46 Fukuoka 812, Japan

Translators

Danielle Joneja—Budd Lake, New Jersey; **Eliza Grabowski**—Calgary, Alberta; **Ulrike Wirsching**—Graz, Austria.

SCOPE OF THE JOURNAL

CLAYS AND CLAY MINERALS is the official publication of **THE CLAY MINERALS SOCIETY**. From 1952 through 1967 the publication took the form of an annual Proceedings Volume composed mainly of the papers presented at the annual Clay Minerals Conferences. In 1968 the publication was expanded to a bi-monthly JOURNAL that is now published by the SOCIETY. The JOURNAL undertakes to publish all articles of interest to the international community of clay scientists, and manuscripts are welcome from all countries.

CLAYS AND CLAY MINERALS aims to present the latest advances in research and technology concerning clays and other fine-grained minerals. Like its parent Society, the JOURNAL strives to promote the advancement of knowledge in many areas of clay science and technology, and it is therefore of value in mineralogy, crystallography, geology, geochemistry, sedimentology, soil science, agronomy, physical chemistry, colloid chemistry, ceramics, petroleum engineering, foundry engineering, soil mechanics, and other disciplines concerned with fine-grained mineral materials. Despite their different backgrounds and special interests, clay scientists and technologists have much in common, as their problems involve the structure, properties, origin, occurrence, and applications of the same minerals. **CLAYS AND CLAY MINERALS** exists to disseminate to its worldwide readership the most recent developments in all of these aspects of clay materials.

Manuscripts that are prepared in English in accordance with the "Instructions for Contributors" on the inside back cover of the JOURNAL should be submitted to the EDITORIAL OFFICE of the Society and will be reviewed by competent referees.

SOCIETY OFFICE**THE CLAY MINERALS SOCIETY**

Susan Wintsch, Manager
P.O. Box 2295
Bloomington, Indiana 47402 U.S.A.
812-332-9600

SUBSCRIPTION OFFICE**CLAYS AND CLAY MINERALS**

P.O. Box 368
Lawrence, Kansas 66044

Communications concerning membership in **THE CLAY MINERALS SOCIETY** should be addressed to the **SOCIETY OFFICE**.

Communications regarding new subscriptions, change of address, nonreceipt of issues, back issues, and reprints should be directed to the **SUBSCRIPTION OFFICE**. Please quote your subscription code number in all correspondence.

SUBSCRIPTION RATE

For libraries, university departments, government laboratories, industrial firms, and other multiple-reader institutions—US \$96.00 (North America), \$110.00 (other). Subscriptions are available on a two-year basis at a reduced rate of US \$185.00 (North America), \$212.00 (other). Bona-fide subscribing members of **THE CLAY MINERALS SOCIETY** receive the JOURNAL as part of their membership. **CLAYS AND CLAY MINERALS** is published bi-monthly by **THE CLAY MINERALS SOCIETY**, and subscriptions are available on a calendar-year basis only. Subscription rates include surface mail delivery in North America and air freight or airmail delivery to all other parts of the world. Prices are subject to change without notice.

Individual readers of this JOURNAL, and nonprofit libraries acting in their behalf, are freely permitted to make fair use of the material in it, such as to copy an article for use in teaching or research. Permission is hereby granted to quote from this JOURNAL in scientific works when an acknowledgment of the source accompanies the work. Reprint of a figure, table, photograph, or other excerpt requires written consent of one of the original authors and notification to **THE CLAY MINERALS SOCIETY** in writing. Reproduction or systematic or multiple reproduction of any material in this JOURNAL (including abstracts) is permitted only under license from **THE CLAY MINERALS SOCIETY**.

Contents

Number 1

Formation of Iddingsite Rims on Olivine: A Transmission Electron Microscope Study <i>R. A. Eggleton</i>	1
Cu ²⁺ Interaction with Microcrystalline Gibbsite. Evidence for Oriented Chemisorbed Copper Ions <i>M. B. McBride, A. R. Fraser, and W. J. McHardy</i>	12
Estimation of Clay Proportions in Mixtures by X-ray Diffraction and Computerized Chemical Mass Balance <i>Mark Hodgson and A. W. L. Dudeney</i>	19
Synthesis of a 10-Å Hydrated Kaolinite <i>P. M. Costanzo, R. F. Giese, Jr., and C. V. Clemency</i>	29
The Influence of Aluminum on Iron Oxides. VIII. Unit-Cell Dimensions of Al-Substituted Goethites and Estimation of Al from Them <i>D. G. Schulze</i>	36
Adsorption of Molybdate Anion (MoO ₄ ²⁻) by Sodium-Saturated Kaolinite <i>P. J. Phelan and S. V. Mattigod</i>	45
Interactions of Polycations of Aluminum and Iron with Clays <i>J. M. Oades</i>	49
Room-Temperature Luminescence from Kaolin Induced by Organic Amines <i>L. M. Coyne, Glenn Pollack, and Roger Kloepping</i>	58
Hydrolysis Kinetics of Organic Chemicals on Montmorillonite and Kaolinite Surfaces as Related to Moisture Content <i>M. M. El-Amamy and Theodore Mill</i>	67
Complexes of Trimethylphosphine and Dimethylphenylphosphine with Co(II) and Ni(II) on Hectorite and on Zeolites X and Y <i>R. A. Schoonheydt, Rudi Van Overloop, Mathieu Van Hove, and Johan Verlinden</i>	74
Obituary —George W. Brindley <i>W. F. Moll</i>	80

Number 2

Review of Cation Ordering in Micas <i>S. W. Bailey</i>	81
Tris(acetylacetonato)silicon(IV) Binding to Montmorillonite and Hydrolysis to Interlayer Silicic Acid <i>C. G. Manos, Jr., M. M. Mortland, and T. J. Pinnavaia</i>	93
Cross-linked Smectites. III. Synthesis and Properties of Hydroxy-Aluminum Hectorites and Fluorhectorites <i>J. Shabtai, Maria Rosell, and M. Tokarz</i>	99
Polymerization of 2,6-Dimethylphenol on Smectite Surfaces <i>B. L. Sawhney, R. K. Kozloski, P. J. Isaacson, and M. P. N. Gent</i>	108
Solubility Measurements of Phases in Three Illites <i>J. A. Kittrick</i>	115
Simplified, Complete CsCl-Hydrazine-Dimethylsulfoxide Intercalation of Kaolinite <i>Craig S. Calvert</i>	125

Surface Potentials Derived from Co-ion Exclusion Measurements on Homoionic Montmorillonite and Illite <i>D. Y. C. Chan, R. M. Pashley, and J. P. Quirk</i>	131
Resilication of Bauxite at the Alabama Street Mine, Saline County, Arkansas, Illustrated by Scanning Electron Micrographs <i>W. D. Keller and O. M. Clarke, Jr.</i>	139
Saponite from Near Ballarat, California <i>J. L. Post</i>	147
Notes An Interstratified Illite/Smectite Mineral from the Hydrothermal Deposit in Sibert, Rhone, France <i>D. Beaufort</i>	154
Influence of Aluminum Substitution on the Color of Synthetic Hematites <i>V. Barron and J. Torrent</i>	157
Book Review High-Voltage Electron Diffraction in the Investigation of Layered Minerals by B. B. Zvyagin, Z. V. Vrublevskaya, A. P. Zhoukhlistov, O. V. Sidorenko, S. V. Soboleva, and A. F. Fedotov <i>S. Đurović</i>	159
Announcement	160

Number 3

Montmorillonite/Illite Stability Diagrams <i>R. M. Garrels</i>	161
Influence of Chloride on the Formation of Iron Oxides from Fe(II) Chloride. I. Effect of [Cl]/[Fe] on the Formation of Magnetite <i>R. M. Taylor</i>	167
Influence of Chloride on the Formation of Iron Oxides from Fe(II) Chloride. II. Effect of [Cl] on the Formation of Lepidocrocite and its Crystallinity <i>R. M. Taylor</i>	175
Characteristics of Ferrihydrites Formed by Oxidation of FeCl ₂ Solutions Containing Different Amounts of Silica <i>Zahurul Karim</i>	181
Exchange and Spectroscopy of Cationic Rhodium Complexes on Hectorite <i>R. A. Schoonheydt, Jozefien Pelgrims, Paul Hendrickx, and Johan Luts</i>	185
Preparation and Handling of Dithionite-Reduced Smectite Suspensions <i>J. W. Stucki, D. C. Golden, and C. B. Roth</i>	191
Cation Distribution, Mössbauer Spectra, and Magnetic Properties of Ferripyrophyllite <i>J. M. D. Coey, F. V. Chukhrov, and B. B. Zvyagin</i>	198
Regular Solution Site-Mixing Model for Chlorites <i>R. K. Stoessel</i>	205
Reactions of Fe ²⁺ and Fe ³⁺ with Calcite <i>R. H. Loeppert and L. R. Hossner</i>	213
Notes Three-Dimensional Order and the Structure of Aniline-Vermiculite <i>P. G. Slade and P. A. Stone</i>	223
Depth and Particle Size Distribution of Talc in a Virginia Piedmont Ultisol <i>W. G. Harris, L. W. Zelazny, and J. C. Baker</i>	227
Use of the (02,11) X-ray Diffraction Reflections to Identify Clays <i>A. K. Helmy, N. Peinemann, and C. Y. Andreoli</i>	231

Two Possible Interpretations of ^{29}Si Nuclear Magnetic Resonance Spectra of Kaolin-Group Minerals <i>J. G. Thompson</i>	233
Apparent Long Spacings from Clay-Water Gels, Glasses, and Crystalline Materials Due to Total Reflection of X-Rays <i>G. W. Brindley and T. C. Simonton</i>	235
Announcements	238
Comment	
Report of The Clay Minerals Society Nomenclature Committee for 1982 and 1983 <i>S. W. Bailey, G. W. Brindley, D. S. Fanning, H. Kodama, and R. T. Martin</i>	239

Number 4

Intercalation Method Using Formamide for Differentiating Halloysite from Kaolinite <i>G. J. Churchman, J. S. Whitton, G. G. C. Claridge, and B. K. G. Theng</i>	241
Comparison of Intercalation Methods for Differentiating Halloysite from Kaolinite <i>B. K. G. Theng, G. J. Churchman, J. S. Whitton, and G. G. C. Claridge</i>	249
Mineralogy and Genetic Relationships of Tonstein, Bentonite, and Lignitic Strata in the Eocene Yegua Formation of East-Central Texas <i>A. L. Senkayi, J. B. Dixon, L. R. Hossner, M. Abder-Ruhman, and D. S. Fanning</i>	259
Hisingerite Material from a Basalt Quarry near Geelong, Victoria, Australia <i>Ahmad Shayan</i>	272
Smectite Interactions with Flavomononucleotide <i>M. M. Mortland, J. G. Lawless, H. Hartman, and R. Frankel</i>	279
Effect of Selective Dissolution on Charge and Surface Properties of an Acid Soil Clay <i>Nancy Cavallero and M. B. McBride</i>	283
Cation and Anion Retention by Natural and Synthetic Allophane and Imogolite <i>C. J. Clark and M. B. McBride</i>	291
Chemisorption of Cu(II) and Co(II) on Allophane and Imogolite <i>C. J. Clark and M. B. McBride</i>	300
Thermodynamic Study of Na-K-Ca Exchange Reactions in Vermiculite <i>Atsuyuki Inoue</i>	311
X-Ray Diffraction Study of Aqueous Montmorillonite Emulsions <i>Yoshiaki Fukushima</i>	320
Reactions of Benzene with Cu(II)- and Fe(III)-Exchanged Hectorites <i>M. P. Eastman, D. E. Patterson, and K. H. Pannell</i>	327
Note	
Influence of Transition Metals on the Formation of Iron Oxides During the Oxidation of Fe(II)Cl ₂ Solution <i>Zahurul Karim</i>	334

Number 5

X-ray Powder Diffraction Identification of Illitic Materials <i>Jan Šrodoň</i>	337
Effects of Reduction and Reoxidation of Structural Iron on the Surface Charge and Dissolution of Dioctahedral Smectites <i>J. W. Stucki, D. C. Golden, and C. B. Roth</i>	350
Effects of Oxidation State of Octahedral Iron on Clay Swelling <i>J. W. Stucki, P. F. Low, C. B. Roth, and D. C. Golden</i>	357

Weathering of Ilmenite in a Lateritic Pallid Zone <i>R. R. Anand and R. J. Gilkes</i>	363
Nontronite in a Deep-Sea Core from the South Pacific <i>A. Singer, P. Stoffers, L. Heller-Kallai, and D. Szafraneck</i>	375
Effect of pH on the Rheology of Marine Clay from the Site of the South Nation River, Canada, Landslide of 1971 <i>J. K. Torrance and Maria Pirnat</i>	384
Crystal Chemistry of Corrensite: A Review <i>M. F. Brigatti and Luciano Poppi</i>	391
Colloid Stability of Clays Using Photon Correlation Spectroscopy <i>B. E. Novich and T. A. Ring</i>	400
Chemisorption of Copper on Hydroxy-Aluminum-Hectorite: An Electron Spin Resonance Study <i>J. B. Harsh, H. E. Doner, and M. B. McBride</i>	407
Mechanism of Sulfate Adsorption by Kaolinite <i>S. M. Rao and A. Sridharan</i>	414
Static and Dynamic Structure of Water in Hydrated Kaolinites. I. The Static Structure <i>P. M. Costanzo, R. F. Giese, Jr., and M. Lipsicas</i>	419
Note Alternation of Clino- and Orthochrysotile in a Single Fiber as Revealed by High-Resolution Electron Microscopy <i>Takayoshi Tanji, Keiji Yada, and Yuichiro Akatsuka</i>	429
Number 6	
Synthesis and Characterization of Zeolites in the System $\text{Na}_2\text{O-K}_2\text{O-Al}_2\text{O}_3\text{-SiO}_2\text{-H}_2\text{O}$ <i>R. J. Donahoe, J. G. Liou, and Sandra Guldman</i>	433
Effects of Exchangeable Cation Composition on the Thermal Expansion/Contraction of Clinoptilolite <i>D. L. Bish</i>	444
Polytypism of Micas. I. MDO Polytypes and Their Derivation <i>K.-O. Backhaus and S. Āuroviĉ</i>	453
Polytypism of Micas. II. Classification and Abundance of MDO Polytypes <i>S. Āuroviĉ, Z. Weiss, and K.-O. Backhaus</i>	464
Relation of Infrared, Crystallochemical, and Morphological Properties of Al-Substituted Hematites <i>V. Barron, J. L. Rendon, J. Torrent, and C. J. Serna</i>	475
Notes Composition of the Controlling Phase in Muscovite Equilibrium Solubility <i>P. E. Rosenberg, J. H. Kittrick, and J. R. Alldredge</i>	480
Hydrogen Positions in Dickite <i>P. K. Sen Gupta, E. O. Schlemper, W. D. Johns, and Fred Ross</i>	483
Book Review Sediment Diagenesis, <i>edited by A. Parker and B. W. Sellwood</i> <i>P. C. Franks</i>	486
Technical Referees, Volume 32, <i>Clays and Clay Minerals</i>	488
Tables of Contents, Volume 32, Number 1–6, <i>Clays and Clay Minerals</i>	491
Author Index, Volume 32, <i>Clays and Clay Minerals</i>	495
Comprehensive Subject, Author, Title Index, Volume 32, <i>Clays and Clay Minerals</i> <i>F. A. Mumpton</i>	496
