The International  
Journal of Conservation

**Editor:**

Martin Fisher, *Fauna & Flora International, UK*

Published for Fauna & Flora International

*Oryx* - *The International Journal of Conservation* is a quarterly peer-reviewed journal of biodiversity conservation, conservation policy and sustainable use, and the interaction of these subjects with social, economic and political issues. The journal has a particular interest in material that has the potential to improve conservation management and practice, supports the publishing and communication aspirations of conservation researchers and practitioners worldwide and helps build capacity for conservation. Besides articles and short communications, *Oryx* regularly publishes reviews, forum sections and letters, and every issue includes comprehensive reporting of international conservation news.

## **The NAEP needs “You” to serve as an elected at-large Board Member**

NAEP is a voluntary association headed by a Board of Directors. The Board is composed of 12 at-large elected members from the environmental field, four ex-officio members, and one chapter representative for each 150 NAEP members in the Chapter. All serve without compensation. Each year prior to the annual conference, 4 at-large Board Members are elected to serve a three-year term of office. At-large Board Members are expected to attend all of the quarterly board meetings and the annual conference.

The Board establishes policy for the NAEP and the executive administrator assists the Board in implementing all of the programs and practices of the Association. The executive administrator, as well as the conference coordinator, membership coordinator, and the editorial staff and publishers of *Environmental Practice* are responsible to the Board.

The NAEP Board of Directors meets four times each year at various locations around the country. At-large Board Members are expected to attend all of the quarterly board meetings and the annual meeting.

Each Board meets for the first time at the end of the annual conference immediately after the election of officers. It meets again at various locations around the country approximately 3, 6, and 9 months after the annual conference. As a voluntary association, there is no reimbursement for travel expenses or the other costs associated with being on the Board of Directors.

Between Board meetings, the Board of Directors is represented by a five-member Executive Committee. The Executive Committee meets at the discretion of the NAEP president, normally twice-monthly by conference calls.

If you would like to become an at-large member of the Board (or retain your current position on the Board) you are required to complete this Self Nomination Form. To be considered, your Self Nomination Form must be completed by 6:00 PM on December 18, 2009. Forms completed after that date and time may be considered, at the discretion of the Elections Committee.

**For a copy of the Self Nomination Form or to submit your Form, please email [jfmusil@urbanengineers.com](mailto:jfmusil@urbanengineers.com).**

# NAEP Chapters

In addition to membership in the national Association, NAEP maintains a network of regional, state, local and student chapters that offer additional opportunities for professional growth. Check below if you would like to join one of the chapters and include applicable dues in addition to the amount for NAEP membership.

## State/Local Chapters

- Alaska \$25/year
- Arizona \$30/year
- California \$140/year
- Florida \$30/year
- Georgia \$20/year
- Hawaii \$25/year
- Illinois \$35/year
- Indiana \$35/year
- Michigan \$60/year
- Mid-America (IA, KS, MO, NE) \$15/year
- North Carolina \$25/year
- Northwest (OR & WA) \$25/year
- Pennsylvania \$35/year
- Rocky Mountain (CO, ID, MT, NV, UT, WY) \$50/year
- Texas (select one)
  - North Texas \$35/year
  - Texas \$50/year

Membership is individual (not your company's) and non-transferable. Corporate memberships are available; please contact the national office for more information.

Your national dues (see page 1) include a subscription to our journal, *Environmental Practice*. Chapter dues are collected by NAEP on behalf of the affiliated chapters and passed to them along with your name and address. Some chapters are more active than others.

# Code of Ethics and Standards of Practice for Environmental Professionals

The objectives of Environmental Professionals are to conduct their personal and professional lives and activities in an ethical manner. Honesty, justice and courtesy form moral philosophy which, associated with a mutual interest among people, constitute the foundation of ethics. Environmental Professionals should recognize such a standard, not in passive observance, but as a set of dynamic principles guiding their conduct and way of life. It is their duty to practice their profession according to this Code of Ethics.

As the keystone of professional conduct is integrity, Environmental Professionals will discharge their duties with fidelity to the public, their employers, clients, with fairness and impartiality to all. It is their duty to interest themselves in public welfare, and to be ready to apply their special knowledge for the benefit of mankind and their environment.

## *Creed*

The objectives of an Environmental Professional are:

1. to recognize and attempt to reconcile societal and individual human needs with responsibility for physical, natural, and cultural systems.
2. to promote and develop policies, plans, activities and projects that achieve complementary and mutual support between natural and man-made, and present and future components of the physical, natural and cultural environment.

## *Ethics*

As an Environmental Professional I will:

1. be personally responsible for the validity of all data collected, analyses performed, or plans developed by me or under my direction. I will be responsible and ethical in my professional activities.
2. encourage research, planning, design, management and review of activities in a scientifically and technically objective manner. I will incorporate the best principles of the environmental sciences for the mitigation of environmental harm and enhancement of environmental quality.
3. not condone misrepresentation of work I have performed or that was performed under my direction.
4. examine all of my relationships or actions, which could be legitimately interpreted as a conflict of interest by clients, officials, the public or peers. In any instance where I have financial or personal interest in the activities with which they are directly or indirectly involved, I will make a full disclosure of that interest to my employer, client, or other affected parties.
5. not engage in conduct involving dishonesty, fraud, deceit, or misrepresentation or discrimination.
6. not accept fees wholly or partially contingent on the client's desired result where that desired result conflicts with my professional judgment.

## *Guidance for Practice as an Environmental Professional*

As an Environmental Professional I will:

1. encourage environmental planning to begin in the earliest stages of project conceptualization.
2. recognize that total environmental management involves the consideration of all environmental factors including: technical, economical, ecological, and sociopolitical and their relationships.
3. incorporate the best principle of design and environmental planning when recommending measures to reduce environmental harm and enhance environmental quality.
4. conduct my analysis, planning, design and review my activities primarily in subject areas for which I am qualified, and shall encourage and recognize that participation of other professionals in subject areas where I am less experienced. I shall utilize and participate in interdisciplinary teams wherever practical to determine impacts, define and evaluate all reasonable alternatives to proposed actions, and assess short-term versus long-term productivity with and without the project or action.
5. seek common, adequate, and sound technical grounds for communication with and respect for the contributions of other professionals in developing and reviewing policies, plans, activities and projects.
6. determine that the policies, plans, activities or projects in which I am involved are consistent with all governing laws, ordinances, guidelines, plans and policies to the best of my knowledge and ability.
7. encourage public participation at the earliest feasible time in an open and productive atmosphere.
8. conduct my professional activities in a manner that ensures consideration of technically and economically feasible alternatives.

## *Encourage Development of the Profession*

As an Environmental Professional I will:

1. assist in maintaining the integrity and competence of my profession.
2. encourage education and research and the development of useful technical information relating to the environmental field.
3. be prohibited from lobbying in the name of the National Association of Environmental Professionals.
4. advertise and present my services in a manner that avoids the use of material and methods that may bring discredit to the profession

## AFFIRMATION

I hereby affirm and agree that I will abide by the Code of Ethics of the Association. I further understand that falsification of the contents of this application will be grounds for rejection and/or termination of my Association membership and revocation of all benefits resulting there from.

## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

❧❧❧

In the spirit of Cambridge University Press's continued commitment to innovation and enterprise, the Cambridge Library Collection launched in July 2009, making an initial group of 475 out-of-print books available again. Another 1,000 will follow by the end of 2009 and 3,000 titles a year will be added as the program continues.

Drawing from the world-renowned collections in the Cambridge University Library, these books are carefully selected by experts in each subject area because of their scholarly importance or as landmarks in the history of their academic discipline.

Cambridge University Press is using state-of-the-art scanning machines to capture the contents of each book. The files are processed to give a consistently clear, crisp image, and the books finished to the high-quality standard for which the press is recognized around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely.

The Cambridge Library Collection will revive books of enduring scholarly value across a wide range of disciplines in the humanities, social sciences, science and technology.
