Indexing: PDM is covered by Clarivate Analytics services and indexed and abstracted in the Science Citation Index (also known as SciSearch®) and the Journal Citation Reports/ Science Edition. PDM is comprehensively indexed by the US National Library of Medicine (MEDLINE), Scopus®, Cumulative Index to Nursing and Allied Health (CINAHL), and Health Star Cumulative Index. Abstracts and search capability available at <https://www.cambridge.org/core/journals/prehospital-and-disaster-medicine>.

Statement of Peer Review Policy: PDM is a signatory with the International Committee of Medical Journal Editors (ICMJE) and the Committee On Publication Ethics (COPE). All scientific papers published in PDM are submitted to subject content and methods experts for peer review. Authors and reviewers are blinded (not aware of the identity of each other). Peer reviewers must declare that there is not a conflict of interest with any manuscript they agree to review. Peer review is accomplished by means of a standard scoring system and specific comments, the results and contents of which are returned to authors for their review.

Prehospital and Disaster Medicine (PDM) Peer Reviewers

Peer review of manuscripts submitted to PDM is done in a traditional blinded manner with the reviewer and authors unknown to each other. Reviewers for a manuscript are selected based on their recognized areas of expertise. This past year the task of peer review has been made more difficult by a short (usually two weeks) time line for submission of a full review. Full reviews are conducted for original research, systematic reviews, research reports, field reports, and case reports.

The Editorial Staff of Prehospital and Disaster Medicine appreciates the generous support of the Journal by the following reviewers:
