HUMAN RIGHTS AND PUBLIC HEALTH IN THE AIDS PANDEMIC

Lawrence O. Gostin and Zita Lazzarini

Using the AIDS pandemic as a lens, the authors demonstrate that human health cannot be maintained without respect for the dignity and rights of persons. The authors critically examine such issues as HIV testing, screening, isolation, quarantine, and criminalization of persons with AIDS. They also discuss discrimination and the transmission of HIV and tuberculosis in an occupational health care setting, breast feeding in the less developed countries, and confidentiality and the right of sexual partners to know of exposure to HIV.
