

Directions to Contributors - Concise Version

The *British Journal of Nutrition* publishes original papers, review articles, technical notes and short communications in English in all branches of nutrition. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of *The British Journal of Nutrition* (January or July), or contact the Editorial Office on +44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.

Contributors of accepted articles will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

Page format. The *British Journal of Nutrition* is printed in single-column format (column width of 135mm) with a text area of 135 x 203 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) on the title page of the typescripts.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single-column or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

Illustrations. Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

References. References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Bingham, S. A. & Cummings J. H. (1985). Urine nitrogen as an independent validity measure of dietary intake: a study of nitrogen balance in individuals consuming their normal diet. *American Journal of Clinical Nutrition* 42, 1276-1289.

Haraldsdottir, J. (1989). Dietary history. In *Manual on Methodology for Food Consumption Studies*, pp. 88-92 [M. E. Cameron and W. A. van Staveren, editors]. Oxford: Oxford University Press.

Underwood, E.J. (1977). *Trace Elements in Human and Animal Nutrition*, 5th ed. New York: Academic Press.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E. Sambrook, Executive Editor, The British Journal of Nutrition, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Manuscripts. Four complete copies of the manuscript and artwork should be submitted to:

Dr Keith N Frayn
Chairman of the Editorial Board
The British Journal of Nutrition
The Nutrition Society
10 Cambridge Court
210 Shepherds Bush Road
London W6 7NJ
UK

Contents

Short Communication

- Effect of thiocyanate ingestion through milk on thyroid hormone homeostasis in women.
Kishore K. Banerjee, P. Marimuthu, Piyali Bhattacharyya & Malay Chatterjee 679-681

Human and Clinical Nutrition

- Blood and urine acid-base status of premenopausal omnivorous and vegetarian women.
D. Ball & R. J. Maughan 683-693
- Free-living energy expenditure of adult men assessed by continuous heart-rate monitoring and doubly-labelled water.
Linda Davidson, Geraldine McNeill, Paul Haggarty, John S. Smith & Michael F. Franklin 695-708
- Critical evaluation of the factorial and heart-rate recording methods for the determination of energy expenditure of free-living elderly people.
Beatrice Morio, Patrick Ritz, Elisabeth Verdier, Christophe Montaurier, Bernard Beaufre & Michel Vermorel 709-722
- Dodecanedioic acid infusion induces a sparing effect on whole-body glucose uptake, mainly in non-insulin-dependent diabetes mellitus.
G. Mingrone, A. De Gaetano, A. V. Greco, E. Capristo, G. Benedetti, M. Castagneto & G. Gasbarrini 723-735
- The effects of high oral magnesium supplementation on blood pressure, serum lipids and related variables in apparently healthy Japanese subjects.
Kazuo Itoh, Terukazu Kawasaki & Motoomi Nakamura 737-750
- Influence of malaria on markers of iron status in children: implications for interpreting iron status in malaria-endemic communities.
Bhabani S. Das, David I. Thurnham & Deba B. Das 751-760
- Effect of 3 months vitamin E supplementation on indices of the cellular and humoral immune response in elderly subjects.
Frouwkje G. De Waart, Lützen Portengen, Gert Doekes, Corné J. Verwaal & Frans J. Kok 761-774
- The possible significance of parallel changes in plasma lutein and retinol in Pakistani infants during the summer season.
D. I. Thurnham, C. A. Northrop-Clewes, P. I. Paracha & U. J. McLoone 775-784

Animal Nutrition

- Granulated polyamide as external marker to estimate total faecal excretion of grazing cattle in extensive management systems.
Friedrich Mahler, Eva Schlecht, Mamadou Sangare & Klaus Becker 785-803
- Effects of peroral alanine administration in lactating ewes with decreased availability of glucose.
Kjell Holtenius & Paul Holtenius 805-813
- Influences of dietary methionine and cysteine on metabolic responses to immunological stress by *Escherichia coli* lipopolysaccharide injection, and mitogenic response in broiler chickens.
K. Takahashi, N. Ohta & Y. Akiba 815-821

General Nutrition

- Liver intracellular L-cysteine concentration is maintained after inhibition of the trans-sulfuration pathway by propargylglycine in rats.
Ana Triguero, Teresa Barber, Concha García, Inmaculada R. Puertes, Juan Sastre & Juan R. Viña 823-831
- Stability of the mRNA encoding some pancreatic hydrolases is modulated by dietary protein intake in the rat.
Suzanne Carreira, Christian Fueri, Jean-Claude Chaix & Antoine Puigserver 833-843
- Marked alterations in circulating inflammatory cells during cardiomyopathy development in a magnesium-deficient rat model.
Joseph Kurantsin-Mills, Marie M. Cassidy, Richard E. Stafford & William B. Weglicki 845-855
