oxidation of, 508
- Oxidation of organic matter by bacteria, 508
- Pasteurella pestis* infection, cellular immunity in, 307

- Pellagra epidemic in Portugal, 518
 Perspiration, effects on shoe-materials, 53
 Phenol and *Bact. coli*, reaction between, 210, 243
Pneumococcus, anti-immunity factor in, 143
 Portugal, epidemic pellagra in, 518
- Rabbits, maintenance without fresh green food, 501
 Rats, refectation in, 149
 Refectation in rats, 149
 Respiratory droplets, size and duration of air-carriage, 471
 Rooms, bactericidal effects of ultra-violet light on, 333
 Rooms, unheated 'closed', ventilation of, 314
- Salmonella* food-poisoning transmitted by a hen's egg, 342
Salmonella thompson causing disease in chicks, 179
Salmonella typhi-murium infection and vitamin A metabolism, 56, 61
 Schick reaction in new-born and recently confined, 347
 School canteens, analysis of meals in, 352
 Shoe-materials, reagents against perspiration effects, 33
 Species-antigen, immunization with, 143
 Statistical treatment of measurements of carcinogenic properties of tar and mineral oils, 362
Streptococcus agalactiae, 442
Streptococcus cremoris and *Str. lactis*, differentiation of, 246
- Tars, carcinogenic properties of, 362
 Tubercle bacillus, avian, development of pseudo-mycelia in, 256
 Tubercle bacillus, avian, initial development of, 158
 Typhoid carriers, Vi agglutination test in detection of, 31
 Typhoid outbreak, bacteriophage typing in, 120
- Ultra-violet light, bactericidal effects of irradiation by, 333
- Ventilation, methods of measurements of, 326
 Ventilation, natural, of unheated 'closed' rooms, 314
 Vi agglutination test for detection of typhoid carriers, 31
 Vitamin A metabolism and *Sal. typhi-murium* infection, 56, 61
 Vitamin-free diets, effects of addition of milk in, 149
 Volatility, significance in disinfecting processes, 451
- War-time health of women in industry, 221
 Water-borne typhoid outbreak, bacteriophage typing in, 120
 Women in industry, war-time health of, 221
