Seminars in Psychology and the Social Sciences

Edited by Digby Tantam & Max Birchwood

In some instances the links between clinical practice and the most recent theories considered in this book have yet to be made. However, over the next decade these are likely to dominate the research and service agenda, such as ethnicity as a determinant of health care, connectionist models of mental functioning, and the effects of sex and gender on mental health. For the trainee as well as for the clinician looking for new paradigms in the social sciences, the book will prove an essential source.

Seminars in Child and Adolescent Psychiatry

From assessment to outcome, from normal development to unusual syndromes, from theoretical perspectives to treatment, the reader will find this a clear, concise, and invaluable overview of the field.
