

GENETICAL RESEARCH

EDITORIAL BOARD

C. H. WADDINGTON (*Chairman*)
CHARLOTTE AUERBACH D. LEWIS
H. GRÜNEBERG G. PONTECORVO
W. HAYES A. ROBERTSON

EXECUTIVE EDITOR

E. C. R. REEVE

ASSISTANT EXECUTIVE EDITOR

J. O. BISHOP

Volume 10. 1967

CAMBRIDGE
AT THE UNIVERSITY PRESS

1967

*Printed in Great Britain by Spottiswoode, Ballantyne & Co. Ltd.
London and Colchester
and published by the Cambridge University Press
Bentley House, 200 Euston Road, London, N.W.1
American Branch: 32 East 57th Street, New York, N.Y. 10022
Agents in Canada: The Macmillan Company of Canada Limited*

CONTENTS

No. 1 (August 1967)

LAMB, B. C. The differential maturation of asci and its relevance to recombination studies of <i>Neurospora</i> , <i>Sordaria</i> and similar Ascomycetes	page 1
DE GROOT, B. Polarized exclusion of bacteriophage T2 in crosses with T4	13
YOUNG, S. S. Y. Selection for and against a canalized phenotype in <i>Drosophila Melanogaster</i>	21
NOBILI, R. and LUPORINI, P. Maintenance of heterozygosity at the <i>mt</i> locus after autogamy in <i>Euplotes minuta</i> (ciliata Hypotrichida)	35
LHOAS, P. Genetic analysis by means of the parasexual cycle in <i>Aspergillus niger</i>	45
JOHNSON, R. and KIMBER, G. Homoeologous pairing of a chromosome from <i>Agropyron elongatum</i> with those of <i>Triticum aestivum</i> and <i>Aegilops speltoides</i>	63
MCCARTHY, J. C. The effects of inbreeding on the components of litter size in mice	73
PREVOSTI, A. Inversion heterozygosity and selection for wing length in <i>Drosophila subobscura</i>	81
STEWART, J. and SPICKETT, S. G. Genetic variation in diuretic responses: further and correlated responses to selection	95
DAVISON, J., FRAME, R. and BISHOP, J. A partial deletion map of the galactose operon in <i>E. coli</i> K12	107
VAN ABEELLEN, J. H. F and VAN DER KROON, P. H. W. <i>Nijmegen waltzer</i> —a new neurological mutant in the mouse	117
<i>Errata</i>	119

No. 2 (October 1967)

PASZEWSKI, A. A study on simultaneous conversions in linked genes in <i>Ascobolus immersus</i>	page 121
RIYASATY, S. and DAWSON, G. W. P. The recovery of tryptophan A auxotrophs at high frequency in a strain of <i>Salmonella typhimurium</i>	127
RUSSELL, M. A. and SEMEONOFF, R. A serum esterase variation in <i>Microtus agrestis</i> (L).	135
HARTMANN-GOLDSTEIN, I. J. On the relationship between heterochromatization and variegation in <i>Drosophila</i> , with special reference to temperature-sensitive periods	143
CLAXTON, J. H. The initiation and development of the hair follicle population in tabby mice	161
BALL, C. Chromosome instability related to gene suppression in <i>Aspergillus nidulans</i>	173
PUHALLA, J. E. and SRB, A. M. Heterokaryon studies of the cytoplasmic mutant SG in <i>Neurospora</i>	185
HUDSON, D. M., FINLAYSON, J. S. and POTTER, M. Linkage of one component of the major urinary protein complex of mice to the brown coat color locus	195
WILKIE, D., SAUNDERS, G. and LINNANE, A. W. Inhibition of respiratory enzyme synthesis in yeast by chloramphenicol: Relationship between chloramphenicol tolerance and resistance to other antibacterial antibiotics	199

No. 3 (December 1967)

MASON, G. F. Genetic studies on mutations in species A and B of the <i>Anopheles gambiae</i> complex	page 205
WOOD, R. J. A comparative genetical study on DDT resistance in adults and larvae of the mosquito <i>Aedes aegypti</i> L.	219
SITTMAN, K. Penetrance of a rare genetic defect	229
KRZANOWSKA, H. Cell number in relation to heterosis during embryonic growth of mice	235
ARAI, T. and WATANABE, T. Effects of acriflavine on the transfer of episomes and bacterial chromosome in <i>Escherichia coli</i> K-12	241
PANDEY, K. K. <i>S</i> gene polymorphism in <i>Nicotiana</i>	251
SINHA, U. Aromatic amino acid biosynthesis and para-fluorophenyl-alanine resistance in <i>Aspergillus nidulans</i>	261
LABAR, M. M. and IRWIN, M. R. Relationships among interaction products in hybrids between pigeons and doves, following transfer of genes between species	273
SRB, A. M. and JAROLMEN, H. Unbiased second-division segregation in <i>Neurospora</i>	289
KIMBER, G. The recognition of an alien chromosome segment translocated to a wheat chromosome	295
KITAGAWA, O. Genetic divergence in M. Vetukhiv's experimental populations of <i>Drosophila pseudoobscura</i> . IV Relative viability	303
ADAMS, M. S. and NISWANDER, J. D. Developmental 'noise' and a congenital malformation	313
BLEYMAN, L. K. and SIMON, E. M. Genetic control of maturity in <i>Tetrahymena pyriformis</i>	319
MEYNELL, G. G. and LAWN, A. M. The sex factor of colicin factor E1a	323

PLATES should only be included where absolutely essential. They should be supplied as unmounted glossy prints; any lettering to be inserted on them is best indicated on a separate sketch. Please do not damage prints by writing heavily on their backs or by using paper clips.

DIAGRAMS should be about twice the size of the finished block, and the thickness of lines and size of points determined accordingly. They must be drawn in Indian ink on white Bristol Board or tracing linen; graph paper ruled in pale blue (but not other colours) is also acceptable. Lettering should be lightly inserted in soft pencil only, so that the printer can put in the finished lettering.

Legends to illustrations must be given on a separate sheet of paper. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their position indicated on the typescript. It will hasten refereeing if a photograph of each diagram can be supplied with the carbon copy of the paper.

TABLES should each be typed on a separate sheet of paper and their approximate positions in the text indicated on the typescript. Each table should be numbered and carry an appropriate title. The table should be designed, whenever possible, to be printed in the normal orientation of the text. The data should be grouped so as to make the use of rules unnecessary. Vertical rules, in particular, are expensive to print, and will only be included at the Editor's discretion.

FOOTNOTES should be avoided where possible. They can often be incorporated into the text, in parentheses.

SYMBOLS. Italic letters should generally be adopted for both gene symbols and quantities in mathematical formulae. Bold letters add to printing costs, and should only be used where they are necessary to avoid confusion.

SPELLING should follow the *Concise Oxford Dictionary*.

REFERENCES should follow the normal usage in the journal. In the list of references at the end of the paper, titles of periodicals should be abbreviated according to the *World List of Scientific Periodicals* (fourth edition).

PROOFS. Two sets of single-sided page proofs, together with the typescript, of each paper will be sent to the author. The printers' marked proof should be returned after correction to the Executive Editor. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958.

OFFPRINTS. Fifty offprints of each paper, including short papers, are provided free of charge. Additional offprints may be ordered on the form sent out with proofs, provided this is returned within seven days of receipt.
