
Essential Titles

The Heroin Stimulus Implications for a Theory of Addiction

by **Roger E. Meyer, M.D.**
University of Connecticut Medical School
and **Steven M. Mirin, M.D.**
Harvard Medical School and McLean Hospital,
Belmont, Massachusetts

"... a historical and pioneering step in clinical research on a major unsolved problem of the bio-social-psychological roots of addiction."

—From the *Foreword* by **Daniel X. Freedman**,
University of Chicago

276 pp., illus., 1979, \$22.50 (\$27.00/£14.18
outside US)

Behavioral Treatment of Alcohol Problems Individualized Therapy and Controlled Drinking

by **Mark B. Sobell**
Vanderbilt University
and **Linda C. Sobell**
Dede Wallace Center and Vanderbilt University

Written by the directors of the Individualized Behavior Therapy experiment, this book provides a thoroughly detailed description of the rationale, methods, and outcome of the study. 242 pp., illus., 1978, \$16.95 (\$20.34/£10.68 outside the US)

Drug and Alcohol Abuse A Clinical Guide to Diagnosis and treatment

by **Marc A. Schuckit, M.D.**
University of California School of Medicine and
Veterans Administration Medical Center, San Diego

Intended to serve the needs of both the clinician handling emergency problems and the students seeking an introduction to abused substances, this volume explains

the characteristics of drug classes, delineates the usual types of difficulties associated with drugs, and demonstrates how this knowledge can be used in a clinical setting. A volume in the *Critical Issues in Psychiatry* series—series editor: Sherwyn M. Woods, M.D., Ph.D. approx. 195 pp., 1979, \$16.95 (\$20.34/£10.68 outside US)

Practical Approaches to Alcoholism Psychotherapy

edited by **Sheldon Zimberg, M.D.**
Hospital for Joint Diseases and Medical Center,
New York

John Wallace, Ph.D.
Putnam County Alcoholism Services, Mahopac,
New York

and **Sheila B. Blume, M.D.**
New York State Division of Alcoholism and
Alcohol Abuse

"... contains a gold mine of information for the clinician who is dealing, on a day-to-day basis, with the person with an alcohol problem."

—**Benjamin Kissen, M.D.**, *Downstate
Medical Center, State University
of New York*

308 pp., illus., 1978, \$20.00 (\$24.00/
£12.60 outside US)

Alcoholism New Directions in Behavioral Research and Treatment

edited by **Peter E. Nathan**
Rutgers University

G. Alan Marlatt
University of Washington, Seattle
and **Tor Løberg**
University of Bergen, Norway

This work includes all major behavior therapy and behavior modification approaches to the treatment of problem drinking and alcoholism, and discusses etiology, epidemiological research, and cognitive approaches to self-control and craving. *NATO Conference Series, Series III: Human Factors, Volume 7*. 414 pp., 1978, \$35.00 (\$42.00/£22.05 outside US)

BRITISH ASSOCIATION FOR BEHAVIOURAL PSYCHOTHERAPY

Chairman: Prof. A. Matthews

Chairman Elect: Mr. I. Burnside

Honorary Treasurer:

Dr. A. J. Norris,
Psychology Dept.,
St. Margaret's Hospital,
Great Barr,
Birmingham B43 7EZ

Membership Secretary:

Mr. H. W. Lomas,
Craig House,
Bank Street, Bury
BL9 0BA

Honorary Secretary:

Ms. C. Dooley,
Psychology Dept.,
St. Olave's Hospital,
Lower Road,
London SE16 2TS

Founder President: Dr. V. Meyer

The British Association for Behavioural Psychotherapy was founded in 1972. It is a multidisciplinary organisation and full membership is restricted to members of the helping professions—psychiatrists, psychologists, social workers, nurses, probation officers, teachers, etc. Its aim is to promote the advancement of the theory and practice of behavioural psychotherapy.

SUBSCRIPTION RATES

The membership fee is £4 per year if paid by standing order or £5 per year if paid by cheque. "Behavioural Psychotherapy" is free to B.A.B.P. members, £4.00 per year for non-members and £5.00 per year for libraries and other institutions.

B.A.B.P. BRANCH SECRETARIES

LONDON

Miss L. Parkinson,
Dept. of Psychology,
Institute of Psychiatry,
DeCrespigny Park,
London SE5 8AF

MIDLAND

Mr. D. C. Rowan,
Midland Nerve Hospital,
Elvetham Road,
Edgbaston B15 2NJ

A comprehensive range of biofeedback instruments for clinical ambulatory and research application

Biofeedback involves the use of sensitive electronic instruments which detect and feed back information on physiological functions of which the patient is not normally aware. This information, available in an auditory or visual form, enables the patient to learn conscious control of the physiological functions associated with many disorders.

Biofeedback Systems markets a range of instruments covering the major feedback modalities, which are functionally engineered to the highest specifications. They all conform to HTM8 electrical safety standards, the only units to meet this requirement, and are backed by a comprehensive five year guarantee. Supplied to more than 250 hospitals and universities in the U.K., they are reliable and flexible in use.

The 80 SERIES are designed for ambulatory use outside the clinic being small, easy to operate and battery-powered. The 100 SERIES are for routine clinical application with portability ensured by compact size and single battery operation. Each unit incorporates feedback facilities appropriate to the modality, with auditory feedback through an internal speaker and visual feedback through a panel-mounted meter. The mains operated 120 SERIES with unsurpassed feedback, data collection and output facilities are suited for use in the most demanding research and clinical applications.

*SCL80 SCL100 skin conductance monitors for use in anxiety reduction, phobias and stress-related disorders.
*EMG80 EMG100 EMG120 electromyographs for use in relaxation therapy, tension headache and muscular disorders.
*T100 temperature monitor for application in migraine, anxiety and circulatory disorders.
*EEG100 electroencephalograph for application in neuroses and relaxation training.

*HR100 heart rate monitor for use in the treatment of hypertension and cardiac arrhythmias
*DI120 digital integrator for use with the EMG120.

For further information about these instruments and for details of books and tape cassettes on biofeedback please contact:
