

# Society for Conservation Biology

A global community of conservation professionals

## 10 benefits of membership

1. Find out about jobs sooner than everyone else
2. Receive *Conservation Letters* free online with every membership
3. Receive discounted rates to all SCB meetings
4. Gain leverage by joining a Section, Chapter, or Working Group
5. Receive free online access to award-winning publications, including *Conservation Biology*, for developing country members
6. Add your voice to SCB's policy actions
7. Receive discounts on affiliated publications
8. Tap into the expertise of thousands of conservation professionals and students
9. Apply for a travel award to the International Congress for Conservation Biology
10. And contribute to the SCB mission of advancing the science and practice of conserving the Earth's biological diversity

Join at [www.conbio.org/join](http://www.conbio.org/join)

## SCB 2010

Conservation for a changing planet  
Edmonton, Alberta, Canada • 3-7 July 2010

Alan P. M. Vaughan, British Antarctic Survey, Cambridge, UK  
Christina L. Hulbe, Portland State University, USA

*Antarctic Science* provides a truly international forum for the broad spread of studies that increasingly characterize scientific research in the Antarctic. These, together with an Editorial discussing broader aspects of science, provide a rich mixture of items to interest researchers in all areas of science.

**Editor-in-Chief**

Stuart J. Marsden, Manchester Metropolitan University, UK

The official journal of BirdLife International, *Bird Conservation International* provides stimulating, international and up-to-date coverage of a broad range of conservation topics, using birds to illuminate wider issues of biodiversity conservation and sustainable resource use. It publishes papers and reviews to promote world-wide research and action for the conservation of birds and the habitats upon which they depend.

## **Editor**

Nicholas V. C. Polunin, University of Newcastle, UK

Environmental Conservation is one of the longest-standing, most highly-cited of the interdisciplinary environmental science journals. It includes research papers, reports, comments, subject reviews, and book reviews addressing environmental policy, practice, and natural and social science of environmental concern at the global level, informed by rigorous local level case studies. The journal's scope is very broad, including issues in human institutions, ecosystem change, resource utilisation, terrestrial biomes, aquatic systems, and coastal and land use management. Selected papers are made freely available online as part of *EC Perspectives*.

**Price information is available at:**

#### THE FLAGSHIP SPECIES FUND

Launched in 2001, FFI's Flagship Species Fund has provided almost £1 million to protect 56 'charismatic' species – species that have important ecological roles and whose protection helps conserve other plants and animals living in the same habitats. These include mountain gorillas, spider monkeys, marine turtles, Cao Vit gibbons, Siamese crocodiles, Irrawaddy dolphins, snow leopards, cheetahs, Sumatran tigers and many others.

#### EMERGENCY RESPONSE

FFI was the only international conservation organisation to help coordinate the immediate emergency response to the Indian Ocean Tsunami in Aceh, Sumatra, in December 2004. FFI has been working in Aceh since 1998, and was able to help where other organisations could not. FFI has developed a post disaster programme, helping to secure a multi-donor grant of US\$17.6 million for forest protection.

*Fauna & Flora International,  
Jupiter House, 4th Floor, Station  
Road, Cambridge, CB1 2JD, UK.  
Tel +44 (0)1223 571000  
Fax +44 (0)1223 461481  
Email: [info@fauna-flora.org](mailto:info@fauna-flora.org)*

*FFI works in over 40  
countries, and is involved  
in more than 180 projects.  
Here are a few of them...*

#### HALTING DEFORESTATION

Working on the front line in the battle against deforestation in Ecuador, FFI has been instrumental in protecting a strip of forest known as the 'Awacachi Corridor', alongside our local partner. By linking two existing nature reserves via this corridor, we've vastly increased its conservation value. Now we must work to reinforce the corridor at the points where it is most vulnerable to logging and conversion to palm oil plantations. Raising the funds necessary to achieve this will be crucial to the project's success.

#### BIODIVERSITY & HUMAN NEEDS

FFI wants to ensure that conservation and rural livelihoods are compatible. In the vast Niassa Reserve in Mozambique we helped develop policies that gave the 20,000 reserve residents a say in how the Reserve is managed and used, to protect their rights and traditional practices. In Liberia we helped to draft national legislation that incorporated community interests into forest land use planning.

**FAUNA & FLORA  
International**  
*Conserving wildlife since 1903*

*Fauna & Flora International is  
the world's longest established  
conservation organisation,  
founded in 1903. We work to  
conserve threatened species  
worldwide, choosing solutions  
that are sustainable, based  
on sound science and take  
account of human needs.*

#### BUSINESS AND BIODIVERSITY

FFI works with the private sector to try to ensure that business activities are not undertaken at the expense of biodiversity. We believe that constructive engagement is key to influencing the environmental policies and practices of business and achieving sustainable development. Our approach involves working with the private sector to enable it to understand and manage its impacts on biodiversity.

***We need your support  
to protect the world's  
threatened species and  
ecosystems worldwide.***

FAUNA & FLORA  
International

Conserving wildlife since 1903

***Has nature inspired you in your lifetime? Give future generations the chance to experience the same wonderful world that you know and love .... leave a legacy to Fauna & Flora International and help us keep the planet the way you remember it.***

*A legacy to us will make the world of difference*

***There can be no more positive act than that of preserving the planet.***

Imagine a planet where the orangutan or the tiger are merely remote references in a text book or where natural history programmes feature only footage of animals kept in captivity because there are too few in the wild to film. This could be the future planet that your grandchildren live in.

The list of species on the brink of extinction has reached unprecedented levels. Habitat loss, overhunting, and many other threats are destroying the earth's ecosystems, and climate change may push some already endangered species over the edge. **We need to act now to save the planet's wild animals and wild places if we want future generations to enjoy them as we do.**

FFI is committed to raising funds to conserve life on Earth, and we are entirely reliant upon subscriptions, donations, grants and legacies to do this. In the face of today's immense environmental challenges, donations in the form of legacies are amongst our greatest chances to fulfil our aims.

Please consider leaving FFI a Gift in your Will. Of course you will want to make provision for your family and close friends first; we only ask that you consider leaving a share of what is left to the conservation of the planet through FFI's work.

You can learn more about how to help FFI in your Will from our website at:  
**[www.fauna-flora.org/legacies.php](http://www.fauna-flora.org/legacies.php)** or call Milly on +44 (0)1223 579018 for a personal chat.

***A Gift in your Will is a simple but effective way for you to make a huge difference to the world you leave for your family.***

## The Direct Debit Guarantee

This guarantee should be detached and retained by the Payer

- This Guarantee is offered by all Banks and Building Societies that take part in the Direct Debit Scheme. The efficiency and security of the scheme is monitored and protected by your own Bank or Building Society.
- If the amounts to be paid or the payment date changes, Fauna & Flora International will notify you 14 days in advance of your account being debited or as otherwise agreed.
- If an error is made by FAUNA & FLORA INTERNATIONAL or by your Bank or Building Society, you are guaranteed a full and immediate refund from your branch of the amount paid.
- You can cancel a Direct Debit at any time by writing to your Bank or Building Society. Please also send a copy of your letter to us so that we can alter our records.

## Instructions for Contributors

*Oryx*—*The International Journal of Conservation*, published quarterly on behalf of Fauna & Flora International, is a journal of biodiversity conservation, conservation policy and sustainable use, and the interactions of these with social, economic and political issues. The journal has a particular interest in material with the potential to improve conservation management and practice. *Oryx* also supports the publishing and communication aspirations of conservation practitioners and researchers worldwide, and helps build capacity for conservation.

*Articles* (2,000–7,000 words), *Reviews* (<7,000 words), *Forum* papers (<4,000 words) and *Short Communications* (<2,000 words) are invited on topics relevant to the journal's focus, including:

- The nature and results of conservation initiatives, including case studies
- Research on the sustainable use of wild species
- Research on the status of threatened species, taxonomic groups or habitats
- Reviews of conservation policy, strategy and legislation in practice
- Planning for species and biodiversity conservation
- The working of international conservation conventions
- The history of conservation, including the role of key people, organizations and initiatives
- The causes and consequences of biodiversity loss
- Case studies of conservation projects and programmes
- The social, economic and political dimensions of conservation

*Reviews* provide comprehensive overviews of a particular conservation topic. *Forum* papers promote debate about current and controversial issues, with critical responses commissioned from one or more authors. *Articles* on the status of threatened species, taxonomic groups or habitats should generally be <4,500 words and have, where relevant, a context beyond that of the subject studied.

**Submission** Online at <http://mc.manuscriptcentral.com/oryx> (see <http://www.oryxthejournal.org> for further advice). **Upon submission the Corresponding Author must confirm that: (1) the submitted manuscript has not been published or submitted for publication elsewhere, (2) all authors have read the submitted manuscript and agreed to its submission, and (3) all authors have abided by the Code of Conduct for authors contributing articles (see *Oryx*, 35, 99–100 or <http://www.oryxthejournal.org>).** If there is overlap with other articles, including any in press or in preparation, this should be stated and the articles in question sent to the Editor. Both quantitative and qualitative methodology used in the reported work should be appropriate to the research question and must be clearly described. Management recommendations should be made where appropriate, and details of any implementation provided. Dates of any fieldwork must be provided and, other than long-term studies, submissions with data >4 years old will not normally be considered.

**Preparation of manuscripts** Consult a recent issue of *Oryx* for general style. Contributions should be in English, with British English spelling and terminology, double-spaced, without footnotes, and with line numbers. Submissions, which can be a single file with all Tables, Figures, Plates and Appendices at the end or with text and other elements in separate files, must be in DOC format (not PDF). For submission, graphics can be in low to medium resolution as long as they are legible, with publication-quality graphics to be provided upon any final acceptance. Cover page should contain title, word count (all inclusive except for Tables and Figure and Plate legends), and full mailing address, e-mail, and address at the time the research was carried out, if different, of the corresponding author and all additional authors. Pages to be numbered, and order of sections to be: cover page, main text, biographical sketches, Tables, Figure and Plate legends, Figures, Plates. Short Communications must not have any subheadings.

**Title** A succinct description of the work (≤20 words) preferably embodying either the aim or the overall conclusion.

**Abstract** In <250 words, the aims, methods, major findings and conclusions; should be informative without reference to the text and should not contain any references or undefined abbreviations.

**Keywords** Up to eight pertinent words or phrases, in alphabetical order.

**Structure** Articles should generally follow the Introduction, Study Area (where appropriate), Methods, Results and Discussion format. Minimize use of other subheadings.

**References** Cited in the text as, for example, Hardcastle & Wilson (1996) or (Leadbeater, 1996). For three or more authors use the first author's surname followed by et al. Multiple references to be in chronological order. Reference list should be in alphabetical order, and article titles and the titles of serial publications to be given in full. If citations and bibliography are prepared using a bibliography manager any field codes, tags or similar must be removed. The following are examples of *Oryx* style:

Beck, B.B., Rapaport, L.G. & Stanley Price, M.R. (1994) Reintroduction of captive-born animals. In *Creative Conservation: Interactive Management of Wild and Captive Animals* (eds P.J.S. Olney, G.M. Mace & A.T.C. Feistner), pp. 265–286. Chapman & Hall, London, UK.

Bowler, M. (1991) *Implications of large predator management on commercial ranchland in Zimbabwe*. MSc thesis, University of Zimbabwe, Harare, Zimbabwe.

Brady, L.D., Huston, K., Jenkins, R.K.B., Kauffmann, J.L.D., Rabearivony, J., Raveloson, G. & Rowcliffe, M. (1996) *UEA Madagascar Expedition '93*. Unpublished Report. University of East Anglia, Norwich, UK.

IUCN (2008) *2008 IUCN Red List of Threatened Species*. IUCN, Gland, Switzerland. <http://www.iucnredlist.org> [accessed 24 July 2008].

LeBoeuf, B.J., Kenyon, K.W. & Villa-Ramirez, B. (1986) The Caribbean monk seal is extinct. *Marine Mammal Science*, 2, 70–72.

MacArthur, R.H. & Wilson, E.O. (1967) *The Theory of Island Biogeography*. Princeton University Press, Princeton, USA.

Sutherland, W.J. (ed.) (1998) *Conservation Science and Action*. Blackwell Science, Oxford, UK.

**Biographical sketches** The research interests of all authors (<150 words total), over and above what is obvious from the subject of the manuscript and the authors' affiliations.

**Tables** Each on a separate page, with captions that are comprehensible without reference to the text.

**Figures & Plates** *Guidelines for the preparation of Figures and Plates* are at <http://www.oryxthejournal.org>

**Appendices** For mathematical or statistical models, lengthy tables, and questionnaires. May be published online-only, depending on length. Online-only appendices can also include Figures and Plates, and these can be in colour.

**Abbreviations** Minimize use, and provide full expansion of any at first mention in the text.

**Symbols, units & currencies** Use SI units (International System of Units, <http://www.bipm.org/en/si/>) and ISO 4217 currency codes ([http://www.iso.org/iso/support/faqs/faqs\\_widely\\_used\\_standards/widely\\_used\\_standards\\_other/currency\\_codes/currency\\_codes\\_list-1.htm](http://www.iso.org/iso/support/faqs/faqs_widely_used_standards/widely_used_standards_other/currency_codes/currency_codes_list-1.htm)).

**Nomenclature** Where necessary, provide the basis used for nomenclature of taxa. The first time a species is mentioned its scientific name should follow without intervening punctuation, thus African elephant *Loxodonta africana*. English names should be in lower case throughout except when they incorporate a proper name.

**Offprints, page charges & colour figures** Contributors receive a PDF file of their article, and may purchase additional hard copy offprints. No page charges are levied. Colour Figures can be published but only at the author's expense.

**Copyright** Authors will be asked, upon acceptance of an article, to transfer copyright to Fauna & Flora International.

**Review** Manuscripts are subject to rigorous peer review. Contributors may suggest appropriate reviewers. For manuscripts with a substantial statistical content, one of the reviewers will be a statistician. The main criteria for acceptance are originality, scientific rigour, an appropriately broad context, relevance to the readership and acceptability of style. We receive more submissions than we are able to publish and the final authority in all matters relating to publication lies with the Editor.

**Proofs** Sent to authors as a PDF file (free viewer available from <http://www.adobe.com>). Corrected proofs must be returned to the Editor within 3 days of receipt; minor corrections can be communicated by e-mail.

The Editor welcomes contributions to the other sections of the journal (deadlines for the January, April, July and October issues are 1 October, 1 January, 1 April and 1 July, respectively), by e-mail to [oryx@fauna-flora.org](mailto:oryx@fauna-flora.org) (see <http://www.oryxthejournal.org> for further advice).

**Letters** Substantial and informative contributions (<700 words) in response to material published in the journal.

**Briefly News** (<6 months old) of general conservation interest based on authoritative published sources (<150 words), including reputable web sites.

**Conservation news** Major recent developments (<6 months old) in conservation or important announcements (<700 words), other than from published sources.

**Grants & Opportunities, Meetings and Publications** Availability of grants or funding opportunities, meeting announcements and book reviews, respectively. Authors and publishers are invited to send publications to the Editor for potential review.

These *Instructions for Contributors* (including the *Guidelines for preparation of Figures & Plates* and the *Code of Conduct for authors contributing articles*) are available on the *Oryx* web site (<http://www.oryxthejournal.org>), from Cambridge University Press (<http://journals.cambridge.org/orx>), or from the Editor, *Oryx—The International Journal of Conservation*, Fauna & Flora International, 4th Floor, Jupiter House, Station Road, Cambridge, CB1 2JD, UK; E-mail [oryx@fauna-flora.org](mailto:oryx@fauna-flora.org); Tel. +44 (0)1223 571000; Fax +44 (0)1223 461481.

- Cover Fish consumption is rising and conservation groups have put considerable effort into educating consumers and changing consumption patterns, including use of labels such as ‘dolphin-safe’ tuna. To reduce overfishing and encourage sustainable fishing practices new market-based tools are now being used. However, consumer confusion and lack of traceability and demonstrably improved conservation status may be impeding further progress. For further details see pages 45–56.
