**SUSPENSION  
 LARYNGOSCOPY  
 APPARATUS**

AFTER PROFESSOR KILLIAN.

As made for MR. W. G. HOWARTH, F.R.C.S.,  
 St. THOMAS'S HOSPITAL.

This modification of Professor Killian's Instrument comprises, with other advantages: mouth-gag with wider opening, adjustable counter-pressure plate, extra long spatula, and improved swing with swivel joint, securing at the same time the most perfect access and comprehensive view possible.

**PRICES.**

Complete, as shown, with upright vertical and horizontal adjustment, clamp for operation table, swing hook, set of spatulae, and electric light, £20 11s. 9d.

Without electric light attachment, £19 7s.

The swing only, with gag and counter-pressure plate, £5 15s. 6d.

**GRANDS PRIX:**

Paris 1900, Brussels 1910, Buenos Aires 1910.

**GOLD MEDAL**  
 Allahabad 1910.

Prepaid Annual Subscription, £1 (5 dollars) post free.

Single Copies, Two Shillings.

We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions.—*British Medical Journal*, May 3, 1890.

**LISTERINE** is an efficient, non-toxic ANTISEPTIC of known and definite power, prepared in a form convenient for immediate use.

It is a saturated solution of boric acid, reinforced by the antiseptic properties of ozoniferous oils.

It is unirritating, even when applied to the most delicate tissue.

It does not coagulate serous albumen.

It is quite generally accepted as the standard antiseptic preparation for use where a poisonous or corrosive disinfectant can not be safely used.

It is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle or douche in catarrhal conditions of the nose and throat.

In proper dilution, it may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

There is no possibility of poisonous effect through the absorption of Listerine.

A pamphlet descriptive of the antiseptic, and indicating its utility in medical, surgical and dental practice, may be had upon application to the manufacturers, Lambert Pharmacal Co., Locust and Twenty-first Streets, St. Louis, Missouri, U.S.A., or to their British Agents, Messrs. S. Maw, Son & Sons, 7-12, Aldersgate Street, London, Eng., but the best advertisement of Listerine is . . . . .

**LISTERINE**

## MEDICAL GRADUATES' COLLEGE AND POLYCLINIC,

22, Cheries Street, Gower Street, London, W.C.

PRESIDENT:

**Sir JAMES CRICHTON-BROWNE, M.D., LL.D., F.R.S.**

The teachers include members of the Staffs of the General and Special Hospitals and Medical Schools of the Metropolis and elsewhere.

The Demonstrations on Friday afternoons at 4 p.m. are devoted to Diseases of the Throat, Nose, Ear and Eye.

Lecture, May 29, at 5.15 p.m.—**DR. WYATT WINGRAVE**.—"The Pathology of 'Sore Throat.'"

Annual Subscription, admitting to all Lectures and Demonstrations, One Guinea.

Special Practical Classes are conducted in Otolaryngology (**DR. DAN MCKENZIE**), Laryngology (**MR. J. GAY FRENCH**), and Rhinology (**MR. STUART-LOW**), etc.

Pathological Investigations of all kinds are carried out in the Laboratory.

Further Particulars may be obtained from the Medical Superintendent,

**MAJOR VINT, M.B., 22, Cheries Street, Gower Street, London, W.C.**

**THE NORMAL TONSIL REPRESENTS A TYPE.**

*Its Scientific Treatment Depends Absolutely upon a Clear Conception  
of what constitutes the Normal Type.*

**THE TONSILS AND THE VOICE**  
**IN SCIENCE, SURGERY, SPEECH AND SONG.**

By **RICHARD B. FAULKNER, M.D.** (Columbia University).

This is the only systematic and classical work on the tonsils ever published. The only work that clearly defines and fully describes the normal tonsil; tells what it is, what it does, what deranges it, and how to cure it. The only work that teaches the principles of diagnosis and formulates the principles of treatment.

The same standard in education that requires an operator on the eye to have full knowledge of the anatomy and physiology of that organ, should apply with equal force to an operator on the tonsil. The positive determination of aetiological and pathologic factors is essential to a reasonable prognosis and a sound line of treatment. To cure the various diseases and to preserve the important functions of the tonsil, requires the most accurate scientific discrimination between affections that are primary, secondary, symptomatic, reflex, mechanical and hyperplastic.

**Prof. A. Jacobi:** "Its learning is astounding; its aims and results are commonsensical and thoroughly practical."

**Prof. F. Massel:** "Its interest—both for science and practice—is great."

**Dr. Frank E. Miller:** "A veritable *Opus Magnus* that should be in every physician's library, within the reach of every voice specialist, singer and all interested in vocal art science, for its conclusions are so definitely drawn and so correct."

**TWO DOLLARS, net. Four hundred pages. Illustrated. Cloth.**

## CLINICAL INSTRUCTION.

**A Clinical Demonstration** on the Diagnosis and Treatment of Selected Cases (Larynx, Nose, Ear) will be given each Monday at 5.30 p.m.

**A Course in Surgical Anatomy and Physiology** will be given each Thursday at 5.30 p.m. These Courses are free to Students of the Hospital. Others a fee of 2 guineas for each Course.

**Practical Instruction** in the Diagnosis and Treatment is given **daily** in the Out-patient Department from 2 to 5 p.m., on Tuesdays and Fridays from 6.30 p.m. to 9 p.m., and Mondays at 9.30 a.m.

**Major Operations** are performed at 10 a.m. on Tuesday, Wednesday, Thursday, Friday, and Saturday, and Fridays at 2 p.m.

**Minor Operations** daily (Mondays excepted) at 9.30 a.m.

**Operative Surgery Classes** can be formed at any time on application.

Practice in Direct **Laryngoscopy, Tracheoscopy, Bronchoscopy,** and **Œsophagoscopy** will be given to Students, to enable them to become familiar with the use and manipulation of the instruments.

Practitioners and Medical Students are admitted to the Practice of the Hospital at a fee of five guineas for three months, eight guineas for six months, or ten guineas for a Perpetual Studentship. Each course may commence at any date. Special terms to men in actual practice who can only attend the hospital once or twice a week.

The Hospital contains 48 beds for In-patients. There is also an Out-patient attendance of nearly 50,000 yearly.

Gentlemen may enter to the practice of **The Throat Hospital** at any time, and on certain conditions eligible for appointment as **Clinical Assistants**, whose duty it is to Assist the Member of the Staff to whom they are appointed.

GEORGE W. BADGEROW, F.R.C.S., *Hon. Med. Sec.*
