VOL. VII, No. 2 Price 12s. 6d. net *April, 1930*

SUBSCRIPTION PRICE PER VOLUME 40s. NET

CONTENTS

- G. L. CLARKE, Change of Phototropic and Geotropic signs in *Daphnia* induced by Changes of Light Intensity.
- HUGH H. DARBY, The Experimental Production of Life Cycles in Ciliates.
- E. R. PARPART AND OTTO GLASER, Temperature and Heart Rate in Chick Embryos.
- E. A. SPAUL AND N. H. HOWES, The Distribution of Biological Activity in the Anterior Pituitary of the Ox.
- M. A. TAZELAAR, The Relative Growth of Parts in *Palaemon carcinus*.
- J. HAMMOND, The Effect of Temperature on the Survival *in vitro* of Rabbit Spermatozoa obtained from the Vagina.
- J. C. MOTTRAM, The Production of Non-Disjunction by γ -Radiation from Radium.
- ARTHUR WALTON, The Effect of Temperature on the Survival *in vitro* of Rabbit Spermatozoa obtained from the *vas deferens*.

OBJECTS
OF THE
Marine Biological Association
OF THE UNITED KINGDOM.

THE ASSOCIATION was founded at a Meeting called for the purpose in March, 1884, and held in the Rooms of the Royal Society of London.

Professor HUXLEY, at that time President of the Royal Society, took the chair, and amongst the speakers in support of the project were the Duke of ARGYLL, Sir LYON PLAYFAIR, Lord AVEBURY, Sir JOSEPH HOOKER, Dr. CARPENTER, Dr. GÜNTHER, Lord DALHOUSIE, Professor MOSELEY, Mr. ROMANES, and Sir E. RAY LANKESTER.

The Association owes its existence and its present satisfactory condition to a combination of scientific naturalists, and of gentlemen who, from philanthropic or practical reasons, are specially interested in the great sea fisheries of the United Kingdom. It is universally admitted that our knowledge of the habits and conditions of life of sea fishes is very small, and insufficient to enable either the practical fisherman or the Legislature to take measures calculated to ensure to the country the greatest return from the "harvest of the sea." Naturalists are, on the other hand, anxious to push further our knowledge of marine life and its conditions. Hence the Association has erected at Plymouth a thoroughly efficient Laboratory, where naturalists may study the history of marine animals and plants in general, and where researches on food-fishes and molluscs may be carried out with the best appliances.

The Laboratory and its fittings were completed in June, 1888, at a cost of some £12,000, and from that time until 1926 a sum of over £6,500 has been spent on additional buildings. Throughout this period investigations, practical and scientific, have been constantly pursued at Plymouth. Practical investigations upon matters connected with sea-fishing are carried on under the direction of the Council; in addition, naturalists from England and from abroad have come to the Laboratory, to carry on their own independent researches, and have made valuable additions to zoological and botanical science, at the expense of a small rent for the use of a working table in the Laboratory and other appliances. The number of naturalists who can be employed by the Association in special investigations on fishery questions, and definitely retained for the purpose of carrying on those researches throughout the year, must depend on the funds subscribed by private individuals and public bodies for the purpose. The first charges on the revenue of the Association are the working of the sea-water circulation in the tanks, stocking the tanks with fish and feeding the latter, the payment of servants and fishermen, the maintenance of a research steamer and other collecting boats, and the salaries of the Resident Director and Staff. At the commencement of this number will be found the names of the gentlemen on the Staff.

The purpose of the Association is to aid at the same time both science and industry. It is national in character and constitution, and its affairs are conducted by a representative Council and an Honorary Treasurer, without any charge upon its funds, so that the whole of the subscriptions and donations received are devoted absolutely to the support of the Laboratory and the prosecution of researches by aid of its appliances. The reader is referred to page 4 of the Cover for information as to membership of the Association.

CONTENTS OF NEW SERIES, Vol. XVI., No. 3.

	PAGE
1. BOTTOM FAUNA AND THE FOOD OF FISHES. By G. A. STEVEN. <i>With 1 Chart and 3 Figures in the Text.</i>	677
2. THE SEASONAL ABUNDANCE AND DISTRIBUTION OF THE PELAGIC YOUNG OF TELEOSTEAN FISHES CAUGHT IN THE RING-TRAWL IN OFFSHORE WATERS IN THE PLYMOUTH AREA. By F. S. RUSSELL. <i>With 2 Figures in the Text.</i>	707
3. HERRING INVESTIGATIONS AT PLYMOUTH. VIII. THE TRANSITION FROM LARVA TO ADOLESCENT. By E. FORD. <i>With 12 Figures in the Text.</i>	723
4. ON THE OCCURRENCE AND HABITS OF THE SIPHONOPHORE, <i>Stephanomia bijuga</i> (DELLE CHIAJE). By N. J. BERRILL. <i>With 1 Figure in the Text.</i>	753
5. AN APPARATUS FOR KEEPING MARINE ORGANISMS UNDER CIRCULATION IN NARROW OBSERVATIONAL TANKS. By A. J. GROVE. <i>With 1 Figure in the Text.</i>	757
6. PRELIMINARY NOTES ON THE BIONOMICS OF THE AMPHIPOD, <i>Corpphium volutator</i> PALLAS. By T. J. HART. <i>With 4 Figures in the Text.</i>	761
7. HYDROGRAPHY OF THE MOUTH OF THE ENGLISH CHANNEL, 1925-1928. By H. W. HARVEY. <i>With 16 Figures in the Text.</i>	791
8. SEASONAL VARIATIONS IN THE PHOSPHATE AND SILICATE CONTENT OF SEA-WATER IN RELATION TO THE PHYTOPLANKTON CROP. PART V. NOVEMBER 1927 TO APRIL 1929, COMPARED WITH EARLIER YEARS FROM 1923. By W. R. G. ATKINS. <i>With 12 Figures in the Text.</i>	821
9. A STUDY OF THE SPRING DIATOM INCREASE IN LOCK STRIVEN. By S. M. MARSHALL AND A. P. ORR. <i>With 15 Figures in the Text.</i>	853
10. BACTERIA OF THE CLYDE SEA AREA: A QUANTITATIVE INVESTIGATION. By BLODWEN LLOYD. <i>With 7 Figures in the Text.</i>	879
11. NOTE ON THE DISTRIBUTION OF <i>Lichina confinis</i> AND <i>L. pygmaea</i> IN THE PLYMOUTH DISTRICT. By GLADYS L. NAYLOR. <i>With 1 Chart.</i>	909
12. ON ABNORMAL CONDITIONS OF THE GILLS IN <i>Mytilus edulis</i> . PART I. ON PERMANENT NATURAL REVERSAL OF THE FRONTAL CILIA ON THE GILL FILAMENTS OF <i>Mytilus edulis</i> . By D. ATKINS. <i>With 35 Figures in the Text.</i>	919
13. ABSTRACTS OF MEMOIRS RECORDING WORK DONE AT THE PLYMOUTH LABORATORY.	971
14. REPORT OF COUNCIL, 1929	987
15. LIST OF ANNUAL SUBSCRIPTIONS PAID DURING THE YEAR, 1ST APRIL, 1929, TO 31ST MARCH, 1930.	1003
16. BALANCE SHEET.	1008
17. LIST OF GOVERNORS, FOUNDERS AND MEMBERS, 1ST JUNE, 1930	1011

NOTICE.

The Council of the Marine Biological Association wish it to be understood that they do not accept responsibility for statements published in this Journal excepting when those statements are contained in an official report of the Council.

TERMS OF MEMBERSHIP.

	£	s.	d.
Annual Members per annum	1	1	0
Life Members Composition Fee	15	15	0
Founders	100	0	0
Governors	500	0	0

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they receive the Journal of the Association free by post; they are admitted to view the Laboratory at Plymouth, and may introduce friends with them; they have the first claim to rent a place in the Laboratory for research, with use of tanks, boats, &c.; and have access to the books in the Library at Plymouth.

All correspondence should be addressed to the Director, The Laboratory, Plymouth.
