

2010 CAEP/ACMU Scientific Abstracts

Keyword Index

KEYWORD	ABSTRACT No.				
A					
abdominal pain	159	cardiac arrest	3, 18, 75	didactic education	
accreditation	165	cardiac biomarkers	89	disaster medicine	
acetaminophen poisoning	66, 79	cardiac monitoring	136	52, 114	
acute coronary syndromes	44	cardiopulmonary resuscitation	9, 15	discrepant interpretations	
acute liver injury	79	cardioversion	12	126	
acute myocardial infarction	149	CARMS	110	disposition decision	
administrative database research	24, 78, 91, 161	case-control study	106	55	
administrative database study	23, 80, 116	case presentations	164	distance learning	
admission delays	27	CDU implementation	141	164	
admission predictors	22, 83	CEDIS	34	Doppler ultrasonography	
adolescents	104	central venous catheter insertion	70	138	
adrenal function	2	CHADS score	56	drug related visits	
adverse drug events	14, 105	chest pain	54, 93, 119, 124	14	
adverse events	19, 36, 45, 55,	chest tube insertion	160	dysarthria	
agonal breathing	15	chief complaint classification	144	49	
AGREE	143	child abuse	118	E	
agreement	71	clinical competence	13, 67	ED design	31
airway management	63	clinical criteria	99	EDIS	40
airway management courses	101	clinical decision rule	5, 11, 92, 105, 136	ED length of stay	116
allergy testing	127	clinical decision units	95, 141	ED misuse	158
alternative funding arrangement	74	clinical education guideline	143	ED throughput	35
ambulatory care	35	clinical efficiency	57	education research	52, 107, 112
anaphylaxis	53, 99, 127	clinical practice guidelines	20, 106	educational research	63, 103
anticoagulation	56, 147	clinical prediction rule	42, 44, 134	electrical cardioversion	60, 88
antiemetic therapy	68	clinical productivity	37, 38	electrocardiography	130
asthma	73	codeine	26	electrode pad positioning	60
atrial fibrillation	12, 22, 25, 28, 46, 47, 56, 88, 129	community-acquired pneumonia	154	electronic decision support	20
automated external defibrillators	18	community emergency medicine	150	EM training streams	139
B					
barrier analysis	136	community physicians	142	emergency crowding	4, 8, 17, 24, 27, 32, 41, 57, 64, 65, 80, 82, 86, 88, 95, 121, 122, 124, 128, 149
best practices	70	comparative effectiveness	61	emergency medical services	165
bicycling behaviour	125	consensus methodology	94	emergency medicine primer	90
bleeding events	147	consultation delays	80	emergency radiography	126
blended practice	148	consultation patterns	108	emergency ultrasound	1, 7, 155
blunt thoracic trauma	42	continuing medical education	123, 150	etomidate	2, 77
blunt trauma	92	controlled trial	81	F	
brain natriuretic peptide	115	COPD	61, 121	family medicine stream	148
breaking bad news	113	CPR training	58	febrile neutropenia	20
bronchiolitis	146	credentialing	155	fee for service	74
C					
Canada-US comparisons	61	critically appraised topic	163	femoral fractures	72
CanMEDS	13, 94, 98	CT chest	42	femoral nerve block	72
		CT utilization	23, 91	fomepizole	135
		CTAS	71, 83, 111, 144	fractile response	74
		cycling injuries	125, 133	free text entries	34
		D		full capacity protocols	65
		delayed adverse outcomes	134	functional decline	33
		Delphi methodology	13, 16	G	
		descriptive analysis	153, 154	gap analysis	73
		diagnostic evaluation	162	gastroenteritis	39, 68
				geriatrics	33, 137, 145, 158
				Glasgow Outcome Scale	59
				GRADE	143

graduate medical education	110	motor vehicle accidents	133	procedural sedation	19, 36, 45, 77, 120, 140
guideline compliance	73	MRSA	87	prognostic study	12
H		multisource feedback	94	prospective study	19
H1N1	10, 50, 62, 76, 109, 161	N		provincial database	25
HCV	132	narcotics	153, 163	public health surveillance	144
head trauma	118	needs assessment	150	pulmonary edema	163
health records review	22, 46, 97, 99, 100	night shifts	85	pulmonary embolism	162
heart failure	115	nonspecific vertigo	78	Q	
helmet legislation	125	nonurgent visits	122	qualitative research	15, 18, 141
high fidelity simulation	52, 112	O		quality of care	16
HIV	132	observation units	53, 64	R	
hydronephrosis	7	online survey research	21	Radiation Casualty Assessment Tool	114
hypertonic saline	6	operations research	8	randomized controlled trial	26, 48
hyperventilation	130	order sets	53	rapid assessment zones	128
hypoglycemia	39	OSCE	30	real-time survey	55
I		P		recidivism	78
imaging strategies	159	pain management	26	reliability	34, 111
impact analysis	27	pandemic influenza	76, 109, 161	renal colic	7
implementation research	3	pandemic planning	10	research methodology	17
independent elders	145	panic disorder	54, 119, 130	research methods	40
infection control	87	paramedic decision-making	21	residency program selection	139
influenza assessment clinics	10	paramedic training	63, 67, 101	residency selection	110
injection drug use	19	patient advocacy	156	residency training	51, 69, 81, 102, 107, 117, 152
injection drug users	36, 45	patient flow	31	residents as teachers	69
injury circumstances	133	patient safety	14, 16, 70, 93, 126	resuscitation	30
injury patterns	145	patient satisfaction	104	resuscitation skills	102
internal validation	92	pediatric emergency medicine	29, 39, 72, 104, 108, 160	retrospective review	157
international EM	152	pediatric mental health	86	revisit rates	62
interprofessional learning	113	pediatric pain management	96	Rh immune prophylaxis	97
interrater agreement	111	pediatric procedures	142	risk prediction	79
intra-articular lidocaine	48	pediatric resuscitation	112	risk stratification	5, 11
intracranial bleeding	84	performance standards	165	Romanian EM	152
ischemic stroke	49	physician acceptability	105	rural emergency medicine	154, 156, 157, 162
K		physician efficiency	155	S	
ketamine propofol	120	physician productivity	90	screening aids	119
knowledge transfer	9	physician workload	90	self-reported confidence	67
knowledge translation	146	pilot studies	120	sepsis	106
L		plastic surgery	108	seroprevalence study	132
Lean management	35	pneumonia severity index	100	service cuts	156
learner self-assessment	103	pneumothorax	1	shiftwork	85
liver injury	66	podcasts	123	shoulder dislocation	48
long-term outcomes	129	population research	25, 66, 129	simulation training	51, 98, 102, 113, 117, 160
low acuity ED patients	23	practice variability	28, 47	simulation	30
low acuity patients	83	practice variation	46, 68, 91, 95, 96, 146	specialized care models	86
LWBS	62, 82	prehospital	3, 21	specialty follow-up	127
M		prehospital analgesia	166	stethoscope contamination	87
mean arterial pressure	77	prehospital dispatch	75	stroke prevention	43
medical direction	24, 58, 166	prehospital transport	158	study screening	40
medical evacuation	157	pre-post study design	101	survey research	9, 28, 47, 58, 69, 85, 96, 98, 122, 139, 148
medico-legal considerations	166	pre-post study designs	103	survey study	51, 117
mild traumatic brain injury	131	pretriage	50		
minor head trauma	84	prevalence	54		
minor trauma	33, 137	PRIDE scoring system	115		
		procedural confidence	142		

symptom description	75	throughput analysis	159	unplanned revisits	137
syncope	134	throughput measurements	82	urethral visibility	29
syndromic surveillance	50, 76, 109	time–motion analysis	37	urgent outpatient evaluation	43
systemic review	4	time–motion study	38	urinary tract infection	29
systematic review	1, 2, 6, 17, 32, 41, 44, 60, 64, 65, 89, 118, 128, 135	toxic alcohols	135	V	
system-wide interventions	32, 100, 121, 124, 149	trainee impact	57	venous thromboembolism	138
T		transient ischemic attack	5, 11, 43, 49	ventilation perfusion scanning	138
tabletop exercises	31	traumatic brain injury	6, 59	videoconferencing	164
task times	37, 38	triage	71	W	
termination of resuscitation	3	triage liaison physician	41	waiting room care	8
threatened miscarriage	97	triage nurse order	4	waiting room medicine	93
		troponin	89	warfarin	84, 147
		U		wellness curriculum	81
		ultrasound training	107
