AUSTRALIAN MATHEMATICAL SOCIETY LECTURE SERIES

Introduction to Linear and Convex Programming

NEIL CAMERON - *Monash University*
This introduction to optimisation emphasises the need from both a pure and an applied mathematical point of view, beginning with a chapter on linear algebra and Euclidean geometry. A discussion of convex analysis follows, with exercises at the end of chapters.
    Lecture Series 1 *0 521 31207 8   Pb. $29.00* **AMS Discount Price $21.75**

Manifolds and Mechanics

ARTHUR JONES, ALISTAIR GRAY and ROBERT HUTTON
An easy introduction to the theory of differentiable manifolds. The authors show how this can be used to develop the theory of Langrangian mechanics directly from Newton's laws. Suitable for mathematics or physics students who have taken courses in advanced calculus.
  Lecture Series 2   *0 521 33650 3   Pb. $29.00* **AMS Discount Price $21.75**

Introduction to the Analysis of Metric Spaces

J. R. GILES - *University of Newcastle, New South Wales*
An introduction to the analysis of metric and normed linear spaces for undergraduates. The axiomatic method is shown, and its power in exploiting the structure of fundamental analysis, which underlies a variety of applications. Treatment progresses from the concrete to the abstract so metric spaces are studied in detail before general topology is begun.

  Lecture Series 3 *0 521 335928 7   Pb.$27.50* **AMS Discount Price $20.60**

An Introduction to Mathematical Physiology and Biology

J. MAZUMDAR - *Reader in Applied Mathematics, The University of Adelaide*
The mathematical modelling of biological and physiological phenomena. The discussion includes: diffusion, population, dynamics, autonomous differential equations and the stability of ecosystems, biogeography, pharmacokinetics, biofluid mechanics, cardiac mechanics, the spectral analysis of heart sounds using FFT techniques.
    Lecture Series 4   *0 521 37901 6   Pb. $27.50* **AMS Discount Price $20.60**

2-Knots and their Groups

J. A. HILLMAN - *Macquarie University, New South Wales*
The author attacks certain problems in Four-dimensional knot theory, focussing on knots in S4. New work in four-dimensional topology is also applied, to the problem of classifying 2-knots. This is an essential work for low-dimensional topologists and knot theorists.
    Lecture Series 5   *0 521 37812 5   Pb. $35.00* **AMS Discount Price $26.25**

CAMBRIDGE UNIVERSITY PRESS PO BOX 85 OAKLEIGH VIC.3166

EDITORIAL POLICY

The *Bulletin* of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. The Editors receive more than twice as much material as can be published in the *Bulletin*; many meritorious papers can, therefore, not be accepted. Manuscripts must be in their final, publishable form when submitted and papers which appear to need revision are unacceptable. We prefer clear and full arguments, and especially clear and full motivation, to mathematical telegrams. Make the style attractive and avoid ugly abbreviations. Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title. Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere.

REFERENCES

Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are "in preparation" or "submitted". Where the work cited has not yet appeared or is not readily accessible to everybody (for example, a preprint) a photocopy of the title page of the copy you have used will be of great help to us.

AUTHORS' ABSTRACTS

1. Each paper must include an abstract of not more than 200 words.
2. In writing abstracts, authors should bear in mind that these may be the only parts of the papers that are read.
3. The abstract should contain a brief but informative summary of the contents of the paper, but no inessential details.
4. The abstract should be self-contained, but may refer to the title.
5. The abstract should be written in completely connected sentences, not as a list of headings. Abbreviations should be avoided.
6. The abstract should be non-technical, and intelligible without reference to the full paper. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

SUBJECT CLASSIFICATION

Authors should include in their papers one or more classification numbers, following the 1980 Mathematics Subject Classification (1985 Revision). Details of this scheme can be found in each Annual Index of Mathematical Reviews.

ELECTRONIC MANUSCRIPTS

In future the Bulletin will be produced using $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-TEX. Authors who are able to do so are invited to prepare their manuscripts using $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-TEX. Hard copy only should be submitted for assessment, but if the paper is accepted the author will be asked to send the text on a 5 1/4 inch IBM PC compatible diskette. [Typed manuscripts will, of course, still be acceptable.]

THE AUSTRALIAN MATHEMATICAL SOCIETY

Membership and correspondence

Applications for membership, notices of change of address or title or position, members' subscriptions and correspondence related to accounts should be sent to the Treasurer. Correspondence about the distribution of the Society's BULLETIN, GAZETTE, and JOURNAL, and orders for back numbers should be sent to the Treasurer. All other correspondence should be sent to the Secretary.

THE BULLETIN

The BULLETIN of the Australian Mathematical Society began publication in 1969. Normally two volumes of three numbers are published annually. The BULLETIN is published for the Australian Mathematical Society by the Australian Mathematical Publishing Association Inc.

Other publications of the Society

The JOURNAL of the Australian Mathematical Society began publication in 1959 and since 1975 has appeared in two series, Series A (Pure Mathematics and Statistics) and Series B (Applied Mathematics). The Editors are:

(A) Dr. T. E. Hall,
Department of Mathematics,
Monash University,
Clayton, Victoria 3168,
Australia.

(B) Professor E. O. Tuck,
Department of Applied Mathematics,
University of Adelaide,
G.P.O. Box 498, S.A. 5001,
Australia.

The Australian Mathematical Society GAZETTE started publication in 1974, and carries news items, mathematical articles of general interest, and articles on tertiary mathematics teaching. Manuscripts for publication should be sent to the Editor:

Dr G. L. Cohen
School of Mathematical Sciences
University of Technology, Sydney
PO Box 123
Broadway, NSW 2007, Australia

The Australian Mathematical Society LECTURE SERIES is a series of books published by Cambridge University Press. It is intended to contain both research monographs and textbooks suitable for graduate or undergraduate students. Typescripts should be sent to the Editor-in-Chief, Prof. S.A. Morris, Dept of Mathematics, Statistics and Computing Science, University of New England, Armidale, N.S.W. 2350.
