

THE AERONAUTICAL JOURNAL

Covering all aspects of aerospace

Volume 117 Number 1193

July 2013

ROYAL
AERONAUTICAL
SOCIETY

THE AERONAUTICAL JOURNAL

Editor-in-chief: Prof Peter Bearman

Associate Editors

Chairman: Prof Mike Graham

Professor David Allerton
University of Sheffield

Professor Chris Atkin
City University, London

Professor Holger Babinsky
University of Cambridge

Professor Ken Badcock
University of Liverpool

Professor Rene de Borst
University of Glasgow

Dr Trevor Birch
DSTL

Wg Cdr Mike Bratby
RAeS Air Power Group

Professor Richard Brown
University of Strathclyde, Glasgow

Professor Jonathan Cooper
University of Bristol

Professor Laurent Dala
Witwatersrand University, Johannesburg SA

Professor Dimitris Drikakis
Cranfield University

Professor Brian Falzon
Queen's University, Belfast

Mr Chris Fielding
BAE Systems, Warton

Professor Victor Giurgiutiu
University of South Carolina

Dr John Green
Consultant Chief Scientist, ARA

Professor Ismet Gursul
University of Bath

Professor Keith Hayward
RAeS Head of Research

Professor Li He
University of Oxford

Professor Michael Henshaw
Loughborough University

Professor Richard Hillier
Imperial College, London

Dr M R Nayak
National Aerospace Laboratories, India

Professor Gareth Padfield
University of Liverpool

Professor Ning Qin
University of Sheffield

Dr Arthur Richards
University of Bristol

Professor Shahrokh Shahpar
Rolls-Royce, Derby

Professor Howard Smith
Cranfield University

Professor Marilyn Smith
Georgia Institute of Technology, USA

Professor Constantinos Soutis
University of Manchester

Professor Anthony Waas
University of Michigan, USA

Aims and scope

The aims and scope of The Aeronautical Journal are intended to reflect the objectives of the Royal Aeronautical Society as expressed in its Charter of Incorporation. Briefly, these are to encourage and foster the advancement of all aspects of aeronautical and space science. Thus the topics of The Aeronautical Journal include most of those covered by the various Specialist Groups of the Society, which include:

Aircraft design, aerodynamics, air law, air power, air transport, air navigation, airworthiness and maintenance, aviation medicine, avionics and systems, environmental issues, flight operations, flight simulation, fluid dynamics, fluid mechanics, general aviation, guided flight, human factors, human powered flight, light aviation, management studies, propulsion, rotorcraft, safety, space, structures and materials, structural mechanics, systems and test procedures and UAVs.

Papers are therefore solicited on all aspects of research, design and development, construction and operation of aircraft and space vehicles. Papers are also welcomed which review, comprehensively, the results of recent research developments in any of the above topics.

We recognise the inhibiting pressures of time and confidentiality and acknowledge that many of the design testing, manufacturing and operational problems that industry has to solve contain important information for the whole aerospace community. The Aeronautical Journal provides a platform for refereeing and presenting your work to an international audience.

Papers will be considered for publication in The Aeronautical Journal if they meet the terms and conditions listed in The Instructions for authors. If these are not met, the Editor reserves the right to withdraw the paper without redress, which may be at any time up to publication.

**Enquiries should be sent to: Wayne J Davis, Royal Aeronautical Society, No.4 Hamilton Place,
London W1J 7BQ, United Kingdom or aerjournal@aerosociety.com**

Papers should be submitted at: www.edmgr.com/aeroj

CONTENTS

Volume 117 Number 1193

July 2013

A tribute to John Stollery	658
W. Jiajan, R.S.M. Chue, T. Nguyen and S. Yu Optimisation of round bodies for aerodynamic performance and stability at supersonic speeds	661
B. Atli-Veltin and B. Gandhi Energy absorption of sandwiched honeycombs with facesheets under in-plane crushing	687
T. Coyne, E. Loth, J. Koncsek, D. Davis, T. Connors and D. Howe Simulations of a low-boom, axisymmetric, external compression inlet	709
M.L. Cohen and J.D. Achenbach Probabilistic considerations for growth and detection of cracks from rivet holes in a lap joint	727
R. Gomes-Fernandes Flow features around double cones at hypersonic speed	741
C. Linares, C.P. Lawson and H. Smith Multidisciplinary optimisation framework for minimum rotorcraft fuel and air pollutants at mission level	749

The new Aeronautical Journal Manuscript Management system

The Aeronautical Journal now operates an online Manuscript Management System (MMS) which processes manuscripts from receipt to print. Authors must now submit their manuscripts directly to us through our website to be considered for review and publication. The whole manuscript review process including revisions is now carried out via our user-friendly online manuscript processing system. Papers now will only be considered for publication if they have been submitted through the MMS.

We hope this new automated system will lead to a speedier and more efficient way of reviewing manuscripts.

Manuscripts should be submitted at: <http://www.edmgr.com/aeroj> where easy-to-follow instructions will guide you through the process.

Front Cover: Falcon Hypersonic Technology Vehicle 2. (DARPA)
