Aims and Scope: The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Publishing, Advertising, and Subscription Offices: Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK (for U.K. and elsewhere).

2014 Subscription Information: *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623)

is published quarterly in January, April, July, and October by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473; Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual institutional subscription rates for Volume 30 (2014): Institutions online only US \$560.00, and online only UK and elsewhere £321.00. Individuals online only US \$281.00, and online only UK and elsewhere £158.00. Single part: US \$102.66 in the U.S.A., Canada and Mexico; UK £58.85 and elsewhere. Online only for all institutions. Print editions ceasing for 2014. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

Founding Editors: Egon Jonsson and Stanley J. Reiser

CONTENTS

Methods

- 131** Ethics expertise for health technology assessment: A Canadian national survey
Kenneth Bond, Mark Oremus, Katherine M. Duthie and Glenn G. Griener
- 137** Medical devices early assessment methods: Systematic literature review
Katarzyna Markiewicz, Janine A. van Til and Maarten J. IJzerman
- 147** Mentoring a health technology assessment initiative in Kazakhstan
Sergei Muratov, David Hailey, Vicki Foerster, Bruce Brady, Don Juzwishin, Philip la Fleur and Jessie McGowan
- 153** Post-implementation surveillance of a non-pharmacological health technology within a National Health Service
Carlos Campillo, Montserrat Casamitjana, Fernando Carrillo-Arias, Ana Royuela, Francisco M. Kovacs and Victor Abraira
- 165** Markov modeling and discrete event simulation in health care: A systematic comparison
Lachlan Standfield, Tracy Comans and Paul Scuffham
- 173** Value of databases other than Medline for rapid health technology assessments
Diane L. Lorenzetti, Leigh-Ann Topfer, Liz Dennett and Fiona Clement
- 179** Health technology assessment and personalized medicine: Are economic evaluation guidelines sufficient to support decision making?
Don HuserEAU, Deborah A. Marshall, Adrian R. Levy, Stuart Peacock and Jeffrey S. Hoch

Assessments

- 188** Patient's perspective on hyperbaric oxygen treatment of osteoradionecrosis
Anne Lee, Lone Forner and Erik C. Jansen
- 194** Effectiveness of wearable defibrillators: Systematic review and quality of evidence
Jennifer Uyei and R. Scott Braithwaite
- 203** Costs for stroke in Sweden 2009 and developments since 1997
Ola Ghatnekar, Ulf Persson, Kjell Asplund and Eva-Lotta Glader
- 210** Risks in the implementation and use of smart pumps in a pediatric intensive care unit: Application of the failure mode and effects analysis
Silvia Manrique-Rodríguez, Amelia C Sánchez-Galindo, Jesús López-Herce, Miguel Ángel Calleja-Hernández, Irene Iglesias-Peinado, Ángel Carrillo-Álvarez, María Sanjurjo Sáez and Cecilia M Fernández-Llamazares
- 218** Cost-effectiveness and clinical implications of advanced bearings in total knee arthroplasty: A long-term modeling analysis
Peter Fennema, Thomas J. Heyse and Carin A. Uyl-de Groot

Policies

- 226** Health technology assessment of medicines in Greece: Pharmaceutical industry executives' views
Eleni Armataki, Eleftheria Karampli, John Kyriopoulos and Elpida Pavi
- 233** Evidence, values, and decision making
Michael D. Rawlins
