JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

MAY 1971

VOL. 13 PART 2

LONGMAN

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Animal Production publishes papers on original research provided that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made.

Contributions may be in the field of animal production, or in any related scientific field. Reports on techniques will be published only as appendices to scientific papers. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. *Notes* are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

Manuscripts should be typewritten in double spacing with wide margins. Each page and the lines on each page should be numbered. *Two* copies of the typescript (one of illustrations) should be sent to

Dr. Gerald Wiener,
Animal Production,
A.R.C. Animal Breeding Research Organisation,
West Mains Road, Edinburgh EH9 3JQ, Scotland

Manuscripts are not returned with proofs; authors should therefore retain copies.

For guidance to the general style which should be adopted in the writing and presentation of papers authors are referred to *General Notes on the Presentation of Scientific Papers* (2nd revised ed., 1965) published by the Royal Society, London (price 25p.). Points of detail applying particularly to *Animal Production* are given below.

Units of Measurement. Metric units should be used whenever possible and exclusively for papers published from 1971 onward. (Exception may be made for papers in series started prior to 1970.)

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board or stout tracing paper. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

The Indian Journal of Animal Sciences

The name of The Indian Journal of Veterinary Science and Animal Husbandry has been changed to The Indian Journal of Animal Sciences. With a view to accommodating the increasing flow of articles, the periodicity of this journal has also been changed into a bi-monthly from a quarterly. This journal, now in its 40th year of publication, presents articles reporting the original research work on different aspects of Animal Sciences—Animal Husbandry, Animal Health, Dairy Science, Dairy Technology, Animal Production, etc.—conducted in India and other countries.

Vitamins in Feeds for Livestock

BY

F. C. AITKEN AND R. G. HANKIN

with a foreword by E. KODICEK

*Technical Communication No. 25
of the Commonwealth Bureau of Animal Nutrition*

This book brings together in a series of tables the best available published information on the vitamin content of feeds for livestock. There is a separate table for each vitamin and in each table critically selected data for each feed are tabulated according to country of origin, stage of development and type of processing of samples. Where possible median, 10th and 90th percentiles have been calculated for samples of a similar nature. The criteria of acceptability of published results and problems of availability of the vitamins to livestock are discussed in the introduction.

Price 65s. (£3.25)

Obtainable from

Index Veterinarius

A COMPLETE BIBLIOGRAPHY
OF VETERINARY LITERATURE

This subject and author index of current literature on veterinary and related sciences is produced by the Commonwealth Bureau of Animal Health and was first published in 1933. It is issued quarterly and each year about 15,000 references are listed.

For compilation of the *Index* 700 periodicals in 22 languages are searched and coverage embraces the whole world.

Annual subscription is £22.50 (\$58.50) (reduced rate to residents in British Commonwealth or Republic of Ireland—£11.25). Orders may be sent to the Central Sales Branch, Commonwealth Agricultural Bureaux, Farnham Royal, Slough, Bucks.

PERFORMANCE RECORDING IN SHEEP

by J. B. Owen

With a foreword by J. L. Read

The application of performance recording to sheep has lagged behind that of other forms of livestock production. Recently, however, interest has been growing in the role of recording in increasing efficiency in the production of wool, mutton, and sheep's milk for cheese. In collecting and making available the somewhat scattered information on sheep recording from various parts of the world, Dr. Owen of the School of Agriculture, Cambridge, has performed a most valuable service to an industry which seems to be at the crossroads.

The book opens with a look at the development of performance recording in livestock breeding in general. After a detailed examination of objectives in sheep improvement, the author considers the use of records in achieving these aims. Accounts of recording schemes already operating in sixteen countries are presented. In many cases, passages are quoted from the regulations of organising bodies, which illustrate how they deal with problems of recording under practical flock conditions.

Technical Communication No. 20 of the Commonwealth Bureau of Animal Breeding and Genetics, Edinburgh.

Automation of CAB Services

The Commonwealth Agriculture Bureaux are introducing computer techniques for the provision of specialist scientific information services for agricultural research workers. The new system will facilitate:

- (a) speedier journal production and earlier notice of papers,
- (b) the inclusion of improved indexes in each journal issue,
- (c) the search of the whole CAB data base to provide special outputs on selected topics, current awareness, personal and group services, annotated bibliographies, etc.,
- (d) the interchange of information with other major information services in this field,
- (e) the supply of magnetic tapes.

Some automated journal production will start in 1972 and further details will be announced in due course

Any enquiries should be addressed to:

**Systems Manager,
Commonwealth Agricultural Bureaux,
Farnham House, Farnham Royal,
SLOUGH SL2 3BN, England.**

CATTLE PRODUCTION IN THE TROPICS

Volume 1—Breeds and Breeding

W J A Payne, MA, Dip Agric, PhD

Volume 1 consists of two parts. In the first the topography, climate and natural vegetation of the tropics are described and details are given as to the total number and distribution of cattle in this region. There is also a description of the methods by which cattle are utilised. The second part deals with the origin of tropical and sub-tropical breeds. They are classified and detailed descriptions are given of their origin, habitat, physical characteristics and utilities. Breeding methods and fertility are discussed in detail.
