THE IDEA OF HUMAN RIGHTS

Four Inquiries
MICHAEL PERRY

"[This] is in my view the best thing that this unusually thoughtful legal scholar has yet done. It is hardly possible to exaggerate the importance of the central idea that he is pursuing: that to speak, as so many claim to do, of 'human rights' from a purely secular perspective may well not make any sense. His willingness to

confront the implications of 'the death of God' is precisely what is absent from so much moral, legal, and political rights talk."—Paul Campos, University of Colorado (Boulder)

ACCOUNTABILITY FOR HUMAN RIGHTS ATROCITIES IN INTERNATIONAL LAW

Beyond the Nuremberg Legacy
STEVEN RATNER and JASON ABRAMS

Fifty years after the Nuremberg and Tokyo trials, nations worldwide still struggle with the necessity of holding individuals accountable for human rights violations. This book offers an unprecedented progress report on this crucial enterprise. After examining the scope of international crime, the mechanisms created by states for enforcing laws, and the practical difficulties of applying such laws, the authors conclude their comprehensive study with an important assessment of the future of accountability.

THE STATE OF THE WORLD'S REFUGEES, 1997

UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES

While the plight of uprooted populations continues to be a matter of pressing humanitarian concern, the problem of forced displacement has also assumed a much broader political significance. Refugee movements are undoubtedly a symptom of the injustices and inequities that afflict our world, and are also having an increasingly significant impact on the search for regional and global security. This invaluable book from UNHCR analyzes the international community's evolving response to the problem of forced displacement, focusing on such issues as the rights of asylum seekers, the protection of refugees and internally displaced people, the challenge of repatriation and reintegration, and the reduction of statelessness.

"No one else is as well situated as Irwin Stotzky to comment on the prospects for democracy in Haiti, and he does so superbly."

—John Hart Ely, author of *On Constitutional Ground*

Irwin P. Stotzky

Silencing the Guns in Haiti

The Promise of Deliberative Democracy

Cloth \$24.95

On October 15, 1994, Jean-Bertrand Aristide was returned to power as Haiti's leader, the first time a democratically elected president replaced the de facto military leaders who deposed him. Written by Irwin P. Stotzky, an adviser to Aristide, an expert on Haitian refugee litigation, and a firsthand witness to the events leading to Aristide's reinstatement, *Silencing the Guns in Haiti* is an incisive and moving account of this historical process and explores the uncertain fate of democracy in Haiti today.

"This intriguing and powerful book is one of the most intellectually exciting explorations of the relationship between law, morality, and politics in the transition to democracy that I have read. Irwin Stotzky demonstrates, in the context of the Haitian experience, that political action has a much greater chance of succeeding if it is grounded in rational discourse."—Raúl Alfonsín, former president of Argentina (1983–1989) and leader of the Radical Party

Important International Law Titles from...

HUMAN RIGHTS: GROUP DEFAMATION, FREEDOM OF EXPRESSION AND THE LAW OF NATIONS by *Thomas David Jones*

This book presents a discussion and analysis of the laws governing group defamation and speech inciteful of racial hatred in Great Britain, Canada, India, Nigeria, and the United States. Although there exists no federal group defamation law in the United States, a few state legislatures have promulgated group defamation statutes, while a cause of action for group defamation has been recognized as justiciable in the decision law of other states. The author describes his theory as constitutional minimalism because he does not advocate the legal proscription of all derogatory hate speech. Only the sub-category of hate speech that fulfills the standard elements of proof found in common law defamation claim will be prosecuted criminally by the federal government.

THE OSCE IN THE MAINTENANCE OF PEACE AND SECURITY

Conflict Prevention, Crisis Management and Peaceful Settlement of Disputes

edited by Michael Bothe, Natalino Ronzitti, & Allan Rosas

The Organization for Security and Cooperation in Europe is now a well-established international organization endowed with a sophisticated institutional web, which should allow it to perform the historical task of stabilizing Europe. The book illustrates the OSCE institutional system and gives a critical evaluation of its ability to cope with an evolving European security order. It covers extensively three main subjects, which form the core of the OSCE: human rights (human dimension), peaceful settlement of disputes, and peace-keeping. Consequently, the volume deals with the human dimension mechanisms, the High Commissioner of National Minorities, long-term missions, peace-keeping instruments and OSCE relations with the United Nations and European security organizations, the Valletta mechanism and the OSCE Court of Conciliation and Arbitration.

WAR CRIMES AGAINST WOMEN

Prosecution in International War Crimes Tribunals by *Kelly Dawn Askin*

This book examines laws and customs of war prohibiting rape crimes dating back thousands of years, even though gender-specific crimes, particularly sex crimes, have been prevalent in wartime for centuries. It surveys the historical treatment of women in wartime, and argues that all the various forms of gender-specific crimes must be prosecuted and punished. It reviews the Nuremberg and Tokyo War Crimes Tribunals from a gendered perspective, and discusses how crimes against women could have been prosecuted in these tribunals and suggests explanations as to why they were neglected. It addresses the status of women in domestic and international law during the past one hundred years, including the years preceding World War II and in the aftermath of this war, and in the years immediately preceding the Yugoslav conflict. The evolution of the status and participation of women in international human rights and international humanitarian law is analyzed, including the impact domestic law and practice has had on international law and practice.

POLITICS, VALUES AND FUNCTIONS

International Law in the 21st Century

Essays in Honor of Professor Louis Henkin

edited by Jonathan I. Charney, Donald K. Anton & Mary Ellen O'Connell

The editors and contributors have formed this collection to honor Louis Henkin in his 80th year. He has contributed greatly to the fields of international and constitutional law, to teaching and scholarship, to the international community and to each of the contributors and editors personally. They wanted to acknowledge his outstanding work and they wanted to inspire the next generation of international lawyers by highlighting the impact of Henkin's contribution to international and constitutional scholarship. The editors believe the essays in this book demonstrate tangibly what can be accomplished by a great and committed mind. The international community profits greatly from his commitment.

CONSTITUTIONAL REFORM AND INTERNATIONAL LAW IN CENTRAL AND EASTERN EUROPE

edited by Rein Müllerson, Malgosia Fitzmaurice, & Mads Andenas

The recent developments in central and eastern Europe have changed the political landscape of the world. The dissolution of the Soviet Union, Czechoslovakia and Yugoslavia, the collapse of Communism in Europe, market reforms, and the processes of democratisation are all seminal events affecting not only the countries in transition but other states as well. All these changes presuppose fundamental legal reforms. In this process most of the countries in transition have adopted new constitutions where issues of participation in the international political order and questions of international law enjoy a prominent place. This book is one outcome of many research activities concerning these transitions in central and eastern Europe at the Centre of European Law, King's College London. It contains essays about constitutional reforms and international law by leading international judges and academics.

ESSAYS ON THE LAW OF TREATIES *A Collection of Essays in Honour of Bert Vierdag* edited by Jan Klabbers

The present volume contains a collection of essays on various aspects of the law of treaties, written on the occasion of Professor E.W. Vierdag's retirement as Professor of International Law and International Relations at the University of Amsterdam. Written by leading academics in the field as well as practitioners and former practitioners, the essays cover such issues as the relationship between treaties and other legal instruments, various distinct techniques for the conclusion of treaties, and the making of treaties in several areas of contemporary relevance. The essays thereby address issues of relevance not just for academics in the fields of public law and political science, but also for professionals engaged in international negotiations and treaty-making.

INTERNATIONAL HUMAN RIGHTS LAW AND PRACTICE:

Cases, Treaties and Materials & Documentary Supplement

With over 100 countries now recognizing the jurisdictions of these tribunals, the domestic laws and practices of nations increasingly are becoming subject to international judicial scrutiny. No lawyer practicing national law can afford to be unfamiliar with the treaties, case law, and procedures constituting international human rights law and practice because much of international human rights law is legally binding as either customary international law or *jus cogens* in all national courts.

International Human Rights Law & Practice addresses every substantive area of human rights, providing treaties and case excerpts frequently unavailable in law libraries. Most importantly, this book provides a comparative analysis of the international law with US and other national domestic law to give the reader familiar points of reference. Designed with the practitioner in mind, International Human Rights Law & Practice includes rules of procedure and evidence, model pleadings, case flow charts, a trouble-shooting checklist, and a tribunal address directory – all the basic information necessary to practice before international human rights tribunals. Immigration lawyers will learn how to turn an asylum case into an international human rights case challenging the underlying causes for your client's flight from their country. Civil rights and criminal defense lawyers will learn how to take advantage of international law that is both favorable to your client and legally binding on national courts.

Published under the auspices of Rights International, International Human Rights Law & Practice is written and edited by leading human rights scholars and practitioners.

Economic Dimensions in International Law

Comparative and Empirical Perspectives

Jagdeep S. Bhandari and Alan O. Sykes, Editors

The essays in this collection use interdisciplinary perspectives to investigate issues in international and comparative law, primarily employing theoretical or empirical economics. They demonstrate that the economic analysis of law has much to contribute to the study of international matters, despite the fact that mainstream international legal scholars and economists have had relatively little interaction.

NEW RELEASE

*International Compliance with
Nonbinding Accords*

Edited by Edith Brown Weiss

This volume explores the hypothesis that countries under some circumstances comply with nonbinding legal instruments as well as they do with binding ones. Compliance with “soft” law holds important policy implications for the emerging international legal system. The Introduction and eight Chapters of this book take the reader through a variety of theoretical essays and case studies on soft law, identifying the issues and offering preliminary analysis of compliance with soft law in particular fields such as human rights, labor, the environment and economic assistance.

In her Introduction, Edith Brown Weiss sets the stage for soft law within the international legal system, discusses the characteristics of nonbinding legal instruments and introduces the literature on compliance. The theoretical aspects of compliance are covered in Chapters 1—3, while Chapters 4—8 focus on compliance with soft law in discrete areas.

No. 29 in the series, *Studies in Transnational Legal Policy*.
