

## Tables

1.1	Gini coefficients across country groups, 1990–2015	<i>page</i> 20
1.2	Pretax income shares of top 10 percent	21
1.3	GP indexes across country groups, 1990–2015	22
1.4	Correlations between GP indexes and Gini coefficients, 1990–2015	23
1.5	GDP-weighted average annual growth rates in GDP per capita, 1990–2015	31
A1.1	Countries in the Gini coefficient sample	46
2.1	Evolution of patenting and scientific publishing, by selected countries	69
2.2	Top innovation-dense Asian agglomerations and national concentration of S&T outputs, 1991–1995 and 2011–2015, selected economies	70
3.1	Indicators on intellectual property and related developments in 2020	86
3.2	Other science, technology, and education indicators in 2020	87
3.3	Volume of invention patent applications and grants on mainland China in 2021	91
3.4	Changes in income inequality from 1995 to 2015	97
7.1	Patents by size and gender of team in Mexico, Brazil, and India	191
7.2	Women’s participation according to innovation nature variables (%)	194
7.3	Women’s propensity to invent, by country	196
7.4	Independent variables and hypothesis	197
7.5	Empirical model outcomes: Factors affecting the propensity of women to invent	198

7A.1	Women inventors from developed countries and scientific women in Brazil, India, and Mexico	208
7A.2	Review of women inventors	210
7A.3	Number of researchers by gender and scientific field, 1996–2000 vis-à-vis 2011–2015	215
10.1	Textual ranking index	271
