

# Econometrics from Cambridge

Now in paperback...

## The History of Econometric Ideas

Mary Morgan

"Morgan has written a fine book.... Morgan's compelling story recaptures the problems and the promise of econometrics past and forces us to think about econometrics future—not about the asymptotic distribution of the latest estimator, but about the relation of economic theory to economic reality." —*Journal of Economic History*

*Historical Perspectives on Modern Economics*

42465-8 Paper \$22.95

## Misspecification Tests in Econometrics

The Lagrange Multiplier Principle and Other Approaches

L. G. Godfrey

"...an extremely valuable and clearly-written guide to a rapidly growing field, that I can recommend alike to practitioners and to students." —*Russell Davidson, Journal of Economic Literature*

*Econometric Society Monographs 16*

42459-3 Paper \$19.95

## Leading Economic Indicators

New Approaches and Forecasting Records

Kajal Lahiri and

Geoffrey H. Moore, Editors

In recent years, significant new developments have emerged in the field of business cycles and economic indicators. This volume contains twenty-two articles by international experts who are working with new and innovative approaches.

Contributors: *Kajal Lahiri, Geoffrey Moore, Frank de Leeuw, Salih N. Neftci, James H. Stock, Mark W. Watson, Michael P. Niemira, Roy H. Webb, Arnold Zeliner, Chansik Hong, Stephen K. McNees, Hermon O. Stekler, Stephen J. Silver, Edward F. Renshaw, Allan P. Layton, Francis X. Diebold, Glenn D. Rudebusch, Victor Zarnowitz, Howard L. Roth, James M. Boughton, William H. Branson, Susmita Dasgupta, Ernst A. Boehm, Philip A. Klein and Feliks Tamm.*

43858-6 Paper \$22.95

## The Econometric Analysis of Transition Data

Tony Lancaster

This is the first published exposition of current econometric methods for the study of duration data that focuses primarily on single-spell data, events in which individual agents are observed for a single duration, although some attention is also given to multiple-spell data.

*Econometric Society Monographs 17*  
43789-X Paper \$17.95

## Two-Sided Matching

A Study in Game-Theoretic

Modeling and Analysis

Alvin E. Roth and

Marilda A. Oliveira Sotomayor

"This book chronicles one of the outstanding success stories of the theory of games, a story in which the authors have played a major role: the theory and practice of matching markets.... The authors are to be warmly congratulated for this fine piece of work, which is quite unique in the game-theoretic literature."

—*From the Foreword by Robert Aumann*  
*Econometric Society Monographs 18*  
43788-1 Paper \$17.95

## Papers in Experimental Economics

Vernon L. Smith

Vernon L. Smith is the main creator of the burgeoning discipline of experimental economics. This collection of his papers from 1962 to 1988 surveys major developments in the field from early attempts to simulate economic behavior in now classic double oral auction markets through recent studies of industrial organization and decision making.

## THE TJALLING C. KOOPMANS ECONOMETRIC THEORY PRIZE: 1988–1990

*Econometric Theory* is proud to announce the winning article for *The Tjalling C. Koopmans Econometric Theory Prize* over the period 1988–1990. The prize is jointly supported by the publishers, Cambridge University Press, and Mrs. Truus Koopmans. It is named in honor of Tjalling C. Koopmans, the 1975 Nobel Laureate in economic science. The selection of the winning article was made by the Advisory Board of the Journal and all articles published in *Econometric Theory* (1988–1990) were candidates for the prize except those that were authored or co-authored by the Editor and members of the Advisory Board. The prize is accompanied by a financial award of \$1,000.

The award of the prize is for articles published in *Econometric Theory* over the period 1988–1990 inclusive.

The winning article is:

“Ancillarity and the Limited Information Maximum-Likelihood Estimation of a Structural Equation in a Simultaneous Equation System” by Yuzo Hosoya, Yoshihiki Tsukuda and Nobuhiko Terui, *Econometric Theory*, Vol. 5, No. 3, (1989), pp. 385–404.

The citation that accompanies the award was written by the Advisory Board and reads as follows:

In this paper three concepts in current research are focused on the now classical econometric methodology of limited information maximum likelihood estimation in simultaneous equation models. The model under the assumption of normality constitutes a curved exponential family of distributions. The effect of conditioning on the ancillary statistic of the smallest root of the usual determinantal equation is analyzed by means of second-order asymptotics. This study gives new insight into a familiar subject and suggests promising approaches to other econometric problems.

Mrs. Truus Koopmans and Cambridge University Press join me in congratulating the authors on their success in receiving this award.

Peter C. B. Phillips  
New Haven, CT

## Announcement

### **CONFERENCE ON DYNAMIC DIS-EQUILIBRIUM MODELLING: Economic and Econometric Theory with Applications**

University of Munich in cooperation with CES—Center for Economic Studies  
August 31–September 4, 1993

The purpose of the conference is to stimulate work on Dynamic Dis-Equilibrium (DDE) Modelling and to further communication among workers employing this methodology.

Contributed papers are invited to allow adequate time for presentation and discussion. Their number has been limited to 20. In addition, there will be four invited surveys on various aspects of DDE modelling.

Contributed papers must be related to the general theme of the conference. The specific applications can be in any area of micro- or macroeconomics.

Preference will be given to papers that combine a firm grounding in economic theory with empirical relevance. The committee is particularly interested in attracting innovative papers that do not fit the current dominant paradigms.

The conference has been scheduled so that it can be conveniently attended by those participating in the prior ESEM and EEA meetings.

Papers should be submitted in triplicate before January 31, 1993.

**Scientific Committee:**

A.R. Bergstrom, University of Essex  
G. Gandolfo, University of Rome  
C. Hillinger, University of Munich  
P.C.B. Phillips, Yale University

Please address submissions and inquiries to:

Prof. Claude Hillinger

# ECONOMETRICS FROM CAMBRIDGE

## **Information, Incentives and the Economics of Control**

*G. C. Archibald*

This book examines methods for controlling or guiding a sector of the economy that do not require all the apparatus of economic planning or rely on the vain hope of sufficiently "perfect" competition, but instead rely entirely on the self-interest of economic agents and voluntary contract.

33045-9 Hardcover \$39.95

## **The Methodology of Economics**

Or How Economists Explain  
Second Edition

*Mark Blauq*

"This is a well-written and stimulating book... The summaries of the relevant literature are very good; its critical comments are balanced and fair. Many economists will find it a useful book."

—*Journal of Economic Literature*

This book examines the nature of economic explanation. The author introduces current thinking in the philosophy of science and reviews the literature on methodology.

*Cambridge Surveys of Economic Literature*

43061-5 Hardcover \$54.95

43678-8 Paper \$17.95

## **Capital and Credit**

A New Formulation of General  
Equilibrium Theory

*Michio Morishima*

Professor Morishima provides a much-needed synthesis of growth theory and monetary theory, drawing on the work of Schumpeter, Keynes and the prewar neoclassical economists to formulate a capital-theoretic general equilibrium theory.

41840-2 Hardcover \$49.95

## **Advances in Economic Theory: Sixth World Congress**

Volume 1

*Jean-Jacques Laffont, Editor*

These books comprise papers examining the latest developments in economic theory given at the Sixth World Congress of the Econometric Society in Barcelona in August 1990. This is the latest in a series of collections that cover the most active fields in economic theory over a five year period. These books give the reader a unique survey of the most recent advances in economic theory.

Contributors: *Ken Burmore, Eric Van Damme, Drew Fudenburg, Eddie Dekel, David Pearce, John Moore, Ariel Rubenstein, Mathias Dewatripont, Thomas Palfrey*

*Econometric Society Monographs 20*

41666-3 Hardcover \$54.95

Volume 2

*Jean-Jacques Laffont, Editor*

Contributors: *Lawrence Epstein, Milton Harris, Arthur Raviv, Jean Tirole, Patrick Bolton, Darrell Duffice, David Cass, Michael Woodford, Roger Guesnerie, Lawrence Jones, Andreu Mas-Colell*

*Econometric Society Monographs 21*

43019-4 Hardcover \$54.95

*Now in paperback...*

## **Underemployment Equilibria**

Essays in Theory, Econometrics and Policy

*Jacques Drèze*

This selection of the author's work on the topics of stagflation over the past ten years is representative of efforts by European economists to integrate micro and macro-economics, and to use theory for empirical and policy purposes.

43524-2 Paper about \$24.95
