

THE CAMBRIDGE PUBLIC HEALTH SERIES

Under the Editorship of

G. S. GRAHAM-SMITH, M.D., AND J. E. PURVIS, M.A.

The books included in this series present in a useful and handy form the knowledge now available in many branches of the subject. They are written by experts, and the authors are occupied, or have been occupied, either in investigations connected with the various themes or in their application and administration. It is hoped that the volumes will be useful to the medical profession at home and abroad, to bacteriologists and laboratory students, to municipal engineers and architects, to medical officers of health and sanitary inspectors and to teachers and administrators. Details of the four volumes already published will be found below, and a list of volumes in preparation will be sent on application.

The Chemical Examination of Water, Sewage, Foods and other Substances. By J. E. PURVIS, M.A., University Lecturer in Chemistry and Physics as applied to Hygiene and Public Health, Cambridge, and T. R. HODGSON, M.A., Public Analyst for the County Boroughs of Blackpool and Wallasey. Demy 8vo. 9s. net.

This book is intended for the use of students who are attending courses of instruction for diplomas and degrees in Public Health, and for those who are studying the chemistry of water, sewage, sewage effluents, foods, disinfectants, etc. during their ordinary laboratory practice. It will probably be also useful to those who are engaged as public analysts or in public health matters generally. It does not give an exhaustive account of all the available methods of examination, but it describes those which have been used and tested by the authors both in laboratory instruction and in the daily work of a public analyst.

The Bacteriological Examination of Food and Water. By WILLIAM G. SAVAGE, B.Sc., M.D., D.P.H., County Medical Officer of Health, Somerset. Demy 8vo. With 16 illustrations. 7s. 6d. net.

"A hearty welcome will be accorded this compact guide, not only because it is eminently practical in its methods and directions, but also because it has been written by a man who has been accustomed to do the work himself and to depend upon it as a basis for administrative action...To all engaged in the administration of the public health...the book may be cordially commended."—*Birmingham Daily Post*

Flies in Relation to Disease. Non-Bloodsucking Flies. By G. S. GRAHAM-SMITH, M.D., Lecturer in Hygiene in the University of Cambridge. Demy 8vo. Second edition, revised and enlarged. With 27 plates, 32 text-figures and 20 charts. 12s. 6d. net.

"The fact that the book is published at the Cambridge University Press is sufficient guarantee of the excellence of the printing and binding....We can only say that if the other volumes of this series...are as good as this one, a very high standard of excellence will have to be maintained. We consider that no one in the Public Health Service should be without this book."—*Medical Times* on the first edition

Isolation Hospitals. By H. FRANKLIN PARSONS, M.D., D.P.H., formerly First Assistant Medical Officer of the Local Government Board. Demy 8vo. With 55 text-figures. 12s. 6d. net.

"Eminently practical in character, it is at the same time complete in its information, so that the medical officer may rely with confidence on finding accurate and impartial facts on matters connected with the isolation of infectious cases....The volume should appeal very strongly to all medical officers of health, tuberculosis officers, and sanitary authorities, to whom it can be recommended with all heartiness."—*Aberdeen Free Press*

	PAGE
CAVE, STORRAR. A Note on the Presence of <i>Oestertagia trifurcata</i> in the Abomasum of a Sheep in England. (With 3 Text-figures)	201
LEIGH-SHARPE, W. HAROLD. <i>Calliobdella lophii</i> . (With 5 Text-figures)	204
YOSHIDA, S. O. On a Second and Third Case of Infection with <i>Plerocercoides prolifer</i> Ijima, found in Japan. (With Plate XVII)	219
SEIDELIN, HARALD. Ingestion of Erythrocytes by Trypanosomes. (With Plate XVIII)	226
HINDLE, EDWARD and GÓZONY, LAJOS. Abderhalden's Reaction and its Application in Certain Protozoal Infections	228
BOULENGER, CHARLES L. A List of Nematode Parasites observed in the Alimentary Canal of Sheep in England. (With Plate XIX and 4 Text-figures)	240
NUTTALL, GEORGE H. F. Tick Abnormalities. (With 11 Text-figures)	250
NUTTALL, GEORGE H. F. Penetration of <i>Ixodes</i> beneath the Skin	258
HINDLE, EDWARD. Note on a Leg Abnormality in <i>Acanthia lectularia</i> . (With 1 Text-figure)	260
MEGGITT, F. J. On the Anatomy of a Fowl Tapeworm, <i>Amoebotaenia sphenoides</i> von Linstow. (With Plates XX and XXI)	262
MURRAY, C. HAY. Notes on the Anatomy of the Bed Bug, (<i>Acanthia lectularia</i> L. (With Plates XXII and XXIII and 40 Text-figures)	278
PORTER, ANNIE. The Morphology and Biology of <i>Herpetomonas patellae</i> , n.sp., parasitic in the Limpet, <i>Patella vulgata</i> , together with Remarks on the Pathogenic Significance of Certain Flagellates found in Invertebrates. (With 17 Text-figures)	322

PARASITOLOGY is published about four times a year. The numbers afterwards are issued in volumes each containing four numbers and amounting to between 400 and 500 pages, with plates and figures.

Papers for publication should be sent to Professor GEO. H. F. NUTTALL, F.R.S., Longfield, Madingley Road, Cambridge, or to the Associate Editor. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editors for publication are understood to be offered to *PARASITOLOGY* alone, unless the contrary is stated.

Contributors receive seventy-five copies of their papers free. Additional copies, not exceeding 200, may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £1. 10s. per volume (post-free), payable in advance; single numbers 10s. net (double number 20s. net). *Subscribers to the Journal of Hygiene* may obtain single numbers of *PARASITOLOGY* at the reduced price of 7s. 6d. net, or may become subscribers at the reduced rate of £1. 1s. per volume. Subscriptions may be sent to any Bookseller, or to MR C. F. CLAY, MANAGER, Cambridge University Press, Fetter Lane, London, E.C.

The Cambridge University Press has appointed the University of Chicago Press agents for the sale of *Parasitology* in the United States of America and has authorised them to charge the following prices: Subscription \$7.50 net per volume; single numbers \$2.50 net each, double numbers \$5.00 net each. Subscribers to the *Journal of Hygiene* may become subscribers to *Parasitology* at the reduced rate of \$5.25 per volume.

The prices of back volumes are as follows:

Volumes I, II, III and IV (1908-11). Each volume in four parts, paper covers, 21s. net per volume. Bound in buckram, 25s. net per volume.

Volumes V and VI (1912-14). Each volume in four parts, paper covers 30s. net per volume. Bound in buckram, 34s. 6d. net per volume.
