
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 72, 2019, which includes print and electronic access, is £667 (USA, Canada and Mexico US \$1204) and includes delivery by air; single parts are available at £121 (USA, Canada and Mexico US \$218) plus postage. The electronic-only price available to institutional subscribers is £517 (USA, Canada and Mexico US \$942). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. The *Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

THE JOURNAL OF NAVIGATION

VOLUME 72 • NUMBER 6 • NOVEMBER 2019

CONTENTS

Verification of AIS Data by using Video Images taken by a UAV <i>Fan Zhou, Shengda Pan and Jingjing Jiang</i>	1345
Inland Ship Trajectory Restoration by Recurrent Neural Network <i>Cheng Zhong, Zhonglian Jiang, Xiumin Chu and Lei Liu</i>	1359
Improved Integral LOS Guidance and Path-Following Control for an Unmanned Robot Sailboat via the Robust Neural Damping Technique <i>Guoqing Zhang, Jiqiang Li, Bo Li and Xianku Zhang</i>	1378
An Accurate Motion Compensation for SAR Imagery based on INS/GPS with Dual-filter Correction <i>Linzhou Chen, Zhanchao Liu and Jiancheng Fang</i>	1399
Determination of Seasonality Patterns in the Transport of Cruise Travellers Through Clustering Techniques <i>Jeronimo Esteve-Perez and Antonio Garcia-Sanchez</i>	1417
Determining Restricted Fairway Additional Width due to Bank Effect for Fine Form Vessels <i>Mate Baric, Robert Mohovic and Djani Mohovic</i>	1435
Towards a Model of Regional Vessel Near-miss Collision Risk Assessment for Open Waters based on AIS Data <i>Weibin Zhang, Xinyu Feng, Yong Qi, Feng Shu, Yijin Zhang and Yinhai Wang</i>	1449
Analysis of Speed Prediction Error on Oceanic Flights <i>Ryota Mori</i>	1469
Sensability and Excitability Metrics Applied to Navigation Systems Assessment <i>Martín España, Juan Carrizo and Juan I. Giribet</i>	1481
Probabilities in a Gaussian Cocked Hat <i>Robin G. Stuart</i>	1496
Adaptive Anti-Disturbance Method for Magnetometer and INS Integration in a Road Vehicle <i>Zongkai Wu and Wei Wang</i>	1513
An Integrity Monitoring Algorithm for GNSS Satellite Atomic Clocks <i>X.M. Huang, X. Zhao, J.Y. Li, X.W. Zhu and G. Ou</i>	1533
A High-Sensitivity Acquisition Algorithm for BeiDou Signals with NH Code <i>Rongbing Li, Zhifeng Han, Jianye Liu and Yi Wang</i>	1550
Accuracy Analysis of Ionospheric Prediction Models for Repairing Cycle Slips for BeiDou Triple-Frequency Observations <i>Yao Yifei, Cao Xinyun, Chang Guobin and Geng Hongshuo</i>	1565
Investigation on GEO Satellite Orbit Determination based on CEI Measurements of Short Baselines <i>Zejun Liu, Lan Du, Yongxing Zhu, Zhihan Qian, Jinqing Wang and Shiguang Liang</i>	1585
AUV Bathymetric Simultaneous Localisation and Mapping Using Graph Method <i>Teng Ma, Ye Li, Yusen Gong, Rupeng Wang, Mingwei Sheng and Qiang Zhang</i>	1602
Precise Bathymetry as a Step Towards Producing Bathymetric Electronic Navigational Charts for Comparative (Terrain Reference) Navigation <i>Andrzej Stateczny, Daria Gronska-Sledz and Weronika Motyl</i>	1623
Evaluation and Application of the GPS Code Observable in Precise Point Positioning <i>Haojun Li, Jingxin Xiao and Bofeng Li</i>	1633
System Reliable Probability for Multi-AUV Cooperative Systems under the Influence of Current <i>Qingwei Liang, Tianyuan Sun and Junlin Ou</i>	1649
FORUM	
GMT and Longitude by Lunar Distance: Two Methods Compared From a Practitioner's Point of View <i>Eric Romelczyk</i>	1660
