Psychological Science

The new bimonthly journal of the American Psychological Society

Editor: William K. Estes
*Department of Psychology, Harvard
University*

Psychological Science is designed to be the forum for research, theory and application in psychology and the closely related behavioural, cognitive, neural and social sciences. The journal also focuses on psychology in government and public affairs

Broad Coverage

Unlike most research journals, **Psychological Science** encourages articles of general theoretical significance, or of broad interest across specialities, and those papers which are written to be intelligible to a wide range of readers. It publishes **general articles** of broad interest on new research developments, new publication in key areas, and on public issues of immediate relevance to psychologists; **research articles** presenting new theory, new data or new methodology; **research reports** – succinct and timely reports of new research findings; **editorial columns and letters**.

Subscription 1991, Volume 2: January, March, May, July, September and November (ISSN 0956-7976): £65/\$100 for institutions; £30/\$50 for individuals

American Psychological Society

The **APS** was founded in 1988 as an independent, multipurpose organization to advance the discipline of psychology; to preserve the scientific base of psychology and its applications; to enhance the quality of graduate education; and to encourage the 'giving away' of psychology in the public interest.

From recent issues...

The Place of Language in a Scientific Psychology – *George A. Miller*

Significance and Remembrance: The Role of Neuromodulatory Systems – *James L. McCaugh*

Towards a Developmental Science – *Robert B. Cairns*

Perception of Synthesized Audible and Visible Speech – *Dominic W. Massaro & Michael M. Cohen*

Behavioral and Brain Sciences

The international Journal of Current Research and Theory with Open Peer Commentary

"Superbly presented...the result is practically a vade mecum or Who's Who in each subject. [Articles are] followed by pithy and often witty comments questioning, illuminating, endorsing or just plain arguing... I urge anyone with an interest in psychology, neuroscience, and behavioural biology, to get access to this journal."

New Scientist

Edited by STEVAN HARNAD,
Princeton, New Jersey, USA

Behavioral and Brain Sciences (BBS) is an international journal providing a special service called Open Peer Commentary to Researchers in any area of psychology, neuroscience, behavioural biology or cognitive science. This unique facility enables researchers to obtain multiple responses to a particularly significant and controversial piece of work from fellow specialists within and across these disciplines. Each article appears simultaneously with accepted commentaries and the author's responses. Consequently authors having published in BBS, often find that they have more than 1000 requests for reprints of their article.

BBS Impact Factor

BBS's success is demonstrated by its ranking in the citation reports: **Science Citation Index - Most Cited Psychology Journal**; **Social Science Citation Index - 3rd most cited out of 1300 journals indexed**; **Science Citation Index - Ranks 50th in Citations out of 3900 journals indexed.**

Significant 'Topics and Comments' in 1990...

Animal Suffering - work of biologist *Marion Dawkins* on improving animal's welfare

Can A Species be Intelligent? - by comparative psychologist *J. Schull*.

Learning and Representation in Connectionist Networks - by cognitive scientists *S. Hanson & D. Burr*

Subscription 1991: Volume 14, March, June, September and December (ISSN 0140-525X) £114 for UK institutions; £120/\$174 for institutions elsewhere; £49/\$73 for individuals; £31/\$42 for students; airmail £21 per year extra

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins throughout, including references and notes, and consecutively numbered. The following information must be given on the first page (title sheet): (1) title and short title for running head (not more than 60 characters); (2) authors' names, and (3) department in which work was done. A short synopsis of about half an A4 page double-spaced must be provided at the beginning of each article. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Contributors should note the following:

1. Italic type should be indicated by underlining and bold type by wavy underlining (italic and bold typefaces should not be used even if they are available).
2. S.I. units should be used throughout in text, figures and tables.
3. Authors should spell out in full any abbreviations used in their manuscripts.
4. Foreign quotations and phrases should be followed by a translation.
5. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by *et al.* (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be typed in alphabetical order on a separate sheet. Examples follow:

Brown, G. W. (1974). Meaning, measurement and stress of life events. In *Stressful Life Events: Their Nature and Effects* (ed. B. S. Dohrenwend and B. P. Dohrenwend), pp. 217–244. John Wiley: New York.

Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136.

Journal titles should always be given in full.

FIGURES AND TABLES Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These should not be included in the text and should be submitted in a form suitable for direct reproduction (the printed version will normally be reduced to 70 mm wide). Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in arabic numerals. Ensure that the figure number is marked on the back of the photograph or artwork together with the name of the author and paper title. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author indicated on the title page. Corrections other than to printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
