Kenyan Communities in the Age of Imperialism

The Central Region in the Late Nineteenth Century

Charles H. Ambler

During the late nineteenth century, Central Kenya’s small agricultural communities struggled to preserve their autonomy despite the expansion of major commerce, the initial penetration of imperial power, and the devastation wrought by drought, epidemic, and famine. Using a regional perspective, Ambler examines the history of Central Kenya during this dynamic period. \$27.00

New Scholarship From Princeton

Galbraith, Harrington, Heilbroner Economics and Dissent in an Age of Optimism *Loren J. Okroi*

In a remarkably lucid style, Loren Okroi analyzes the ideas of three leading reformer-critics in the United States and places their main arguments in the context of the economic, social, and political history of postwar America. In so doing, he provides not only a skillful introduction to American social thought since the 1950s but also a wide-ranging examination of the contemporary failures of American liberal ideology.

As he explicates the works of these three men, it becomes clear that present policy debates have not even begun to resolve the dilemmas their writings have exposed.

"Okroi has made accessible to nonspecialists the major contentions of three figures whom he identifies as leading spokesmen of American democracy cum socialism. . . . Even for someone who has already read most of the books in question, Okroi is a useful reference." —*Robert Lekachman, The City University of New York*

The Politics of Social Policy in the United States

Edited by *Margaret Weir, Ann Shola Orloff, and Theda Skocpol*

This volume places the welfare debates of the 1980s in the context of past patterns of U.S. policy, such as the Social Security Act of 1935, the failure of efforts in the 1940s to extend national social benefits and economic planning, and the backlashes against "big government" that followed reforms of the 1960s and early 1970s.

Historical analysis reveals that certain social policies have flourished in the United States: those that have appealed simultaneously to middle-class and lower-income people, while not involving direct bureaucratic interventions into local communities. The editors suggest how new family and employment policies, devised along these lines, might revitalize broad political coalitions and further basic national values.

The Frozen Revolution

An Essay on Jacobinism

Ferenc Feber

Feber argues that the distinctive, celebrated world-historical pronouncements to which Jacobinism gave rise in fact derived from immediate economic circumstances, and that much of its subsequent impact has stemmed from its critique (protosocialist) of contemporary British industrial capitalism.
