Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 21, 2018 (18 issues):
Internet/print package: £1293/\$2480 Americas only/€2072 EU only
Internet only: £936/\$1775 Americas only/€1488 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

HOT TOPIC – Nutrition and mental health

Nutrition and mental health: bidirectional associations and multidimensional measures
JC van der Pols 829

Dietary patterns and depressive symptoms in a UK cohort of men and women: a longitudinal study
K Northstone, C Joinson and P Emmett 831

Food insecurity, social networks and symptoms of depression among men and women in rural Uganda: a cross-sectional, population-based study
JM Perkins, VN Nyakato, B Kakuhihire, AC Tsai, SV Subramanian, DR Bangsberg and NA Christakis 838

Maternal depression symptoms are highly prevalent among food-insecure households in Ethiopia
SH Gebreyesus, BS Endris, C Hanlon and B Lindtjörn 849

Monitoring and surveillance

Spatiotemporal heterogeneity of malnutrition indicators in children under 5 years of age in Bangladesh, 1999–2011
MT Hasan, AA Mamun, GM Williams and RJS Magalhães 857

Prevalence and temporal trend (2005–2015) of anaemia among children in Northeast Brazil
RC daS Vieira, ARS do Livramento, MSC Calheiros, CMX Ferreira, TR dos Santos, ML de Assunção and H daS Ferreira 868

Thinness in young schoolchildren in Serbia: another case of the double burden of malnutrition?
V Djordjic, J Jorga, S Radisavljevic, I Milanovic, P Bozic and SM Ostojic 877

Surveillance of the armed forces as a sentinel system for detecting adverse effects of dietary supplements in the general population
HR Lieberman, KG Austin and EK Farina 882

Assessment and methodology

Evaluation of food photographs assessing the dietary intake of children up to 10 years old
E Valanou, A Naska, A Barbouni, M Katsoulis, E Peppas, P Vidalis and A Trichopoulos 888

Validation of a photographic seafood portion guide to assess fish and shrimp intakes
AE Mathews, A Al-Rajhi and AS Kane 896

Behavioural nutrition

Social determinants of household food expenditure in Australia: the role of education, income, geography and time
D Venn, J Dixon, C Banwell and L Strazdins 902

Communication barrier in family linked to increased risks for food insecurity among deaf people who use American Sign Language
P Kushalnagar, CJ Moreland, A Simons and T Holcomb 912

Nutritional epidemiology

Suboptimal infant and young child feeding practices among internally displaced persons during conflict in eastern Ukraine
A Summers and OO Bilukha 917

Secular trends in regional differences in nutritional biomarkers and self-reported dietary intakes among American adults: National Health and Nutrition Examination Survey (NHANES) 1988–1994 to 2009–2010
AK Kant and BI Graubard 927

Economics and environment

Economic policy and the double burden of malnutrition: cross-national longitudinal analysis of minimum wage and women's underweight and obesity
AI Conklin, NA Ponce, CM Crespi, J Frank, A Nandi and J Heymann 940

Meeting UK dietary recommendations is associated with higher estimated consumer food costs: an analysis using the National Diet and Nutrition Survey and consumer expenditure data, 2008–2012
NRV Jones, TYN Tong and P Monsivais 948

Exploring the association of urban or rural county status and environmental, nutrition- and lifestyle-related resources with the efficacy of SNAP-Ed (Supplemental Nutrition Assistance Program-Education) to improve food security
RL Rivera, J Dunne, MK Maulding, Q Wang, DA Savaiano, SM Nickols-Richardson and HA Eicher-Miller 957

Community nutrition

Prevalence of breast-feeding and exclusive breast-feeding at 48 h after birth and up to the sixth month in Cyprus: the BrEaST start in life project
M Economou, O Kolokotroni, I Paphiti-Demetriou, C Kouta, E Lambrinou, E Hadjigeorgiou, V Hadjiona, F Tryfonos, E Philippou and N Middleton 967

Interventions

The dietary impact of introducing new retailers of fruits and vegetables into a community: results from a systematic review
RC Woodruff, IG Raskind, DM Harris, JA Gazmararian, M Kramer, R Haardörfer and MC Kegler 981

Changing the restaurant food environment to improve cardiovascular health in a rural community: implementation and evaluation of the Heart of New Ulm restaurant programme
R Lindberg, AC Sidebottom, B McCool, RF Pereira, A Sillah and JL Boucher 992

Public policies

Priority actions for addressing the obesity epidemic in England
F Watson, A Taylor, M Rayner, T Lobstein and R Hinks 1002

Product reformulation and nutritional improvements after new competitive food standards in schools
JL Jahn, JFW Cohen, MT Gorski-Findling, JA Hoffman, L Rosenfeld, R Chaffee, L Smith and EB Rimm 1011
