

CLAY MINERALS

VOLUME 18, NUMBER 1, MARCH 1983

CONTENTS

J. DECLEER, W. VIAENE and N. VANDENBERGHE. Relationships between chemical, physical and mineralogical characteristics of the Rupelian Boom Clay, Belgium	1
G. BESSON, R. GLAESER et C. TCHOUBAR. Le césium, revelateur de structure des smectites	11
R. A. EGGLETON, J. H. PENNINGTON, R. S. FREEMAN and I. M. THREADGOLD. Structural aspects of the hisingerite-neotocite series	21
J. A. BAIN and D. J. MORGAN. Laboratory separation of clays by hydrocycloning	33
A. COWKING, M. J. WILSON, J. M. TAIT and R. H. S. ROBERTSON. Structure and swelling of fibrous and granular saponitic clay from Orrock Quarry, Fife, Scotland	49
F. GROUSSET, C. LATOUCHE and N. MAILLET. Clay minerals as indicators of wind and current contribution to post-glacial sedimentation on the Azores/Iceland Ridge	65
A. FONTANAUD and A. MEUNIER. Mineralogical facies of a weathered serpentized lherzolite from the Pyrenees, France	77
G. W. BRINDLEY and T. SUZUKI. Tarasovite, a mixed-layer illite-smectite which approaches an ordered 3:1 layer ratio	89
Notes	
J. M. TAIT, A. VIOLANTE and P. VIOLANTE. Co-crystallization of gibbsite and bayerite with nordstrandite	95
T. HENMI, M. NAKAI, T. SEKI and N. YOSHINAGA. Structural changes of allophanes during dry grinding: dependence on SiO ₂ /Al ₂ O ₃ ratio	101
Book Reviews	109
Corrigenda	115
