Living up to Life

Leica
MICROSYSTEMS

Your Image Starts Here!

Learn More!

Visit booth #804 at M&M 2013

The ultimate quality of your microscopic images begins with high-quality, precise sample preparation. **Leica Microsystems** is the leader in innovative sample preparation workflow solutions for TEM, SEM, and light microscope imaging.

Visit booth #804 at M&M 2013 and see how we can simplify your work and improve your image quality, with a wide range of sample preparation and optical and digital microscopes uniquely designed to yield high level accuracy and efficiency.

Please join us at the following events:

- Attend the Leica-sponsored Sunday Short Course : X10 Cryo-preparation for Biological EM by **Kent McDonald**
- Enjoy refreshments at Leica's scheduled in-booth tutorials on Monday evening
- Check in at the Leica booth for additional in-booth tutorials

Visit <http://www.leica-microsystems.com/em-promos> for special offers!

This journal is part of the **Cambridge Journals Online** service. Access to online tables of contents and article abstracts is available to all researchers at no cost. Access to full-text articles online is provided to those with online subscription. Online subscriptions must be activated. Once your subscription is activated, free access to past, present, and forthcoming articles is available at:

Microscopy and Microanalysis website: journals.cambridge.org/MAM.

Instructions for authors submitting manuscripts may be found at journals.cambridge.org/MAM. Select "Further Information" then select "Instructions for Contributors." An abbreviated version of these instructions will be published in the first issue (February) of each volume.

JEM-1400 *plus*

The 120kV TEM of choice.

JEOL has sold more than 2400 120kV TEMs world-wide. Our latest generation features high resolution/high contrast imaging, outstanding S/TEM analytical capabilities, elemental mapping with the latest large area SDD detectors, cryomicroscopy, 3D tomography, and montage. Everything you've come to like about JEOL, and then some.

Contact us for more information on this research grade, flexible TEM. Need more? We offer a full line of TEMs from 120kV – 300kV. You'll like our applications and service support, too.

Microscopy and Microanalysis publishes original research papers dealing with a broad range of topics in microscopy and microanalysis. These include articles describing new techniques or instrumentation and their applications, as well as papers in which established methods of microscopy or microanalysis are applied to important problems in the fields of biology or materials science. Microscopy and microanalysis are defined here in a broad sense, and include all current and developing approaches to the imaging and analysis of microstructure. The criteria for acceptance of manuscripts are the originality and significance of the research, the quality of the microscopy or microanalysis involved, and the interest for our readership.

Four types of communications are published in the Journal. **Regular Articles** are of substantial length and describe the findings of an original research project that satisfies the aims and scope of the Journal, described above. **Review Articles** summarize the current status of an important area within the aims and scope of the Journal. **Letters to the Editor** usually contain comments on recent articles that have appeared in the Journal. **Book Reviews** are also published, but these are solicited only through the Book Review Editor.

Instructions for Contributors

Instructions for authors contributing manuscripts may be found at <http://mc.manuscriptcentral.com/mam> under "Resources: Instructions and Forms." Authors may also visit http://www.journals.cambridge.org/jid_MAM, select "Further Information," and then select "Instructions for Contributors." An abbreviated version of these instructions will be published in the first issue (February) of each volume.

Copyright Information

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the Microscopy Society of America; that the manuscript will not be published elsewhere in any language without the consent of the copyright holders; and that written permission of the copyright holder is obtained by the authors for material used from other copyrighted sources.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names lack protection by the relevant laws and regulation.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Cambridge University Press, provided that the appropriate fee is paid directly to Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA (Tel: (508) 750-8400), stating the ISSN (1431-9276), the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Disclaimer

The Microscopy Society of America, the other societies stated, and Cambridge University Press cannot be held responsible for errors or for any consequences arising from the use of the information contained in this journal. The appearance of scientific reports and/or workshops, or any other material in *Microscopy and Microanalysis* does not constitute an endorsement or approval by The Microscopy Society of America of the findings, data, conclusions, recommendations, procedures, results, or any other aspect of the content of such articles. The appearance of advertising in *Microscopy and Microanalysis* does not constitute an endorsement or approval by The Microscopy Society of America of the quality or value of the products advertised or any of

the claims, data, conclusions, recommendations, procedures, results, or any other information included in the advertisements.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made.

Subscription Information

Microscopy and Microanalysis is published bimonthly in February, April, June, August, October, and December by Cambridge University Press. Two supplements (*Expo* and *Proceedings*) are published in June and August.

Society Rates: Members of the Microscopy Society of America should contact the MSA Business Office for all subscription inquiries: Microscopy Society of America, Hachero Hill, Inc., 11260 Roger Bacon Drive, Suite 402, Reston, VA 20190, Tel.: (703) 964-1240, Ext. 14, E-mail: nicoleguy@mindspring.com, URL: www.msa.microscopy.org. Members of other affiliated societies should contact their respective society business offices for all subscription inquiries.

Subscription Rates: Institutions print and electronic: US \$957.00 in the USA, Canada, and Mexico; UK £577.00 + VAT elsewhere. Institutions online only: US \$790.00 in the USA, Canada, and Mexico; UK £478.00 + VAT elsewhere. Institutions print only: US \$863.00 in the USA, Canada, and Mexico; UK £520.00 + VAT elsewhere. Individuals print and online: US \$359.00 in the USA, Canada, and Mexico; UK £218.00 + VAT elsewhere. Prices include postage and insurance.

USA, Canada, and Mexico: Subscribers in the USA, Canada, and Mexico should send their orders, with payment in US dollars or the equivalent value in Canadian dollars, to: Cambridge University Press, Customer Services Department (Journals), 100 Brook Hill Drive, West Nyack, NY 10994-2133, USA. Tel: (845) 353-7500. Fax: (845) 353-4141. Orders may be phoned direct (toll free): (800) 872-7423. E-mail: journals_subscriptions@cup.org.

Outside North America: Subscribers elsewhere should send their orders, with payment in sterling, to: Customer Services Department (Journals), Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, UK. Tel: +44 (0)1223 326070. Fax: +44 (0)1223 325150. E-mail: journals@cambridge.org

Change of address: Allow six weeks for all changes to become effective. All communications should include both old and new addresses (with postal codes) and should be accompanied by a mailing label from a recent issue. Society members should contact their respective society business offices to inform them of address changes.

Microform editions are available from: University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106, USA.

Editorial Office

Robert L. Price, Editor in Chief, Department of Cell and Developmental Biology and Anatomy, School of Medicine, University of South Carolina, 6439 Garner's Ferry Road, Bldg. 1 B-60, Columbia, SC 29209, USA; Tel: (803) 216-3824; Fax: (803) 733-3212; E-mail: Bob.Price@uscmed.sc.edu.

Office of Publication

Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA; Tel: (212) 337-5000; Fax: (212) 337-5959.

the clever
cleaver
you **can't**
live without!

Meet the LatticeAx™ — the small,
accurate, fast, low-cost cleaving
solution, suitable for any lab.

its simple...

just set...

indent...

cleave

LatticeAx™ Cleaving System

The LatticeAx™ is a precision cleaver that fits in the palm of your hand. In an amazingly small footprint (4" cube, 100mm³), the patent pending "Ax" and process are designed to assist the user to cleave wafers, strips, or pieces to precisely sized samples with localized targets. Unlike automated cleaving systems, the LatticeAx™ bridges the gap between manual cleaving and expensive alternatives. With the smart combination of a high-magnification camera and precision knobs, the LatticeAx™ enables highly accurate, manual cleaving of wafer pieces and small samples of any aspect ratio.

applications

- Site specific or general area cross-section for SEM
- Target localization prior to FIB
- Prep for Broad Beam ion milling or polishing
- Downsize samples for SEM with height restriction
- Cleaving to create uniform samples for other analysis tools with non-wafer scale stages
- Vertical, mirror image cleaving for photonics analysis

**the highest quality...
the most precise sectioning...
incomparable durability**

Free Customer Service

Sectioning tests with biological and material research specimens of all kinds. We send you the sections along with the surfaced sample, a report on the results obtained and a recommendation of a suitable knife. Complete discretion when working with proprietary samples.

Re-sharpening and Reworking Service

A re-sharpened Diatome diamond knife demonstrates the same high quality as a new knife. Even knives purchased in previous years can continue to be re-sharpened. The knives can be reworked into another type of knife for no extra charge, e.g. ultra to cryo or 45° to 35°.

Exchange Service

Whenever you exchange a knife we offer you a new Diatome knife at an advantageous price.

40 years of development,
manufacturing, and
customer service

EMS IS PROUD TO INTRODUCE...

NIGHTSEA™ FLUORESCENCE VIEWING SYSTEMS

Fluorescing YFP-transgenic *C. elegans* photographed using the NIGHTSEA Stereo Microscope Fluorescence Adapter. Photograph © NIGHTSEA/Charles Mazel

GFP-tagged *Drosophila* larva. Photograph © NIGHTSEA/Charles Mazel

Coral Polyps — Fluorescence. © Wade Cooper

Fluorescence has become the tool of choice for studying many animal models on upright and inverted research stands.

New technology from NIGHTSEA™ now extends fluorescence to standard routine stereo microscopes, where its specificity and sensitivity provide an ideal assist for life science applications.

THIS SIMPLE SYSTEM IS EXCELLENT FOR:

- Quick screening of your fluorescent genotypes – *Drosophila*, zebrafish, *C. elegans*, ...
- Genotype sorting
- Fluorescence-aided dissection, injection, or micromanipulation
- Freeing up your research-grade fluorescence microscopes for more demanding work
- New faculty start-up budgets
- Bringing fluorescence into the teaching laboratory

**please contact us for
more information**
