Books and Journals from  
Cambridge University Press

Cambridge is a world leading publisher in pure and applied mathematics, with an extensive programme of high quality books and journals that reaches into every corner of the subject.

Our catalogue reflects not only the breadth of mathematics but also its depth, with titles for undergraduate students, for graduate students, for researchers and for users of mathematics.

We are proud to include world class researchers and influential educators amongst our authors, and also to publish in partnership with leading mathematical societies.

*cotg u*

S 586 On the energetics of a two-layer baroclinic flow  
**T. Jougla & D. G. Dritschel**

619 Dynamics of unstably stratified free shear flows: an experimental investigation of coupled Kelvin–Helmholtz and Rayleigh–Taylor instability  
**B. Akula, P. Suchandra, M. Mikhaeil & D. Ranjan**

### **JFM Rapids (online only)**

R1 Understanding discrete capillary-wave turbulence using a quasi-resonant kinetic equation  
**Y. Pan & D. K. P. Yue**

S 661 General rheology of highly concentrated emulsions with insoluble surfactant  
**A. Z. Zinchenko & R. H. Davis**

705 Elementary model of internal electromagnetic pinch-type instability  
**J. Priede**

S 719 Nonlinear mode interactions in a counter-rotating split-cylinder flow  
**P. Gutierrez-Castillo & J. M. Lopez**

R2 Restricted Euler dynamics along trajectories of small inertial particles in turbulence  
**P. L. Johnson & C. Meneveau**

R3 Two-dimensional phoretic swimmers: the singular weak-advection limits  
**E. Yariv**

*S* indicates supplementary data or movies available online.

- 1 Droplets in turbulence: a new perspective  
**M. R. Maxey**
- 5 The minimal-span channel for rough-wall turbulent flows  
**M. MacDonald, D. Chung, N. Hutchins, L. Chan, A. Ooi & R. García-Mayoral**
- 43 Drag reduction in turbulent channel flow laden with finite-size oblate spheroids  
**M. Niazi Ardekani, P. Costa, W.-P. Breugem, F. Picano & L. Brandt**
- 71 Boundary integral formulation for flows containing an interface between two porous media  
**E. Ahmadi, R. Cortez & H. Fujioka**
- S 94 Buoyancy-driven bubbly flows: ordered and free rise at small and intermediate volume fraction  
**A. Loisy, A. Naso & P. D. M. Spelt**
- 142 Ship generated mini-tsunamis  
**J. Grue**
- 167 Coherent structures in statistically stationary homogeneous shear turbulence  
**S. Dong, A. Lozano-Durán, A. Sekimoto & J. Jiménez**
- S 209 Mean and turbulence dynamics in unsteady Ekman boundary layers  
**M. Momen & E. Bou-Zeid**
- S 243 A settling-driven instability in two-component, stably stratified fluids  
**A. Alsinan, E. Meiburg & P. Garaud**
- 268 Layer formation in sedimentary fingering convection  
**J. F. Reali, P. Garaud, A. Alsinan & E. Meiburg**
- 306 Structure of a streamwise-oriented vortex incident upon a wing  
**C. McKenna, M. Bross & D. Rockwell**
- 331 A general relation for standing normal jumps in both hydraulic and dry granular flows  
**S. Mejean, T. Faug & I. Einav**
- 352 Interaction between mountain waves and shear flow in an inertial layer  
**J.-H. Xie & J. Vanneste**
- 381 Faxén form of time-domain force on a sphere in unsteady spatially varying viscous compressible flows  
**S. Annamalai & S. Balachandar**
- 412 Nonlinear dynamics induced by linear wave interactions in multilayered flows  
**A. Guha & F. E. Udwadia**
- 428 Qualitative analysis of the minimum flow rate of a cone-jet of a very polar liquid  
**F. J. Higuera**
- 442 Wave flows induced by lifting of a rectangular beam partly immersed in shallow water  
**V. V. Ostapenko & O. A. Kovyrkina**
- 468 On the dynamics of three-dimensional slung prisms under very low and high turbulence flows  
**Y. Jin & L. P. Chamorro**
- 481 Gyrotactic swimmer dispersion in pipe flow: testing the theory  
**O. A. Croze, R. N. Bearon & M. A. Bees**
- 507 Local linear stability analysis of cyclone separators  
**T. A. Grimble, A. Agarwal & M. P. Juniper**
- 539 On a stabilization mechanism for low-velocity detonations  
**A. Sow, R. E. Semenko & A. R. Kasimov**
- 554 Dynamics of robust structures in turbulent swirling reacting flows  
**S. Roy, T. Yi, N. Jiang, G. H. Gunaratne, I. Chterev, B. Emerson, T. Lieuwen, A. W. Caswell & J. R. Gord**
