

Earth and Environmental

Books and Journals from
Cambridge University Press

Cambridge University Press publishes across the full spectrum of sub-disciplines that comprise the Earth and Environmental Sciences – everything from soil science to space physics and from palaeontology to petroleum geoscience.

We are particularly well known for our comprehensive and world-leading book lists in climate change and solid Earth geophysics.

We publish books ranging in level from undergraduate and graduate textbooks to research monographs, reference volumes, and handbooks for industry practitioners.

We also have an ever-expanding journals portfolio including the prestigious journals of the Paleontological Society from 2015.

Cover Image: November 2007 storm surge eroding the western Netherlands coastal dunes near Bergen aan Zee. During the surge event, the foredune was forced back almost 10 m. This revealed a thick sedimentary archive showing evidence of Holocene coastal processes and events. Photo by: Marcel Bakker, TNO - Geological Survey of the Netherlands.
