

Published four times a year and circulated in over 80 countries, **Community Development Journal** provides an international forum for political, economic and social programmes which link the activities of people with institutions and government. Dealing with the theory and practice of the policies, programmes and methods employed, **Community Development Journal** covers a wide range of topics including, community action, village, town and regional planning, community studies and rural development.

Recent forthcoming articles include:

Donor-dependence or Donor Control? The Case of Mozambique
Julie Cliff

Primary Health Care Implementation: Experiences from South Africa
R. M. Mazibuko

Urban Social Development in France
Crescy Cannon

Resistance to Community-based Disability Facilities
John W. L. Tse

The Plight of the Elderly in Poland
Frances Millard

Participation and Reforestation in Thailand
James A. Hafner

The 1995 special issue is entitled *Perspectives on UK Community Work* (Volume 30, No. 2). The issue contains eight articles reflecting the scope of work in progress in both theoretical and practice-based senses.

Notes for Contributors

All contributions and correspondence should be sent to: Professor Peter G. Coleman, The Editor, *Ageing and Society*, Department of Social Work Studies, University of Southampton, Southampton SO17 1BJ, UK. All books for review should be sent to: Professor Anthony M. Warnes, Department of Health Care of Elderly People, University of Sheffield, Northern General Hospital, Herries Road, Sheffield S5 7AU, UK.

General approach and preparation of manuscripts

Authors are asked to bear in mind the multi-disciplinary and international nature of the readership when writing their contribution. In particular, care should be taken to draw out the implications of the analysis for readers in other fields, other countries, and other disciplines. Stereotypical presentation of individuals or social groupings, including the use of ageist language, should be avoided. Articles should generally contain between 5,000 and 10,000 words, although longer or shorter articles may be accepted by arrangement with the Editor. Articles in the *Forum* section will normally be shorter (3,000–6,000 words). When an article has been accepted for publication, the author is strongly encouraged to send a copy of the final version on computer disk (Apple Macintosh or IBM compatible PC) together with the hard copy typescript, giving details of the wordprocessing software used (Microsoft Word, Word or Word Perfect). However, the publisher reserves the right to typeset material by conventional means if an author's disk proves unsatisfactory.

Submission of an article is taken to imply that it has not previously been published, and is not being considered for publication elsewhere. If an author is publishing a related article elsewhere, this fact should be stated. Contributors of articles or reviews accepted for publication will be asked to assign copyright, on certain conditions, to Cambridge University Press.

Authors of papers should send three copies of their article and keep one copy of the typescript for correcting proofs. Contributions (articles, review articles, reviews) should be clearly typed on one side of A4 (or an equivalent) size paper. All material should be typed double-spaced (including endnotes) with generous margins. The title of the article (with main words in capitals), followed by the author's name and affiliation, on separate lines, and then by an abstract of between 100 and 200 words, should be typed on a removable cover page (to facilitate the anonymous refereeing procedure). The text of the article should start on the next page.

Citation of references

Contributors may follow either the standard conventions: (a) in-text citation of sources (author/date system); (b) citation in notes (the system used in vols 1–9 of *Ageing and Society*).

(a) *In-text citation.* Give author's surname, date of publication and page references (if any) in parentheses in the body of the text, e.g. '(Hendricks and Hendricks 1986: 222)'. A complete list of references cited, arranged alphabetically by authors' surname, should be typed double-spaced at the end of the article in the form:

Hendricks, J. and Hendricks, C. D. 1986. *Ageing in Mass Society: Myths and Realities*, third edition. Little, Brown & Co., Boston & Toronto.

(See further below for citation of edited volumes, articles).

(b) *Citation in notes.* References should be given in notes, numbered consecutively through the typescript with raised numbers, and typed double-spaced at the end of the article. Full publication details should be given in the notes when a work is first cited; for second and subsequent citations a short form may be used. Notes should be presented as follows:

- 1 Kivnick, H. Q., Through the life cycle: psychosocial thoughts on old age. In Pollock G. H. and Greenspan, S. I. (eds), *The Course of Life*, Vol. 5. International Universities Press, Madison, CT, 1989; Dowd, J. J., *Stratification among the Aged*. Brooks/Cole, Monterey, 1989.
- 2 Walker, A., The social creation of poverty and dependency in old age. *Journal of Social Policy*, 9 (1980), 49–75.

Notes other than bibliographical references should be kept to an absolute minimum. If they are essential, they should be numbered consecutively in with the bibliographical notes.

Tables should be clearly laid out on separate pages, numbered consecutively, and designed to fit a printed page of 234 × 155 mm. Titles should be typed above the body of the table, with an initial capital for the first word and proper names only and underlined (for italics). Vertical lines should not be used and horizontal lines should be used only at the top and bottom of the table and below column headings. Totals and percentages should be labelled and units identified.

Figures should also be provided on separate pages and numbered consecutively. Captions should be provided on a separate sheet. Indicate in the margin of the typescript approximately where in the text tables and figures should fall.

Proofs and offprints. First proofs may be read and corrected by contributors provided that they can give the Editor an address through which they can be reached without delay and can guarantee to return corrected proofs to the Editor, by airmail where appropriate, within seven days of receiving them. The master proof will always be sent direct to the Editor by the printer; contributors will receive duplicates. Authors will receive 25 offprints free of charge; additional copies may be purchased if ordered at proof stage.
