A new definitive translation

On the Art of Building in Ten Books

Leon Battista Alberti

translated by Joseph Rykwert,

Neil Leach and Robert Tavernor

Introduction by Joseph Rykwert

De Re Aedificatoria, by Leon Battista Alberti (1404–1472), was the first modern treatise on the theory and practice of architecture. Its importance for the subsequent history of architecture is incalculable; yet this is the first major English translation based on the original, exceptionally eloquent text on which Alberti's reputation as a theorist is founded.

In a substantial introduction, Joseph Rykwert discusses the fundamental flaws of earlier French, Italian, and English translations, noting that Alberti's style and intention is fully restored in this new rendering of his famous treatise.

The Lost Meaning of Classical Architecture

Speculations on Ornament from Vitruvius
to Venturi

George Hersey

What do the rituals of the classical orders really mean? Why do architects still use them today? George Hersey presents a radical argument that probes the sacrificial roots of classical forms and ornament.

"To suggest that the classical language of architecture, which has for so long been construed—even by its native speakers—to depend mainly on a set of powerful, but bloodless conventions, was associated by way of the poetic language of tropes with ancient sacrificial ritual is a radical argument in the true sense of the term."—Alan J.

Plattus, Yale University

Classical Architecture

The Poetics of Order

Alexander Tzonis and Liane LeFaivre

"The authors' unique insights into the classical tradition come at a propitious moment, when classicism is being revived by designers innocent of its implications. Their approach—partly a rhetoric of classical architecture and partly a suggestion of its philosophy—reveals the principles that link the great masters of the tradition from Vitruvius to Mies."—James

Ackerman, Harvard University
