Contents

<i>List of Contributors</i>	5
<i>Introduction</i> by the Editors	8
I. Introduction: Unfolding of the Area	
Suiting therapeutic intervention to the scientific models of aetiology J. ZUBIN	9
The dynamics of complex biological–psychosocial systems: four fundamental psycho-biological mediators in the long-term evolution of schizophrenia L. CIOMPI	15
Mediating processes in schizophrenia: towards a new dynamic psychiatry J. S. STRAUSS	22
II. From the Perspective of Neurobiology and Pharmacotherapy	
The Finnish adoptive family study of schizophrenia: possible joint effects of genetic vulnerability and family environment P. TIENARI, I. LAHTI, A. SORRI, M. NAARALA, J. MORING and K.-E. WAHLBERG	29
Thymosthenic agents, a novel approach in the treatment of schizophrenia Y. G. GELDERS	33
A three-component-system hypothesis of psychosis: impairment of binocular depth inversion as an indicator of a functional dysequilibrium H. M. EMRICH	37
Electrodermal activity and its relevance to vulnerability research in schizophrenics R. OLBRICH	40
The dysphoric syndrome in schizophrenia and its implications for relapse S. R. HIRSCH and A. G. JOLLEY	46
III. From the Perspective of Individual Psychology	
Electrodermal activity, expressed emotion and outcome in schizophrenia N. TARRIER	51
Coping with attentional disorders as a systemic process in schizophrenic patients K. ANDRES and H. D. BRENNER	57
Distractibility in schizophrenia: state and trait aspects B. SPRING, M. LEMON, L. WEINSTEIN and A. HASKELL	63
The logical and psychometric prerequisites for cognitive therapy of schizophrenia W. SPAULDING, C. P. GARBIN and W. J. CRINEAN	69
The treatment of basic psychological dysfunctions from a systemic point of view H. D. BRENNER	74

IV. From the Perspective of Person–Environment Relationships

Patient–environment relationships in schizophrenia: information processing, communication deviance, autonomic arousal, and stressful life events

K. H. NUECHTERLEIN, M. J. GOLDSTEIN, J. VENTURA, M. E. DAWSON and J. A. DOANE

Relationship of schizophrenia to the environment

H. FREEMAN

Computerised life chart methods to map domains of function and illustrate patterns of interactions in the long-term course trajectories of patients who once met the criteria for DSM–III schizophrenia

C. M. HARDING, R. V. McCORMICK, J. S. STRAUSS, T. ASHIKAGA and G. W. BROOKS

Patterns of expressed emotion and patient coping styles that characterise the families of recent onset schizophrenics

M. J. GOLDSTEIN, D. J. MIKLOWITZ, A. M. STRACHAN, J. A. DOANE, K. H. NUECHTERLEIN and D. FEINGOLD

Family management programmes for schizophrenic patients. Prevention of relapse and modification of familial communication patterns

K. HAHLWEG, E. FEINSTEIN, U. MÜLLER and M. DOSE

Dissemination of skills training modules to psychiatric facilities: overcoming obstacles to the utilisation of a rehabilitation innovation

R. P. LIBERMAN and T. A. ECKMAN

V. From the Perspective of Self-help and Work with Relatives

Treating prodromal episodes to prevent relapse in schizophrenia

M. I. HERZ, W. GLAZER, M. MIRZA, M. MOSTERT and H. HAFEZ

Vulnerability-linked deficiencies, psychopathology and coping behaviour of schizophrenics and their relatives

W. BÖKER, H. D. BRENNER and S. WÜRGLER

Family discourse: physiological correlates of different degrees of stress

M.-L. KÄSERMANN and A. ALTORFER

What works in work with relatives? – A hypothesis

H. KATSCHNIG and T. KONIECZNA

Index
