

## Review

### World Helicopter and Vertical Flight

*Editor* BASIL ARKELL Subscription rate (Europe), 14/- per annum (6 issues)

There has always been a hard core of helicopter enthusiasts who, not content with existing aeronautical institutions, have set up their own specialized organisation in parallel. The Helicopter Association, now a thriving Society, is a good example. Until now, however, there has been no helicopter magazine and it is good to see this need met by "World Helicopter". One assumes from the sub-title "and vertical flight," that the editor does not intend to limit himself to purely helicopter topics, it looks as though any V T O will qualify—as indeed it should.

The first issue is promising and eminently readable. It is also very pleasantly set out. If the journal continues in this vein, it should quickly take its place in the general aeronautical literature. Certainly one wishes the new venture every success.
