

At last...a quick, accurate floor test for symptomatic and asymptomatic UTI.

Chemstrip® L/N reveals asymptomatic bacteriuria... can improve patient care.

"Frequency of significant bacteriuria was unexpectedly high (15.5%). Urine culture appears to be indicated when these chemical tests are positive even without...clinical suspicion of infection."¹

"If the strip chemical analysis were used as a screening procedure...for 5 percent of the patients we would have improved the laboratory service by initiating a urine culture that was not ordered, but would have yielded significant bacteriuria."²

"According to our findings...infection appears to be clinically 'silent' in 75 percent of the cases."¹

High predictive value

- Both tests negative—97% predictive in ruling out significant bacteriuria.¹
- Both tests positive—74% predictive of bacteriuria and the need for culture even without microscopic pyuria or clinical suspicion of infection.¹

Chemstrip L/N monitors high-risk patients right on the floor.

An easy dip-and-read, one-minute test strip, Chemstrip L/N simplifies frequent checks of high-risk patients—such as geriatrics, diabetics,

pregnant women, children and catheterized patients. Data on which to base treatment decisions is virtually instantaneous.

Chemstrip L/N monitors antibiotic therapy right on the floor.

Chemstrip L/N is a rapid chemical test that can determine if the antibiotic is working, and/or indicate

when therapy has been successful, without the need for repeated cultures.

Chemstrip L/N meets the need for faster diagnosis, faster treatment decisions.

With the recent emphasis on reduced hospitalization time and the advent of DRGs, procedures that can save time and money *and* result in fast, accurate diagnosis, are becoming increasingly necessary. Chemstrip L/N meets the criteria...it reduces costs, saves time and improves patient care.

You can't beat the system

Cidex*

integrated sterilizing/
disinfecting system

The Solutions

Years of research and clinical experience confirm the efficacy of CIDEX* Solutions and their safety on instruments of all kinds. No other solutions provide a comparable range of benefits.

Only CIDEX Solutions offer you a 14-day solution, a 28-day solution and a machine concentrate to best fit your needs.

The Systems

Save time, minimize handling and risk of equipment damage, maximize efficiency with the right CIDEX Sterilizing/Disinfecting Tray or Bucket System for your job.

The Proof

The two-minute EFFECTIVENESS TEST KITS add a special dimension of safety to your total patient care system.
