

LifeDefense Plus™ from Matrix

The New Standard in Defibrillator/Monitor/Pacers

The new standard in defibrillator/monitor/pacers, LifeDefense Plus™ is the result of a joint venture between Matrix Medical Inc., the largest distributor and manufacturer of emergency care equipment and supplies in the United States, and NEC San-ei Instruments Ltd., a worldwide leader in medical electronic technology. The new lightweight (18.7 lbs.) integrated defibrillator/monitor/pacer, LifeDefense Plus™ incorporates as standard, features that other units offer only as options.

Defibrillator

- Impedance indicator on paddle
- Energy setting on paddle
- Remote defibrillation
- Synchronized cardioversion
- Automatic recording of defibrillation event
- Pediatric paddle adapters

Monitor

- Large 7 sq. in. Sony® CRT screen
- Direct monitoring from ECG electrodes, paddles, or defibrillation electrodes
- Audio/visual message system
- Real/delay recording modes
- Annotated messages on Z-fold thermal paper

Pacer

- Demand pacing
- Fixed pacing
- High-impedance, conductive rubber electrodes

Battery support/accessories

- High-capacity 2.2 amp hour NiCad battery
- Multiple-function battery support system
- Full complement of quality Matrix accessories

For more information and a demonstration of LifeDefense Plus™, the new standard in emergency cardiac care, call Matrix at 1-800-845-3550.

putting it all together for you

We know about the challenges you face every day in providing emergency medical care. Whether it's responding to a cardiac arrest patient in a crowded mall, assisting a driver who has been injured at night in a motor vehicle accident, or caring for a child in a near-drowning situation, it is essential that you have high quality products, comprehensive training, and strong, local support you can count on to provide the best care possible.

At Laerdal and California Medical Products, meeting the needs of emergency care providers has been our priority since the day each of us introduced our first EMS products... the Resusci[®] Anne CPR Training Manikin and the Stifneck[™] Extrication Collar.

Since the introduction of these original products, our companies and product lines have grown dramatically. In the process of developing new products, addressing training needs, and providing the necessary levels of customer support, we have had the good fortune of getting to know many of you on both a professional and personal basis. This experience has made it apparent that manufacturers, with the proper focus and commitment, can have a positive impact on the growth and development of prehospital care as a medical discipline. We take this responsibility seriously because we realize that by working closely with emergency care professionals we are helping to save lives.

During the coming months as we integrate our companies, we urge you to stay in touch. Call or write to let us know how we can continue to help you provide the best care possible. Whether it's a new product, an improved training methodology, or educational support, we are committed to *putting it all together for you.*
