The Great Siberian Migration

by Donald W. Treadgold

What were the causes, characteristics, and effects of the great flood of migration over the Ural Mountains into Siberia in the late 19th and 20th centuries? The author studies the background conditions fostering the migration and then the migration itself—its actual course, the establishment of settlements, and the legal, political, and economic factors involved. "Deals in a scholarly and interesting fashion with a subject of great importance to all students of Russian history. The value of Professor Treadgold's contribution is enhanced by the fact that he has paid due attention to some more general problems common to all frontier regions"—*Michael Karpovich, Harvard University.*

The United States and East Central Europe, 1914-1918

A Study in Wilsonian Diplomacy and Propaganda

by Victor S. Mamatey

This is the story of the part played by the United States in the break-up of the old Hapsburg Empire, with the subsequent creation of Czechoslovakia and Yugoslavia, and the final unification of Rumania and Italy. The author focuses on Woodrow Wilson's role in the birth of these nations of East Central Europe, and reconstructs the story of Wilsonian diplomacy and propaganda during World War I. "A significant contribution . . . It correlates for the first time the story of Wilsonian and inter-Allied diplomacy toward central Europe, and is based upon sources in several central European languages."—*Arthur S. Link.* "A first-class and authoritative work. There is every indication that it will be the definitive treatment of the subject."—*S. Harrison Thomson.*

***Russian Fiction
and Soviet Ideology***

ERNEST J. SIMMONS

Professor Simmons discusses Fedin, Leonov, and Sholokhov, the three most important Soviet novelists, in terms of the literary, social, and political forces that have helped to shape their work. In studying the careers of these authors, he describes how, after the period of freedom and experimentation ushered in by the 1917 Revolution, the Soviet leaders steadily increased their controls over artistic expression in order to force it into the mold of socialist realism. By his detailed analysis of their major novels, the author shows how these artists were compelled to adjust themselves to Party dictation in art and still created works of enduring literary merit. \$4.75

***Letters of Gorky and Andreev
1899-1912***

PETER YERSHOV, editor

LYDIA WESTON, translator

These letters from Maxim Gorky to Leonid Nikolaevich Andreev have been translated from a manuscript in the Columbia University Libraries. With the exception of five letters, they are published here for the first time in any language. The letters detail Gorky's friendship and admiration for Andreev and their eventual break because of literary and ideological differences. Gorky's analysis of Andreev's works reveals his critical acumen, and his general observations provide a commentary on the political and literary life of Russia before the outbreak of the Revolution of 1917. As part of the commentary and to clarify the relationship of the two men, several letters of Andreev to Gorky have been included. \$4.50
