

## **SUBJECT INDEX**

## INDEX

- $\alpha$ -elements 370
- 2MASS 47, 416
- 3-kpc arm 297
  
- A-F-supergiants 703
- accretion disk 176, 201
  - fossil 175
- active galactic nuclei 176
  - jets 177
  - UV-bump 177
- AGB 15, 406, 412
- age
  - halo 354
- age-velocity relation 433, 514, 518
- age spread 377
- AGN 181
- Allen, David 205
- aluminum 437
- angular momentum transfer 87, 518
- anticenter 681
- Apache Point Observatory 47
- arm-interarm contrast 502
- ASCA 287, 628
- asymmetric drift 34
- asymmetry 86
- axial symmetry 32
- axisymmetric Jeans instability 31
  
- Baade's window 129, 320, 405
- background radio emission 615
- bar 12, 32, 53, 71, 79, 93, 103, 125,
  - 145, 147, 297, 316
  - inclination 107
  - potential 147
  - structure 107
  - viewing angle 145
  
- basis sets 509
- bending instability 32, 88
- BICE 497
- binary stars 531
- black holes 219, 253
  - binary 285
  - starvation diet 178
  - supermassive 169, 178
- Bondi-Hoyle accretion 174
- broadline clumps 314
- buckling 73
- bulge 42, 71, 85, 94, 103, 111, 119,
  - 129, 329, 341, 411, 425, 429
  - box-peanut 140
  - boxy 73
  - formation 32, 89, 403
  - microlensing 93
  - peanut-shaped 73
  
- carbon stars 13, 638
- CCD photometry 94
- Cepheids 15, 638, 639
- chaotic scenario 371
- chemical inhomogeneities 373
- chemo-dynamical evolution 389
- chemo-dynamical model 396, 425, 429
- CI 283, 469
- C II 497
- cloud
  - filling factor 556
  - formation 551
  - stability 609
- cluster 279
- clustering

- hierarchical 3
- CO 297
  - luminosity 564
- CO (J=1-0)
  - Columbia survey 501
- CO (J=2-1)
  - Tokyo-NRO survey 501
- COBE 51, 61
  - FIRAS 567
- collisions
  - GMC 190
  - stellar 216
- color-magnitude diagram 60, 93, 104, 112, 318
- Compton Observatory 437
- COMTEL 62
- corotation radius 83
- correlation function of intensity 615
- corrugations 31, 59
- cosmic rays 437
- cosmic strings 257
- CS (J=2-1) 265
- CSHELL 112
- cyclones 597
  
- dark corona 645
- dark halo 24, 651
  - formation 24
  - rotation of 6
  - scale-free model of 5
  - shape 24
- dark matter 93, 575, 652
- DENIS 47, 416
- density waves 502, 517, 519, 521
  - m=1 138
- differential metallicity distribution 400
- diffusion of stellar orbits 431
- DIRBE 51, 61
- disk 52, 398, 681
  - asymmetry 12
  - dark matter 651
  - edge 681
  - ellipticity 1
  - evolution 681
  - heating 513
  - hot 33
  - lop-sided 6
  - mass 499
  - scale height 35
  - stability 349, 519, 521
  - stars 97
  - warp of 7
- dissipationless collapse 24, 423, 676
- dissipative collapse 368
- distribution function 33, 351, 424
- dust emission 231, 567
- dwarf galaxy 98
- dynamical friction 515
- dynamics 79
  
- edge-on galaxies 147
- EGRET 170
- electron Lorentz factor 174, 177
- electrons
  - injection 177
  - secondaries 177
- elliptical galaxies 32, 425
- ellipticities
  - apparent 6
- epicycle approximation 3
- evolutionary processes 79
- expanding molecular ring 297
  
- F-G-dwarfs 389
- Faraday rotation 271
- filaments 247, 314
- fine structure 613
- Fokker-Planck 217
- forbidden region 119
  
- G-dwarf
  - distribution 400
  - problem 375
- galactic

- background 613
- bar 107
- center 79, 199, 205, 285, 311
  - “arc” 203, 263
  - “bridge” 203
  - accretion rate 174
  - black hole 169
  - mini-spiral 241
  - molecular clouds 282
- constants 633, 707, 709
- coordinates 178
- dynamics 125
- fine structure 611
- model 681, 707, 713
- potential 697
- galaxies
  - stellar halos 39
  - surface photometry 39
- galaxy 103
  - formation 1, 381, 423
    - inside out 376
- gamma rays 437
  - GC 170
- gas 79
  - dynamical simulations 145
  - inflow 88
  - kinematics 80
- globular clusters 43, 99, 381, 403, 523, 524, 669, 697
  - age 355
  - proper motions 697
- gravitational
  - focusing 220
  - instabilities 557
  - microlensing 93, 103
  - slingshot 527
- H<sub>2</sub> 283
  - CI 469
  - torus 285
- hadronic cascades 177
- halo 52, 437
  - elliptical 12
  - flattening 43
  - triaxial 11
- heavy halo
  - shape of 1
- He I stars 181
- HI 82, 297
  - inner galaxy 145
  - scale height 479
  - survey 447
  - terminal curve 85
- high-velocity clouds 605
- high-velocity stars 523, 524
- HII regions 689
- Hipparcos 513, 525, 691
- horizontal branch 368
- HST 405, 605
- hydro-dynamical simulations 82, 145, 147
- infrared 59, 205, 232
- inside out galaxy formation 376
- interstellar
  - bubbles 618, 620
  - medium 613
  - scattering 194
  - turbulence 558
- interval method 713
- ionized
  - gas 613
  - medium 437
- IRAS point sources 75, 411
- iron abundance 397, 429
- IRS 112
- IRTF 112
- ISO 628
- isophote twists 6
- Jeans equation 652
- jets
  - GC spur 180
  - nozzle 176

- K-giants 15, 329, 426, 429
- Kapteyn, J.C. ix
- kinematic principal axes 7
- kinematics 73, 329, 341
  - Baade's Window 128
  - bulge 331
  - Miras 411
  - OH/IR stars 345
  - stellar 11
- Lindblad
  - local expanding ring 584
  - resonances 73, 83, 139, 516
- local
  - escape velocity 647
  - mass density 499, 654
  - standard of rest 119
- local bubble 482
- local velocity field 130
- long-lived bend 36
- longitude-velocity diagram 145, 147
