

A Prize In Political Science

The Brian Barry Prize

Since 2014, in partnership with Cambridge University Press and the *British Journal of Political Science* (*BJPoIS*) the British Academy has awarded a prize in honour of Brian Barry, a distinguished Fellow of the Academy and founding editor of the journal.

Brian Barry was a distinguished moral and political philosopher whose work fruitfully combined analytic philosophy and political science, political theory and social choice theory. The prize is awarded annually for excellence in political science, as displayed in an essay submitted for the prize that has not been previously published and is not under consideration for publication elsewhere. The essay can address any topic in political science, as covered by *BJPoIS*, but essays in fields related to the work of Brian Barry are especially welcome.

Essays may be submitted by anyone in possession of a first degree. Entries should be 8,000 to 10,000 words, with an abstract of no more than 100 words.

Entries may be submitted at any time, but to be eligible for the current Prize, please enquire.

Entries should be submitted electronically to submission.barryprize@cambridge.org. They should be in accordance with the journal's style sheet available on the journal homepage.

The Prize will be awarded by the Events and Prizes Committee of the British Academy, on the advice of a Prize Committee especially appointed to assess entries for the Brian Barry Prize.

The Prize, valued at £2,500 is usually awarded at a ceremony at the British Academy. Winning entries will be published in the *British Journal of Political Science*, possibly after revisions.

Further enquiries should be directed to enquiries.barryprize@cambridge.org

Journal of Public Policy

Editors

Anthony Bertelli, *New York University, USA*

Peter John, *University College London, UK*

Fabrizio Gilardi, *University of Zurich, Switzerland*

Andrew Whitford, *University of Georgia, USA*

The *Journal of Public Policy* applies social science theories and concepts to significant political, economic and social issues and to the ways in which public policies are made. Its articles deal with topics of concern to public policy scholars in America, Europe, Japan and other advanced industrial nations. The journal often publishes articles that cut across disciplines, such as environmental issues, international political economy, regulatory policy and European Union processes. Its peer reviewers come from up to a dozen social science disciplines and countries across three continents, thus ensuring both analytic rigour and accuracy in reference to national and policy context.

Princeton Institute for International and Regional Affairs

Chair of the Editorial Board

Deborah Yashar, *Princeton University, USA*

World Politics, founded in 1948, is an internationally renowned quarterly journal of political science produced under the editorial sponsorship of the Princeton Institute for International and Regional Studies at Princeton University. The journal is published in both print and online versions. Open to contributions by all scholars, *World Politics* invites submission of research articles that make theoretical and empirical contributions to the literature, review articles, and research notes bearing on problems in international relations and comparative politics. The journal does not publish articles on current affairs, policy pieces, or narratives of a journalistic nature. Articles submitted for consideration are unsolicited, except for review articles, which are usually commissioned.

Journal of Experimental Political Science

Published for the Experimental Research Section of the American Political Science Association

Editors

Rebecca B. Morton, *New York University, USA*

Joshua A. Tucker, *New York University, USA*

The *Journal of Experimental Political Science (JEPS)* features research - be it theoretical, empirical, methodological, or some combination thereof - that utilizes experimental methods or experimental reasoning based on naturally occurring data. We define experimental methods broadly: research featuring random (or quasi-random) assignment of subjects to different treatments in an effort to isolate causal relationships between variables of interest. *JEPS* embraces all of the different types of experiments carried out as part of political science research, including survey experiments, laboratory experiments, field experiments, lab experiments in the field, natural and neurological experiments.

Notes for Contributors

All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at:
<http://mc.manuscriptcentral.com/psrm>

Other forms of submission will not be accepted by the editors.

The journal publishes two types of articles:

- a) full length manuscripts that present original, well researched, and fully developed empirical or theoretical work
- b) research notes

Normal length articles that should not exceed 9,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes that should not exceed 4,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes should contain original work and present a new method or methodology (particularly useful if related software components are included) to solve an important problem in applied data analysis, present a new theoretical idea or argument, or comment on other articles published in the journal. *PSRM* welcomes comments to as well as replications of published articles. These will undergo the usual peer review process and if accepted will be published in the research notes section of the journal.

PSRM uses a single-blind peer review process, thus anonymizing your manuscript is not necessary. If you feel strongly about a fully anonymous review process, you may opt out and your manuscript will undergo a double blind review process.

Replication Policy: *PSRM* has a strict replication policy which adheres to the Data Access and Research transparency (DA-RT) statement subscribed to by many Political Science Journal Editors in 2015. Authors are required to make replication material publicly available at time of publication of the article. The replication materials must be sufficient to replicate results in all tables and figures printed in the article, including simulation material for both theoretical (e.g. agent based models) and empirical (e.g. Monte Carlo experiments) work. Data and replication code for your article, as well as a log demonstrating smooth running of all the replication files, must be uploaded in a single .zip file to the *PSRM* Dataverse at <https://dataverse.harvard.edu/dataverse/PSRM>. (See the *PSRM* Dataverse Guide for a step-by-step walkthrough for uploading your material, which is also linked to on the *PSRM* Dataverse homepage). This is a necessary condition for publication of the manuscript. All manuscripts are accepted contingent on their replicability, which will initially be assessed by *PSRM* staff. Manuscripts that are not replicable will be rejected for publication. If your analysis relies on simulation techniques (MCMC, MC experiments) we require authors to set and communicate a seed, so that exact results can be replicated. If this is impossible due to the design of the analysis, replication results need not deviate by more than 5 per cent from published results in the manuscript.

Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material.

All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at <http://www.journals.cambridge.org/psrm/ifc>
