Call for Papers – Serial Hurricanes

The Society for Disaster Medicine and Public Health is committed to examining the details of individual disasters and public health crises through research published in its journal, *Disaster Medicine and Public Health Preparedness*.

The recent serial hurricanes – Harvey, Irma, Jose, and Maria, have been classified among the worst catastrophes ever experienced in the United States and Caribbean regions.

With two previous catastrophic events – Ebola and Superstorm Sandy, the journal launched an innovative approach to peer reviewed scientific publication that has proven to be enormously successful and will be repeated for the current hurricane related events.

Senior Editors

Frederick “Skip” Burkle, MD, Harvard Humanitarian Initiative, Harvard University, Cambridge, Massachusetts

Mark Keim, MD – National Center for Disaster Medicine and Public Health, Rockville, Maryland

Guest Editors

José F. Cordero, MD – University of Georgia College of Public Health, Athens, Georgia

Raymond Swienton, MD - UT Southwestern Medical Center, Dallas, Texas

Kelly Klein, MD, - UT Southwestern Medical Center, Dallas, Texas

Eric Weinstein, MD - Lexington Medical Center, South Carolina

Jeff Schlegelmilch, MPH, MBA, National Center for Disaster Preparedness, Columbia University, New York

Pietro (Peter) D. Marghella, DHSc,

The George Washington University School of Public Health Services, Washington, DC

Tener Goodwin Veenema, Ph D, MPH, RN

Johns Hopkins University -Department of Community-Public Health

The Journal began covering events in their entirety via special issues. In doing so, the journal published in real time over the total extent of an event or crisis – from beginning to end. Due to the intensity surrounding the serial hurricanes, coverage may extend beyond one issue. The journal is now launching a special Call for Papers focusing on preparation, deployment, and rescue recovery efforts, as they unfold. Global experts, responders, and scientific and medical professionals in both disaster and public health are invited to supply content for these special and timely papers.

Material will be published in a timely manner after peer review and Guest Editors may be added as submissions increase. [Information for Contributors](#)

About the Journal

Disaster Medicine and Public Health Preparedness is the first comprehensive and authoritative journal emphasizing public health preparedness and disaster response for all health care and public health professionals globally. The journal seeks to translate science into practice and integrate medical and public health perspectives. DMPHP is the official journal of the Society for Disaster Medicine and Public Health.

About the Society

The Society for Disaster Medicine and Public Health aims to evolve a discipline around disaster medicine and public health. The society’s goal is to improve global health security, with the involvement and development of global health professionals and others who are involved in responding to and or managing significant events. The mission of the SDMPH is to advance and promote excellence in education, training and research in disaster medicine and public health for all potential health system responders based on sound educational principles, scientific evidence and best clinical and public health practices.
