

GENERAL NOTES

CALIBRATION OF AUDIOMETERS

The Royal National Institute for the Deaf has instituted a service of audiometer calibration for the benefit of hospital boards, local authorities, and firms or private individuals concerned in the measurement of hearing losses. This service is the latest stage in the expansion of the facilities of the R.N.I.D. Technical Department, which already runs a testing service on hearing aids, group-hearing aids and other acoustic apparatus.

The new service, which has the full support of the British Association of Otolaryngologists, is the only service of its kind in England and Wales (one is operated for Scotland by the Western Regional Hospital Board in Glasgow), and it has become necessary owing to the increasing number of audiometers used for testing hearing in E.N.T. Departments of Hospitals, Audiology Clinics, etc., and in industrial organizations for measuring the effects on hearing of industrial noise. Audiometers which are not regularly or accurately calibrated can give false reading for the threshold of hearing or reading which are not comparable with those obtained on instruments at other Clinics, etc.

The R.N.I.D. calibration service, which is under the direction of Dr. T. S. Littler, the Hon. Scientific Adviser of the Institute, will ensure that the readings obtained after calibration are derived from a standard "base" in accordance with the recommendation of the British Standards Institution and will enable the actual sounds used in testing to be adjusted so as to correspond exactly with the settings on the dials.

Applications for the calibration of audiometers, either of individual instruments or on a contract basis for a number of audiometers, should be made to the Secretary, R.N.I.D., 105 Gower Street, London, W.C.1.

XXI SCIENTIFIC MEETING OF THE ITALIAN SOCIETY OF ANGIOLOGY

The scientific meeting will be held in Padua on June 8th-9th, 1963, and will be organized by Professor M. Arslan, Director of the Otorinolaryngologic Clinic of the University of Padua. The meeting is devoted to the following themes: (1) "Angiological arguments of the organs of sense" (panel discussion); (2) "Otorhinolaryngological angiology" (symposium).

The office of the Secretary for the Meeting will be open until May 15th, 1963, at the Dermatologic Clinic of the University of Pisa.
