

## Subject Index

- Ability, in Negroes, 280-84
- Abortion, 20, 22-23, 83, 104-6, 252
- Acardiac, 45, 193
- Acidosis, fetal, 91
- Adaptive flexibility, 294-96
- Adrenal steroids, 299-300
- Adrenocortical excretion, 132-33
- Aggressive behavior, and blood pressure, 269-72
- Alcoholics, 355
- Alkaline phosphatase, 111-13, 122, 124-25, 353
- Allergy, 239-41, 353  
and digestive apparatus, 240
- American Medical Association, 8
- Anastomoses, in twin placentae, 44-45, 65, 102, 255
- Aneuploidy, 44
- Angina pectoris, and smoking, 235-36, 244, 352
- Animal twins, 142-45, 231
- Anoxia, as cause of fetal or neonatal death, 22-23
- Antonius Geminus, twin brother of the Roman emperor Commodus, 10
- Asphyxia, as cause of fetal or neonatal death, 22
- Association index, 179
- Barron-Welsh art scale, 294-95, 297
- Behavior  
in mental backwardness, 171-72  
mutual imitation of, 273-79  
in social disadaptation, 174-75
- Biometric traits, 150-54
- Birth control, 33-34, 43
- Birth rank  
and mortality, 22  
in psychoneurosis, 319  
in schizophrenia, 329  
and twinning rates, 30-31
- Blazek pygopagus sisters, 214
- Blindness, 346-47
- Blood groups  
ABO system, 232-34  
Xg system, 235-37
- Blood pressure, 242-43, 245  
and personality, 269-72
- Body measurements, 150-52
- Bone age, 75
- Cancer, 12, 61-74, 83-86  
of childhood, 83-86  
of lung, 69, 71-74  
mortality in, 70  
sex in, 70-74  
smoking and, 69, 72-74  
type and site of, 61-63, 69, 72-74
- Cardiovascular diseases, 7, 242-56
- Catecholamines, 299-300
- Centromeric index, 183
- Cephalothoracoomphalopagus, 220-21
- Cerebral palsy, 15
- Ceruloplasmins, 107-10, 122-26
- Character  
motivational aspects of, 291-93  
primary impulses of. *See* Impulses
- Chimerism, 195-97, 231
- Cholesterol, 243-44  
and coronary heart disease, 243, 245
- Cholinesterase, 122-26
- Chromosomes, 12, 44, 46, 176-204  
chimerism, 231  
morphological variability of, 183  
structural alterations of, 184  
troubles of segregation of, 188, 194
- Chronon. *See* Ergon/chronon system
- Cinemanalysis, 285-87
- Clefts, 44, 208, 224-30
- Clubfoot, 164
- Commodus, twin Roman emperor, 10
- Computer selection of twin pairs, 341-43
- Conception, multiple, 83-106. *See also* Twinning
- Concordance-discordance, 44-46, 61-63, 65, 146-49
- Concordance index, 65
- Congenital heart disease, 251-55
- Conjoined twins, 208, 213-16, 220-23  
early records of, 214  
fertility of, 213-15  
frequency of, 221  
origin of, 220-23  
successful separations of, 214-16
- Cooperation. *See* International cooperation
- Coronary heart disease, 243-45, 248-50  
and blood pressure, 243, 245  
and cholesterol, 243, 245  
and lipoprotein fraction, 244-45  
and obesity, 243  
and physical activity, 243  
and smoking, 243, 245, 335
- Corticosteroids, 264-67. *See also* Steroid response  
and intraocular pressure, 264-67
- Craniofacial structure, 226-29
- Creativity, 294-98

- Cri-du-chat*, 46  
 Criminality, 323-26  
   and birth place, 325  
   conditional frequency of, 323  
   influence of twinship on concordance for, 324-25  
   and social class, 325  
 Crossings, 11-12  
 Cytogenetics. *See* Chromosomes
- Deletion, 183  
 Dental age, 75, 79  
 Dermatoglyphics, 157-59, 165-68, 188-89  
   and disease, 157, 188-90  
 Dermatoses, 257  
 Development  
   of bones, 75  
   of personality, 299-302  
   of teeth, 75, 79  
 Diabetes, 87-90, 160-64, 353  
   ocular complications in, 346-47  
   weight at birth and, 40-42  
 Digestive apparatus and allergy, 240  
 Dinamometry, 81  
 Disadaptation. *See* Social disadaptation  
 Down's syndrome, 44-45, 84-85, 111, 113, 191, 193,  
   195-96, 199  
*Drosophila melanogaster*, 12  
 Drugs, sensitivity to, 12  
 DZ twins, probability of, 57-60
- ECG, 244  
 Educational attainment, 140  
 EEG, 55-56, 172  
 Electrophoretic studies, 36, 49, 107-8  
 Embryopathies, 205-9  
 Endocrinology, 107, 134  
 Eng-Chang, 213-15. *See also* Conjoined twins  
   families of, 213-15  
 Enuresis, 258-60  
 Environment, definition of, 273, 275  
 Enzymes, 107-13, 115, 122-26  
   placental, 49-50  
   in viral hepatitis, 333  
 Epidemiology, 331-40  
 Epilepsy, 313  
 Ergon/chronon system, 75, 87, 179, 260, 268, 331  
*Escherichia coli*, 12  
 Esthetic judgment, 294-98  
 Eugenics, 24, 106, 137-38  
 Exogamy, 12  
 Exogenous diseases, 331-40  
 Expressional fluency, 294-96  
 Extraversion, 140  
 Eye studies, twin register for, 344-48
- Face measurements, 151-53  
*Fagus l.*, 12  
 Faustina, Roman empress and mother of twins, 10  
 Faustulus, Latin shepherd, the savior of Romulus  
   and Remus, 10-11  
 Fecundation, 34  
   double, 176-78  
 Feeding, 76-78  
 Fertility, in Negroes vs. Whites, 280-81  
 Fetus  
   acidosis of, 91  
   hypoxia of, 92, 95  
   infection of, 92, 95  
   loss of, 235-37  
   position of, 96-97  
   weight of, 79  
*Folie à deux*, 136
- Gastric secretion, 261-63  
 Genealogical studies, 11  
 Genetic polymorphism, 107, 110  
 Genu valgum, 217-19  
 Glaucoma, 226, 264, 268, 346-47  
 Glutathione, 117-21, 349  
 Glycolysis, 115-16  
 Gonadal dysgenesis, 193, 199-204  
 Gonadotropins, 87, 90, 103  
 Gottschaldt figures, 295-97  
 Grafts, reciprocal  
   of blood stem cells, 195  
   in bovines, 231  
   of embryonic tissue, 177  
   of skin, 45, 189, 231  
 Growth, 75-82
- Head measurements, 150-53  
 Hemoglobins, 36  
 Hemorrhage, as cause of fetal or neonatal death, 22  
 Hepatic tests, 333  
 Hepatitis, viral, 331-34  
 Hermaphroditism, 176-77, 192, 195  
 Heterocaryotic monozygosity, 45, 177, 188-98  
 Hilton conjoined twin sisters, 214  
 Hip-joint luxation, 164  
 Homosexuality, 136-37, 307  
 Horatii and Curiatii legend, 10, 12  
 Hormonal therapy, 103-6  
 Hormones, thyroid, 127-30  
 Hospitalization and concordance rates, 146-49  
 Human genetics, 155-75  
 Hypertension, 184-87, 242, 261-63, 269  
   and peptic ulcer, 261-63  
   and personality, 269-72
- Ideational fluency, 294-96  
 Ig, serum level, 238  
 Immaturity, 303  
   and enuresis, 258-59  
   and schizophrenia, 303  
 Immunology, 12, 231-41  
 Implantation, 34

## Subject Index

- Impulses, primary  
  acquisitive, 291-93  
  combative, 291-93  
  constructive, 291-93  
  curiosity, 291-93  
  danger-avoiding, 291-93  
  food-seeking, 291-93  
  gregarious, 291-93  
  parental, 291-93  
  repulsion, 291-93  
  self-assertive, 291-93  
  sex, 291-93  
  submissive, 291-93
- Inbreeding, 43, 83
- Incompatibility, materno-fetal  
  ABO, 232-33  
  Xg<sup>a</sup>, 235-37
- Infectious diseases, "genetics" of, 331-34, 337
- Inflammation theory, 95
- Inheritance, study of mechanism through twin concordance, 160-4
- Intelligence, 12, 294  
  in Negroes, 280-4
- International cooperation, 341-55
- Intraocular pressure, 264-67  
  and corticosteroids, 264-67, 346
- Intrauterine selection, 83-86
- Intravascular protein mass, 98-101
- IQ, 140, 171  
  in Negroes, 280
- Istituto Mendel, 5, 6, 11, 14, 24, 41, 44, 70, 80, 88, 111, 117, 158, 183, 232, 239, 258, 259, 289, 295, 298, 318, 327, 328, 331, 349
- Judgment, esthetic, 294-98
- Klinefelter's syndrome, 44, 88, 90, 195, 203
- Lactation, 76-78
- Lipoprotein fraction, 244-45, 250  
  and coronary heart disease, 244-45, 250
- Leukemia, 66-67, 71, 180-2, 111-13
- Macrosomy, 40-42  
  and diabetes, 40-42
- Malformations, 7, 45-46, 85-86, 172, 211, 205-30  
  cardiocirculatory, 251-55  
  as cause of fetal or neonatal death, 22-23  
  classification of, 212  
  double. *See* Conjoined twins  
  dysraphic, 230  
  genital, 217-19  
  of limbs, 217-18  
  of skull, 217-18  
  of teeth, 217-18  
  of vertebral column, 217-18
- Marcus Aurelius, Roman emperor father of twins, 10
- Maternal age, 16-18, 26, 28-29, 30-34, 35
- Maternal body composition, 98-101
- Maternal response to twin pregnancy, 98-101
- Medical genetics, 257-68
- Mendel Institute. *See* Istituto Mendel
- Mental backwardness, 15, 171-73, 311-13  
  and physical abnormalities, 311-13
- Metabolism, 107-134
- Methodology of twin studies, 12, 135-54
- Mirror image, 190
- Mitotic index, 179
- Mongolism. *See* Down's syndrome
- Mortality  
  and birth rank, 22  
  fetal and neonatal, 20, 22, 36  
    in American Negroes, 22  
    in American Whites, 22  
    in Puerto Ricans, 22  
  and sex, 20  
  and zygosity, 22
- Mosaic, 44-46, 176-77, 189, 191, 193, 195-96, 199, 202-3
- Moses in Egypt, tale of, 10-11
- Motor behavior, 285-87
- Motor conditioning, 285-87
- Multiple births. *See* Twinning
- Multiple conception, 83-106. *See also* Twinning
- Multiple pregnancy, 83-106. *See also* Twinning
- Multivariate analysis, 150-54
- Myopia, 347-48
- MZ : DZ ratio, 15-16. *See also* Twinning  
  in American Negroes, 16  
  in American Whites, 16  
  in Puerto Ricans, 16
- MZ pair  
  gene concordance in, 12-13  
  heterocaryotic, 45, 177, 188-98  
  probability of, 57, 150, 154  
  psychiatric concordance in, 13  
  psychiatric differences in, 327-28  
  significance of, 12-13  
  significance of discordance in, 300-2
- Negroes  
  ability in, 280-4  
  fertility in, 280-1  
  IQ in, 280  
  social conditions in, 280-4  
  students, 280-4  
  tests in, 284  
  twinning rates in American, 15-23  
  twinning rates in Nigerian, 36-39, 49-52
- Neuropathology, 7, 15, 299-330
- Neuroticism, 140
- Neurosis, 300-1, 318-21. *See also* Psychoneurosis
- NIH (National Institutes of Health), 15, 23, 127, 243, 265, 299, 305, 344
- Nondisjunction, 176-77

- Obesity, and coronary heart disease, 243  
 Obsessive neurosis, 318-22  
 Originality, 294-95, 297  
 Ovulation, 34
- Performance, 80-82  
 Personality, 132-33, 174-75, 269-72  
 and adrenocortical excretion, 132-33  
 and blood pressure, 269-72  
 development of, 299-302  
 Person perception, 273-79  
*Pisum sativum*, 12  
 Phidias, twin statues of, 14  
 Philadelphia chromosome, 181-82  
 Placenta  
 forms of, 49-54  
 twin anastomoses of, 44-45, 65, 102, 255  
 Placental enzymes, 36  
 Placentation, and zygosity determination, 16, 49-54  
 Plasma volume, in twin pregnancy, 98-101  
 Polygamy, 36  
 Polyomyelitis, 337-40  
 and ABO salivary secretion, 340  
 anatomic-clinical concordance for, in MZ twins,  
 337-40  
 synchronous manifestation of, in MZ twins, 337-40  
 Population registration, Swedish system, 351  
 Population studies, 12, 15-35  
 Pregnancy, multiple, 83-106. *See also* Twinning  
 Prematurity, 32  
 Presentation at birth, 96-97  
 Psoriasis, 164, 257  
 Psychiatry, 7, 13, 135-39, 171-73, 299-330  
 Psychological tests, 132, 172, 274-76, 285, 290-1,  
 294-98  
 in Negroes, 284  
 Psychology, 13, 132-34, 269-98  
 Psychoneurosis, 318-21  
 birth rank and, 319  
 incidence of, 318  
 intelligence and personality in, 319-20  
 onset and symptomatology of, 320  
 schizophrenia and, 318  
 sex in, 319  
 weight at birth in, 319  
 Psychopathogenesis, 299-302  
 Psychosis  
 manic-depressive, 164, 307-9  
 senile, 136-37  
 PTC (phenylthiocarbamide), tasting for, 169-70  
 Pure lines, 11
- Quadruplet births, 35
- Rachitism, 164  
 Reaction times, 289-90  
 Respiratory distress, as cause of fetal or neonatal  
 death, 22-23
- Retinopathy, 347  
 Romulus and Remus legend, 3, 9, 10-11

## Subject Index

---

- Total body water, in twin pregnancy, 98-101
- Transaminases, 333
- Translocation, 183
- Traumatism, as cause of fetal or neonatal death, 22-23
- Triplet conception, 35
- Trisomy C, 193
- Trisomy 21, 84-85, 111, 113, 191, 193, 195-97
- Tuberculosis, 135
- Turner's syndrome, 44-45, 88, 90, 188-92, 195, 199-202
- Twin conception, 83-106
- Twin concordance, significance of, 12-13, 160-64
- Twin-family method, 135-39
- Twin hierarchy, 13
- Twin method, 12, 65. *See also* Methodology of twin studies
- Twin models, 141, 146-49
- Twinning
- and ABO blood groups, 232-34
  - and birth control, 33-34, 43
  - familiarity of, 24-25, 35, 37-39
  - genetic determination theories of, 39
  - genetics of, 35, 36-43, 87-90
  - and gonadal dysgenesis, 199-203
  - and hormonal factors, 40, 87-90, 233
  - in illegitimate vs. legitimate maternities, 20, 30
  - and inbreeding, 43
  - incidence of
    - in American Indians, 83-84
    - in American Negroes, 15-23
    - in Belgium, 58
    - in bovines, 142-45, 231
    - in Bulgaria, 35
    - in Caucasian populations, 49
    - in Denmark, 341-43
    - in India, 43
    - in Italy, 24
    - in Nigeria, 36-39, 49-52
    - in Puerto Rico, 15-23
    - in Scotland, 26-29
    - in suburban vs. metropolitan districts, 341-43
    - in UK, 51, 53.
    - in USA, 15-23, 30-34, 51, 53, 84
  - induction of, 14, 87-90, 103-6
  - and Klinefelter's syndrome, 203
  - and maternal age, 16-18, 26, 28-29, 30-34, 35
    - in American Negroes, 16-18
    - in American Whites, 16-18
    - in Puerto Ricans, 16-18
  - and maternal fecundability, 30-34
  - and maternal height, 26, 29
  - and mosaicism, 203
  - and parity, 26-29, 33, 35-36, 38
  - and paternal factors, 36, 38
  - probability of, 24-25
  - and socio-economic conditions, 16, 18-21, 26, 29
  - and special rites, 36
  - in urban vs. rural areas, 30-31, 34, 43
  - variations of, in space and time, 30-34
- Twin pregnancy, 83-106
- maternal weight in, 98-101
  - plasma volume in, 98-101
  - total body water in, 98-101
  - intravascular protein mass, 98-101
  - urinary oestrial excretion, 98-101
- Twin registers, 69, 72, 80, 265, 271, 308, 323, 335, 341-55
- Twins and science, 10-14
- Twins
- legends of, 10-14
  - need for special assistance, 14
  - social interaction patterns, 273-78
- Twin society, 13
- and mental factors, 327-28
- Ulcer, peptic, 184-87, 261-63, 355
- and hypertension, 261-63
  - and smoking, 335
- Umbilical cord, infiltration of, 92-95
- Urinary oestrial excretion, 98-101
- Vascular reactivity, 261-63
- Viral hepatitis, 331-34
- clinical and biochemical concordance for, in MZ twins, 332-34
  - synchronous manifestation of, in MZ twins, 332-34
- Vital capacity, 81
- Weight at birth, 13
- and maternal glycemia, 40-42
  - in siblings of twins, 40-42
  - and thyroid hormones, 127-30
- Weight, genetic determination of, 243
- World Health Organization (WHO), 7, 39, 69, 70, 74, 342, 343, 349, 350, 354
- Zootechny, 142-45
- Zygoty determination, 15, 36, 44-61, 65, 117, 122, 128, 150, 156, 157-59, 165, 168, 190-91, 211, 285, 308, 349-50, 351
- in animal twins, 143
  - and biometric traits, 154
