

Law & Society Review Condensed Style Sheet

Type manuscripts **double-spaced** on one side of the paper only. While manuscripts need not conform to this style sheet at the time of submission, all manuscripts must include an abstract, footnotes, and a list of references, and all accepted manuscripts must be revised by the authors to conform to the *Review's* style. **The rules listed below supplement the manuscript information on the inside front cover of the *Review*.** Authors are urged to consult *Review* issues in volume 26 or later for further illustrations. A detailed style sheet is available from the Editorial Office.

1. **Abstracts.** All manuscripts should include an abstract of not more than 100 words. No abstracts are required for review essays or comments.
2. **Footnotes.** Footnotes should be numbered sequentially (except for the author's footnote) and printed on pages immediately following the text (not at the foot of the page). They should contain only substantive comments and additional references not immediately relevant to the text.
3. **Tables and Figures.** Tables should approximate the appearance of printed tables. Figures should be camera ready; provide originals, not xerographic copies. Tables and/or figures should be placed at the end of the text, after footnotes, appendixes, and references. Their location within the text should be indicated as follows:

Table 1 about here

4. **Citations.** All notes that consist merely of supporting citations should be placed in parentheses in the text. For example:

In a thoughtful essay, Hayden (1991) . . .

OR

Media stories often portray the civil jury as generous (Daniels & Martin 1986:236; Hans 1989; Huber 1988).

The same general rules apply to footnote text.

5. **References.** References are placed at the end of the manuscript following the footnotes. The list should contain only those sources actually cited in text or notes. Give authors' names as they appear in the original source. For more than one publication by the same author, list them in chronological order, with the older item first. For more than one publication in one year by the same author, use small (lower-case) letters to distinguish them (e.g., 1970a, 1970b).

THE HABITS OF LEGALITY

Criminal Justice and the Rule of the Law

FRANCIS A. ALLEN

This is a comprehensive and contemporary consideration of American criminal justice. Francis Allen suggests that a much more effective penal policy can be found in a closer adherence to the law, rather than in the current tendency to bypass certain laws in the name of the "war on crime".

The Law in Society

More Than Victims

Battered Women, the Injurious Society, and the Law

Donald Alexander Downs

"Down's book, *More than Victims*, is a polemic against this use of Battered Woman Syndrome, and what he sees as its centerpiece, the idea of a battered woman's 'learned helplessness'. . . . What makes Down's argument compelling. . . is the fact that last August the California Supreme Court in effect signed on to it. . . . [In] *People v Humphrey*, a vivid account of a wife whose husband came home from a hunting trip with 'that look on his face' that always signaled a beating . . . the court said it wasn't going to say she acted unreasonably when she shot him. Downs would approve."—Kathleen Kahn,

Racial and Political Justice

Vol. 22, No. 3 (1995)

This issue speaks to attacks on political justice in the form of resurgent racism at home, as well as genocide and patterns of "ethnic cleansing" abroad. With the realignment of power in the U.S. over the last two decades, the Democrats effectively abandoned the historic demand for civil rights. This demand had once been an integral element of its electoral base, including labor and people of color, but the collapse of the New Deal Coalition and liberal-inspired state redistributive policies created space for a mean-spirited assault on the gains made by movements supporting labor and civil rights. Contributors to this issue do an excellent job of analyzing the political initiatives that challenge any notion of equality as a fundamental norm in the U.S., but also take halting steps toward elaborating a vision of socially just institutions fitting to the new global reality.

JAPAN

Economic Success and Legal System

Edited by Harald Baum

How does Japan — the second largest world economic power and a modern industrial nation — manage to function with a significantly lower number of judges and lawyers and correspondingly fewer civil and administrative proceedings than, for example, Germany or the United States? Does this provide for an adequate measure of intrasocietal justice? What alternative conflict-avoiding or conflict-solving mechanisms take the place of contentious disputes? What role do contracts play in the Japanese business world? How should the relationship between bureaucracy and business be evaluated?

In **Japan: Economic Success and Legal System** renowned scholars and experienced practitioners attempt to formulate answers to these questions from their Japanese, Anglo-American, and German perspectives. They use a legal sociological approach that provides a glimpse behind the scenes.

The United Kingdom Confronts the European Convention on Human Rights

Donald W. Jackson

"Provocative not only in its own right but in terms of advancing discussion of the U.S. and international action on human rights. The author has read a large amount of material about the European Convention on Human Rights, from both primary and secondary sources. To this he has added material on U.S. and British constitutional law. The result is a stimulating and wide-ranging discussion."
