VOLUME 66
2001

PUBLISHED QUARTERLY BY THE ASSOCIATION FOR SYMBOLIC LOGIC, INC.
WITH SUPPORT FROM INSTITUTIONAL AND CORPORATE MEMBERS

https://doi.org/10.1017/S0022481200010124 Published online by Cambridge University Press

The four numbers of Volume 66 were issued at the following dates:

Number 1, pages 1–440, April 9, 2001
Number 2, pages 441–976, May 29, 2001
Number 3, pages 977–1504, September 20, 2001
Number 4, pages 1505–1976, November 30, 2001

Numbers 1–4 of this volume are copyrighted ©2001 by the Association for Symbolic Logic, Inc. Reproduction of copyrighted numbers of the JOURNAL by photostat, photoprint, microfilm, or like process is forbidden, except by written permission, to be obtained from the Secretary of the Association, Charles Steinhorn, ASL, Box 742, Vassar College, 124 Raymond Avenue, Poughkeepsie, NY 12604, USA.

The paper used in this JOURNAL is acid-free and falls within the guidelines established to ensure permanence and durability.

This JOURNAL has been registered with the Copyright Clearance Center, Inc. The appearance of a code at the bottom of the first page of an article indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the per-copy fee stated in the code is paid directly to Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923. This consent does not extend to copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale. Specific written permission for such copying must be obtained from the Association.

CONTENTS OF VOLUME 66

ADAMOWICZ, ZOFIA and BIGORAJSKA, TERESA. Existentially closed structures and Gödel's second incompleteness theorem 349

ALEKHNOVICH, MICHAEL, BUSS, SAM, MORAN, SHLOMO, and PITASSI, TONIANN. Minimum propositional proof length is NP-hard to linearly approximate 171

ANDREEV, P. V. and GORDON, E. I. An axiomatics for nonstandard set theory, based on von Neumann–Bernays–Gödel Theory 1321

APTER, ARTHUR. Some structural results concerning supercompact cardinals 1919

———. Supercompactness and measurable limits of strong cardinals 629

ARECES, CARLOS, BLACKBURN, PATRICK, and MARX, MAARTEN. Hybrid logics: characterization, interpolation and complexity 977

BŁASZCZYK, ALEKSANDER and SHELAH, SAHARON. Regular subalgebras of complete Boolean algebras 792

BAIZHANOV, BEKTUR SEMBIULY. Expansion of a model of a weakly o-minimal theory by a family of unary predicates 1382

BARRINGTON, DAVID A. MIX. See IMMERMAN, NEIL.

BAUMGARTNER, JAMES E. and HAJNAL, ANDRAS. Polarized partition relations 811

BAYS, TIMOTHY. On Tarski on models 1701

BAYS, TIMOTHY. Partitioning subsets of stable models 1899

BECKER, HOWARD and JACKSON, STEVE. Supercompactness within the projective hierarchy 658

BECKMANN, ARNOLD. Exact bounds for lengths of reductions in typed λ-calculus 1277

BIGORAJSKA, TERESA. See ADAMOWICZ, ZOFIA.

BLACKBURN, PATRICK. See ARECES, CARLOS.

BRIDGES, DOUGLAS and MAHALANOBIS, AYAN. Bounded variation implies regulated: a constructive proof 1695

BRIGANDT, INGO. Quantifier elimination in tame infinite p-adic fields 1493

BUECHLER, STEVEN and HOOVER, COLLEEN. The classification of small types of rank ω, Part I 1884

BUNDER, MARTIN and DEKKERS, WIL. Pure type systems with more liberal rules 1561

BUSS, JONATHAN F. See IMMERMAN, NEIL.

BUSS, SAM. See ALEKHNOVICH, MICHAEL.

CAICEDO, XAVIER and CIGNOLI, ROBERTO. An algebraic approach to intuitionistic connectives 1620

CALHOUN, WILLIAM C. and LERMAN, MANUEL. Embedding finite lattices into the ideals of computably enumerable Turing degrees 1791

CAMERON, PETER and HODGES, WILFRID. Some combinatorics of imperfect information 673

CANTWELL, JOHN. See HANSSON, SVEN OVE.

CASANOVAS, ENRIQUE and ZIEGLER, MARTIN. Stable theories with a new predicate 1127

Erratum 1975

The BULLETIN and the JOURNAL are the official organs of the Association for Symbolic Logic, an international organization for furthering research in symbolic logic and the exchange of ideas among mathematicians, philosophers, computer scientists, linguists, and others interested in this field.

The JOURNAL invites submission of (1) original technical papers in the field of symbolic logic, (2) expository papers in this field, (3) papers whose main point is philosophical and which either bear upon logic or make use of its methods, and (4) studies in the history of logic in which modern technical developments are taken into account.

Articles being submitted for publication in the JOURNAL should be sent to one (and only one) of the following editors: ***Kevin J. Compton, Department of EECS, University of Michigan, Ann Arbor, MI 48109, USA*** (kjc@umich.edu); or ***Françoise Delon, UFR de Math., Univ. Paris VII, 2 pl. Jussieu, case 7012, F-75251 Paris cédex 05, France*** (delon@logique.jussieu.fr); or ***Rod Downey, Department of Mathematics, Victoria University of Wellington, Box 600, Wellington, New Zealand*** (rod.downey@vuw.ac.nz); or ***John Etchemendy, Department of Philosophy, Stanford University, Stanford, CA 94305, USA*** (jetch@csli.stanford.edu); or ***Robert Goldblatt, Department of Mathematics, Victoria University, Box 600, Wellington, New Zealand*** (rob.goldblatt@vuw.ac.nz); or ***William J. Mitchell, Department of Mathematics, University of Florida, Gainesville, FL 32611, USA*** (mitchell@math.ufl.edu); or ***Michael Rathjen, School of Mathematics, University of Leeds, Leeds LS2 9JT, England*** (rathjen@amsta.leeds.ac.uk); or ***Simon Thomas, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903, USA*** (sthomas@math.rutgers.edu).

Submitted manuscripts should be typewritten with wide margins and with double spacing between the lines, or prepared with a word processor, such as LaTeX or Microsoft Word. Two copies of the manuscript should be sent to the editor, and the author should also keep a complete copy and the electronic file from which the submitted copy was prepared, if a word processor was used. After the paper is accepted in its final form, an electronic copy will be appreciated and will advance the final publication date of the paper, especially if it is in LaTeX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX. The JOURNAL and the BULLETIN OF SYMBOLIC LOGIC are typeset in a version of $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX, using a stylefile which is posted on the ASL Website, http://www.aslonline.org, along with instructions for its use. Fifty offprints of each article are supplied at no charge, and additional offprints may be purchased if desired.

Volumes 1 through 60 of the JOURNAL are available online in the JSTOR database.

Reviews of articles and books in logic which in the past were published in the JOURNAL have been moved to the BULLETIN OF SYMBOLIC LOGIC, beginning with the March 2000 issues.

Individual membership in the Association is open to anyone interested in its work. Annual dues for members are $60 ($30 for students). Dues include subscriptions to the current volumes of the JOURNAL and the BULLETIN. Institutional membership in the Association is available to any academic institution or department. Annual institutional dues are $550 for 2001. Membership privileges include choices of current subscriptions, back volumes, and student memberships. A detailed description of institutional and corporate memberships is available from the Secretary-Treasurer.

Requests for information, applications for membership, orders for back volumes, business correspondence, and notices and announcements for publication in the BULLETIN should be sent to the Secretary-Treasurer of the Association. ***Charles Steinhorn, ASL, Box 742, Vassar College, 124 Raymond Avenue, Poughkeepsie, NY 12604 USA***. The electronic mail address of the Association's business office is asl@vassar.edu. The ASL Website is located at http://www.aslonline.org. Links from that site provide further information on the JOURNAL and on submitting papers for publication.
