

ERRATUM

Jorm, A. F., Duncan-Jones, P. & Scott, R. 'An analysis of the re-test artefact in longitudinal studies of psychiatric symptoms and personality' (Vol. 19, pp. 487–493). In Table 1 (p. 489) the means for two of the variables were incorrect. The correct means are: Affiliative Tendency, Interview 1 mean = 11.75, Interview 2 mean = 11.82; Sensitivity to Rejection, Interview 1 mean = 9.17, Interview 2 mean = 8.89. All other statistics involving these variables are correct.
