## ANNOUNCEMENT

---

Recent Applications published by the International Commission on Zoological Nomenclature in the *Bulletin of Zoological Nomenclature* (vol. 43, part 1, 9 April 1986) included the following:

*Tylocidaris* Pomel, 1883 (Echinoidea, Cidaroidea): proposed designation of *Cidaris clavigera* Mantell, 1822, as type species.

*Ammonites perarmatus* J. Sowerby, 1822 (Cephalopoda, Ammonoidea): proposed exemption from the Principle of Homonymy.

Type species of the genus *Calymene* Brongniart (Trilobita) in Brongniart and Desmarest, 1822, and proposed suppression of the name *tuberculatus* Brünnich, 1781.

Recent Opinions published in the same issue of the *Bulletin* included the following:

*Opinion 1371* (p. 19)—*Pachycephalosaurus* Brown and Schlaikjer, 1943, and *Troodon wyomingensis* Gilmore, 1931 (Reptilia, Dinosauria): conserved.

The Commission would welcome comments and advice on the applications, if possible within six months. The Commission's address is:

P. K. Tubbs, Esq., Executive Secretary  
International Commission on Zoological Nomenclature  
% British Museum (Natural History)  
Cromwell Road, London SW7 5BD, England
