

New Archaeology Books from Cambridge University Press

Collapse of Complex Societies

Joseph A. Tainter

Dr. Tainter describes nearly two dozen cases of societal collapse and reviews more than 2000 years of explanations. He then shares a new theory that accounts for collapse among societies.

Cloth about \$44.50

Archaeology of Prehistoric Coastlines

Geoff Bailey and John Parkington, Editors

An overview of coastal archaeology as a developing discipline is followed by ten case studies from a wide variety of places, including Scandinavia, Japan, Tasmania, New Zealand, Peru, South Africa, and the United States.

Cloth about \$39.50

The Birth of Prehistoric Chronology

*Dating Methods and Dating Systems in Nineteenth Century Scandinavian Archaeology
Bo Graslund*

Beginning with an analysis of the basic elements of archaeological dating systems, Graslund traces the origin and subsequent development of dating systems, examining in detail how they were built up and refined.

Cloth about \$39.50

Maya Postclassic State Formation

Segmentary Lineage Migration in Advancing Frontiers

John W. Fox

Here the author offers a fresh and persuasive view of the crucial Classic-Post Classic transition that determined the shape of the later Maya state.

Cloth about \$44.50

Burial and Ancient Society

The Rise of the Greek City State

Ian Morris

This book differs from other studies of state formation in that unique and particular developments are given as much weight as those factors that are common to all early states.

Cloth about \$39.50

Reading the Isotopic Clocks.

Your research in age determination and stable isotopes requires reliable data and custom service. Teledyne Isotopes has the expertise and experience to meet these requirements.

We have been pioneers in the industry since 1955 and are the only commercial laboratory that offers all major age determination techniques.

These include:

Radiocarbon

Stable isotopes: $^{13}\text{C}/^{12}\text{C}$ • $^{18}\text{O}/^{16}\text{O}$ • H/D
K/Ar • Rb/Sr • U/Pb • Pb/Pb

We can assure you of reliable data because of well-staffed and well-equipped labs, intercalibration with major universities and government facilities, and through use of N.B.S. and international standards.

For the most reliable reading of the isotopic clocks, come to the experts.

LA RIERA CAVE: STONE AGE HUNTER-GATHERER ADAPTATIONS IN NORTHERN SPAIN

Lawrence G. Straus & Geoffrey A. Clark, eds.

Contributions by J. Altuna, K. Cushman, M. Deith, A. Eastham,
R. Eibert, J. Fernandez-Tresguerres, M.D. Garralda, M. Gonzalez,
R. Harmon, R. Jewett, H. Laville, A. Leroi-Gourhan, M. Menendez,
J. Ordaz, J. Ortea, N. Shackleton, L. Suarez, D. Young

xvii + 498 pp., 244 figs., 107 tables, 35 plates, 2 app., bibliogr.
Paper \$28.50 (1986). Price includes postage and handling for
single orders in the U.S., Canada and Mexico.

From its inception in 1976, the La Riera Paleoecological Project has been a multidisciplinary, multinational endeavor centered on the excavation of La Riera Cave, a late Pleistocene-early Holocene site in coastal Asturias Province, northern Spain. Supported by the National Science Foundation and other agencies, the research at La Riera was conducted under an ecological framework and was directed toward an understanding of the different roles that the cave played in a series of changing, regional settlement-subsistence systems over a period of some 13,000 years. Dramatic climatic changes took place in late Pleistocene Cantabria accompanied by equally striking changes in archaeological industries and faunas. Our objectives at the site were to identify these changes, to look for correlations among them and to explain systemic regularities observable in the La Riera sequence, and at other Upper Paleolithic and Mesolithic sites in the region.

**SOCIETY FOR AMERICAN ARCHAEOLOGY
CALL FOR NOMINATIONS
SOCIETY ELECTIONS, 1988**

The Society for American Archaeology will hold its annual elections for the following offices:

Treasurer-elect (1 year)—succeeds to the office of treasurer for a 3-year term (1989–1992).
Executive Committee, Place 1—2-year term (1988–1990).
Executive Committee, Place 2—2-year term (1988–1990).

The Chair of the Nominating Committee for the 1988 elections is Annetta L. Cheek, Office of Surface Mining, Department of the Interior, Room 5101–L, Washington, D.C., 20240. The other members are James N. Hill, Department of Anthropology, University of California–Los Angeles, Los Angeles, CA 90024; and Nan A. Rothschild, Department of Anthropology, Barnard College, 606 West 120th Street, New York, NY 10027. Members are urged to participate by suggesting names of candidates to any member of the committee before November 20, 1987.

DISTINGUISHED SERVICE AWARD NOMINATIONS SOLICITED

The Distinguished Service Award established by the Society for American Archaeology is presented annually to a member for specific accomplishments of extraordinary quality. Recognition can be granted in a wide range of areas relating to archaeology including, for example, teaching (academic as well as public education), research (theory, method, application of new technology, analysis, etc.), and conservation of archaeological data (curatorial, legal, managerial), as long as two basic criteria are met. First, the contribution must be truly extraordinary in nature (not expected in the normal course of events) and must be widely recognized as such, and second, it must be of a positive and lasting quality.

The Society is accepting nominations from members for the 1988 Award, which will be presented at its Annual Meeting in April 1988, in Phoenix, Arizona. Each recommendation should be supported by a statement documenting concisely and thoroughly the achievements of the nominee. Mail by November 28, 1987, to Dr. Charles L. Redman, Chair, DSA Committee, Department of Anthropology, Arizona State University, Tempe, AZ 85287.

**53rd ANNUAL MEETING
SOCIETY FOR AMERICAN ARCHAEOLOGY**

Phoenix Hilton Hotel
Phoenix, Arizona

Wednesday, April 27–Sunday, May 1, 1988

Annual Meeting Chair: Sylvia W. Gaines, Department of Anthropology,
Arizona State University, Tempe, AZ 85287

See the April 1987 issue of *American Antiquity* for full details of the 1988 Annual Meeting.
