# GET
BASIC

Soap. Its use is the most important factor in preventing the spread of infection.

Software from Epi Systems. Its use is the efficient way to handle the surveillance and prevention of nosocomial infections.

Soap. And software from Epi Systems. The two most basic components of an effective infection control program.

Epi Systems has the infection control software to fit the needs of your hospital. Come by our booth at APIC, May 4-6 in Miami, for a hands-on demonstration.

Epi Systems. Providing epidemiology software for quality care.
