Nutrition Research Reviews

Volume 30, 2017 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at www.cambridge.org/nrr

Editor-in-Chief

J V Woodside, *Belfast, UK*

Deputy Editor

Jos Houdijk, *Scottish Agricultural College, UK*

Editorial Board

M Ashwell, *Baldock, UK*
E Bandera, *New Brunswick, USA*
J L Black, *Warrimoo, Australia*
D Dardevet, *Theix, France*
C Edwards, *Glasgow, UK*
Javier Gonzalez, *Bath, UK*
C Haskell-Ramsey, *Newcastle, UK*
J M Hibbert, *Atlanta, GA, USA*
T Hill, *Newcastle-upon-Tyne, UK*
J K Lodge, *Newcastle-upon-Tyne, UK*
C Lewis, *Norwich, UK*
H C Lukaski, *Grand Forks, ND, USA*
N W Solomons, *Guatemala City, Guatemala*
W Stonehouse, *Adelaide, Australia*
C M Weaver, *West Lafayette, IN, USA*
K M Younger, *Dublin, Ireland*

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Nutrition Research Reviews is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

Subscription information:
Volume 31 2018 (2 issues)
Internet/print package: £315/\$615 American only/€467 EU only
Internet only: £213/\$395 Americas only/€305 EU only

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Information for Authors: The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Professor Jayne Woodside
Centre for Public Health
Queen's University Belfast
Institute of Clinical Science B
Grosvenor Road
Belfast, BT12 6BJ
UK
Tel: 44(0)2890632585
Fax: 44(0)2890235900
Email: j.woodside@qub.ac.uk

Directions to Contributors: are available from the Editor-in-chief.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Vol. 31 No. 1 June 2018

Denis Burkitt and the origins of the dietary fibre hypothesis

John H. Cummings & Amanda Engineer

Introduction	1
Surgeon Captain T. L. (Peter) Cleave MRCP, RN (1906–1983)	2
G. D. Campbell MD, FRCP, FRS (South Africa) (1925–1998)	3
Cleave and Campbell	3
Neil Stamford Painter, MS (London), FRCS, FACS (1923–1989)	4
A. R. P. Walker PhD, DSc (1913–2007)	6
Hubert (Hugh) Carey Trowell OBE, MD, FRCP (1904–1989)	6
Denis P. Burkitt CMG, MD, FRCS, FRS (1911–1993)	8
Defining dietary fibre	11
Credit to Cleave	12
An abiding truth?	13
Acknowledgements	13
References	13

Determinants of takeaway and fast food consumption: a narrative review

Hayley G. Janssen, Ian G. Davies, Lucinda D. Richardson & Leonard Stevenson

Introduction	16
Methods	17
Out-of-home food consumption	17
Societal influences	18
Individual activity	18
Food environment	20
Socio-economic differences	20
Food production and cost	23
Demographic	23
Biological	27
Psychological	27
Study limitations	27
Implications for policy and practice	29
Conclusion	29
Acknowledgements	29
References	29

Probiotics, prebiotics, synbiotics and insulin sensitivity

Y. A. Kim, J. B. Keogh & P. M. Clifton

Introduction	35
Gut microbiota in individuals with type 2 diabetes mellitus and obesity	35
Probiotics and effects of probiotics on glucose metabolism in human interventions	36
Other fermented food	39
Potential mechanisms of action of probiotics	39
Prebiotics and effects of prebiotics on glucose metabolism in human interventions	40
Fructo-oligosaccharides	40
Inulin	43

Contents

Oligofructose-enriched inulin	43
Resistant starch	43
Other potential prebiotics	43
Potential mechanisms of action of prebiotic-derived SCFA in insulin sensitivity	43
SCFA and free fatty acid receptors	43
Anti-inflammatory effects	43
SCFA and angiotensin-like protein 4	44
SCFA and intestinal gluconeogenesis	44
Synbiotics and effects of synbiotics on glucose metabolism in human interventions	46
Conclusion	46
Acknowledgements	46
References	46

In vitro and *in vivo* antioxidant potential of milks, yoghurts, fermented milks and cheeses: a narrative review of evidence

Anthony Fardet & Edmond Rock

Introduction	52
<i>In vitro</i> studies	53
Dairy products (among food groups)	53
Milk	54
Antioxidants in milk	54
Influence of animal species, fat content, thermal treatments and storage	55
Conclusions	56
Yoghurts and other fermented milks	56
Antioxidant potential	56
Influence of the mammal species	56
Influence of casein polymorphism	57
Influence of fermentation and storage	57
Influence of the probiotic strain	58
Specific case of kefir	59
Influence of <i>in vitro</i> digestion	59
Conclusions	59
Cheeses	59
Influence of cheese processing and composition	59
Influence of ripening time	60
Influence of <i>in vitro</i> digestion	61
Conclusions	61
Animal studies	61
Milk and milk proteins	62
Fermented milks	62
Cheeses	63
Conclusions	63
Human studies	63
Dairy products	63
Milk and milk-derived proteins	63
Fermented milk and probiotic yoghurt	65
Conclusions	65
Conclusions	65
Acknowledgements	66
References	66

Contents

Milk products in the dietary management of childhood undernutrition – a historical review <i>Veronika Scherbaum & M. Leila Srour</i>	
Introduction	71
Terms used in this review	72
Use of milk products in infant and young child feeding until the 20th century	72
Use of milk products in nutrition programmes in the first half of the 20th century	73
Nutritional interventions and protein-role controversies	73
Development of milk products used for dietary interventions	74
Growing commercialisation of ready-to-use foods	75
Strategies to reduce the costs of milk-based ready-to-use foods	75
Limitations of current studies, knowledge gaps and research needs	76
Challenges regarding milk-based dietary interventions	76
Conclusion	77
Acknowledgements	77
References	77
Resveratrol and inflammatory bowel disease: the evidence so far <i>Sandra Nunes, Francesca Danesi, Daniele Del Rio & Paula Silva</i>	
Introduction	85
Resveratrol occurrence and synthesis	85
Absorption, bioavailability and metabolism of resveratrol	86
Effects of resveratrol on inflammation and inflammatory bowel disease	88
Inflammatory bowel disease pathophysiology	88
Effects of resveratrol on inflammation <i>in vitro</i>	88
Effects of resveratrol on inflammation in animal studies	90
Resveratrol in human clinical trials	93
Conclusions	94
Acknowledgements	94
References	95
Evidence for the age-specific relationship of food insecurity and key dietary outcomes among US children and adolescents <i>Heather A. Eicher-Miller & Yanling Zhao</i>	
Introduction	98
Methods	101
Results	101
Children aged 1–5 years	101
Children aged 6–11 years	108
Children aged 12–19 years	108
Discussion	109
Children aged 1–5 years	109
Children aged 6–11 years	109
Children aged 12–19 years	109
Limitations	110
Temporality	110
Specificity	110
Other considerations	111
Conclusion	111
Acknowledgements	111
References	112

Magnesium homeostasis in cattle: absorption and excretion	
<i>Holger Martens, Sabine Leonhard-Marek, Monika Röntgen & Friederike Stumpff</i>	
Introduction	114
Magnesium homeostasis	114
Plasma magnesium	115
Distribution of magnesium	115
Regulation of magnesium homeostasis	115
Mg ²⁺ absorption from the ruminant gastrointestinal tract	115
Site of magnesium absorption	115
Physiological significance of the rumen	116
Absorption from the large intestine	116
Mechanism of ruminal Mg ²⁺ transport	116
Epithelial mechanisms	116
Saturation of Mg ²⁺ transport	117
Modulation of ruminal Mg ²⁺ transport	118
The classical implications of K ⁺	118
Site of K ⁺ effect	118
The effect of K ⁺ and Mg ²⁺ concentrations	118
Meta-analysis of Mg ²⁺ digestion: reduction by K ⁺	118
The role of Na ⁺	119
Protein and ammonia	119
Ruminal pH	120
Mg ²⁺ absorption and readily fermentable carbohydrates	120
Mg ²⁺ intake and digestion	120
Endogenous Mg ²⁺ secretion	121
Animal breeds and Mg ²⁺ absorption	121
Vitamin D and Mg ²⁺ homeostasis	121
Ionophores and Mg ²⁺ digestion	121
Sequestration of magnesium	121
Urinary Mg ²⁺ excretion	121
Mg ²⁺ filtration	122
Re-absorption proximal tubule	122
Re-absorption ascending limb of Henle	122
Re-absorption distal tubule	122
Urinary Mg ²⁺ excretion	122
Interaction of magnesium and calcium	122
Magnesium in milk	123
Magnesium and tetany	123
Plasma Mg ²⁺ and tetany	123
Clinical hypomagnesaemia	123
Impaired function of the central nervous system	123
Subclinical hypomagnesaemia	124
Conclusions and perspectives	124
Acknowledgements	124
References	124
Food pyramid for subjects with chronic pain: foods and dietary constituents as anti-inflammatory and antioxidant agents	
<i>Mariangela Rondanelli, Milena Anna Faliva, Alessandra Miccono, Maurizio Naso, Mara Nichetti, Antonella Riva, Fabio Guerriero, Manuela De Gregori, Gabriella Peroni & Simone Perna</i>	
Introduction	131
Methods	132
