The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

G. H. BATEMAN

ASSISTANT EDITOR

LIONEL TAYLOR

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *Journal of Laryngology and Otology*, 65, 33. The titles of all Journals should be given without abbreviation.

It is most important that authors verify personally the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks will normally be held by the Printers for two years, after which they will be destroyed. Any author is entitled to have these returned to him, but a request for this must be sent within two years of the appearance of the article, to HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology and Otology*, c/o HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent.

7. As from January 1970, the annual subscription is £8 (eight pounds sterling) post free; U.S.A. \$20 post free, and payable in advance.

8. Single copies of current or back numbers (when available) will be on sale at £1 (including postage) each.

9. All business and advertising communications should be sent to the publishers.

This knob

only £357

The audiometer behind it comes free!

Expensive knob? Not really, when you consider that the audiometer is the Amplivox Model 103. We would be very happy to demonstrate both knob and Model 103 free of charge and show you how complicated audiometry can be made simple.

The knob of the Model 103 audiometer can select the following functions:

- Pure Tone Air Conduction
- Pure Tone Bone Conduction
- Narrow Band Masking
- Wide Band (White Noise) Masking
- Alternate Binaural Loudness Balance
- Simultaneous Binaural Loudness Balance
- Speech, Live Voice
- Speech, Recorded
- Speech with Masking
- SISI Test
- Lüscher DL Test
- Audiometer Weber Test
- SAL Test
- Rainville Test

- Shifting Voice
- Stenger Test
- Modified Stenger Test
- Tone Decay Test

The Model 103 means complicated clinical audiometry reduced to its simplest terms.

What clinicians say about ORBENIN

Clinicians have frequently testified to the success of Orbenin in the treatment of Gram-positive infections. World Literature now contains over 400 references to Orbenin.

Pneumonia Lung Abscess Tonsillitis Pharyngitis Acute bronchitis

Septicaemia

Boils Carbuncles Infected dermatoses

Osteomyelitis Osteitis

Post-operative wound infections Burns Skin graft protection

Acute endocarditis

Staphylococcal enterocolitis Staphylococcal urinary tract infections
Staphylococcal meningitis

Dosage

Adults: 500mg (2 capsules) four times daily, by mouth. 250mg (1 vial) by intramuscular injection, four times daily.

Children: Under 2 years—quarter adult dose. 2-10 years—half adult dose.

In severe infections the dosage may be increased.

Contra-indications

Orbenin should not be given to patients with a penicillin allergy or administered by subconjunctival injection.

Side-effects

As with other penicillins.

Additional information is available on request.

Orbenin (Regd.) (cloxacillin sodium BP) is a product of British research at **Beecham Research Laboratories** Brentford, England, originators of the new penicillins.

Specifically designed for you and your patients. Precision-engineered, functionally-built equipment for the Ear, Nose and Throat and other Specialists.

S.M.R. keeps you and your patients' comfort and satisfaction in mind. Whatever your needs . . . whether they be for one unit or a completely equipped treatment room, you are assured of the finest . . . a room that reflects professional good taste.

Picture shows what can be done with small treatment room areas. The rooms are complete from the compact treatment unit to the physician's stool. Yet, this equipment fits easily and functionally into a small area. This is just one of many room arrangements available from S.M.R.

STAINLESS STEEL POLISH

SMR Stainless Steel Polish cleans and preserves with superior results — ends fingerprints, watermarks and surface stains.

DOWN'S

Instruments for Myringoplasty or Tympanoplasty

by Dr. J. Marquet (Antwerp)

These instruments were designed with a view to obtaining a perfect dissection of the epithelial layer of the tympanic remains as well as a perfect dissection of the skin of the meatal wall. This is done from within, working outwards, in order to conserve intact, the nourishing vessels which are required to invade the graft.

This particular technique, described by Dr. J. Marquet, for implantation of homografts of drums, is also valid for implantation of other materials, such as facia in myringoplasty or tympanoplasty.

- L 275-10 Set complete in case.
- L 275-11 1. Sickle knife right for incision of epithelial layer.
- L 275-12 2. Sickle knife left for incision of epithelial layer.
- L 275-13 3. Elevator for dissection of the epithelial layer.
- L 275-14 4. Elevator for dissection of the epithelial layer with slanting surface, bottom to top.
- L 275-15 5. Elevator for dissection of the epithelial layer with slanting surface, top to bottom.
- L 275-16 Case only for above.

A Product from the Sea for E.N.T. Surgeons

*calgitex

Calgitex calcium alginate E.N.T. Gauze is made from highly purified specially processed calcium alginate, derived from seaweed. This product is used extensively by E.N.T. surgeons throughout the world, it has a slow absorption rate, and can be easily removed from the nose without effecting or damaging the tissue.

In the field of aural surgery Calgitex is highly suitable for packing procedures due to its solubility, soft texture, and discouragement of haemorrhage.

Packed in vials containing one metre of ribbon gauze.
Obtainable from your usual Surgical or Pharmaceutical Supplier
