What's
Red and Yellow
 and Used
 All Over?

monoject

**SHARPS
 CONTAINER**

Used sharps are virtually everywhere in a medical environment. Finally, there's a system for handling these sharps that maximizes protection, maximizes convenience, and minimizes space requirements. It's called Monoject SHARPS CONTAINER and it not only promises a better way, it delivers. For complete information, write Dept. A.J.

Disinfect Scopes Safely and Completely in just 10 Minutes

OLYMPUS AND ACMI

**In controlled studies,
Sporicidin (1:16) inactivated
the Hepatitis B* and AIDS
viruses in 10 minutes**

Sporicidin[®]
COLD STERILIZING SOLUTION
An exclusive glutaraldehyde formula

*Journal of Clinical Microbiology, Vol. 18, No. 3, P. 535. To determine whether the HBV could be inactivated by intermediate to high-level disinfectants, five chimpanzees were each challenged with an inoculum treated with a different germicidal chemical. Researchers observed that the small amount of direct data, although not conclusive, will have to suffice until a laboratory culture method is developed.

Recommended by All Major Scope Manufacturers

Sporicidin is a "tamed" glutaraldehyde that does not yellow or irritate skin or mucous membranes.

Sporicidin is safe for delicate instruments and it will not cloud lenses or clog air/water channels.

Sporicidin (1:16) is tuberculocidal, bactericidal, fungicidal & virucidal (including Herpes I & II, Influenza A₂ and Polio I).

Proof Comes from 15 Years of Research and Clinical Use

"In 5000 procedures the cystoscopes were used directly from the Sporidicin soak; there were no known incidents of iatrogenic infection or post-operative irritation. Sporidicin is safe and effective in 10 minutes."

Urology, Vol. 23, No. 2, 1984

"After 3 years and 4001 procedures (laparoscopy, cystoscopy and colonoscopy), we observed
(1) no post-operative tissue irritation or infection
(2) no lens clouding or endoscope damage
(3) preferred by our staff."

*Journal Of The Operating Room
Research Institute, Vol. 3, No. 8, 1983*

"Sporicidin . . . was both more stable and more active against test spores than . . . Cidex and Cidex-7."

Infection Control, Vol. 1, No. 2, 1980

These and other studies available upon request.
